Wardway Homes

Montgomery Ward Co.

Satisfaction Guaranteed or Your Money Back

CHICAGO KANSAS CITY ST. PAUL BALTIMORE PORTLAND, ORE. OAKLAND, CALIF. FORT WORTH

Guarantee

WE GUARANTEE to furnish you at the price quoted on each building illustrated in this book, all the lumber, lath, shingles, doors, windows, frames, flooring, interior woodwork, nails, tinwork, door and window hardware, paints and varnishes and built-in fixtures necessary to build it according to the illustration, floor plans shown and specifications given.

We guarantee that there will be no extras, and should there be any shortage or unsatisfactory materials, we guarantee to make the same good.

We fully guarantee all material to be equal to or better than grades specified. You take absolutely no risk in sending us your order for merchandise described in this book, as we absolutely guarantee satisfaction in every detail.

You are fully protected under this guarantee, and we make *you* the judge.

AVERY LIBRARY
COLUMBIA UNIVERSITY

Our Terms

You may have your choice of the following three methods of payment:

1. CASH WITH ORDER. We allow a 2 per cent discount for cash in full with order. You run no risk whatever in sending the entire amount, because you are protected absolutely by our binding guarantee of satisfaction.

2. REMITTANCE OF ONE-FOURTH, balance C. O. D. If for any reason you do not care to send the full amount of cash with the order to us, you may send us one-fourth of the total amount with order and pay the balance when you receive the goods. After the material reaches your freight station, five days are allowed for inspection. (NO DISCOUNT ALLOWED UNDER TERMS NO. 2.)

3. STATEMENT OF DEPOSIT. As evidence of good faith, send us $100.00 with order and deposit the balance of the purchase price with your banker or building and loan association. Then send us statement of deposit, signed by your banker or building and loan association, specifying that the balance due us will be paid within five days after arrival of shipment. This allows you five days to inspect the shipment and absolutely satisfy yourself. We furnish blank form for statement of deposit. (NO DISCOUNT ALLOWED UNDER TERMS NO. 3.)

Our Prices

The prices quoted in this catalogue are f. o. b. cars at mills and factories.

Lumber is quoted f. o. b. cars at different yards.

Millwork such as doors, windows, frames, trim, etc., is quoted f. o. b. cars at mill in Eastern Iowa.

Hardware, paints, roofing and other goods are quoted f. o. b. cars at Chicago.

We will gladly furnish on request, delivered prices on all material with freight prepaid to your station. Use the enclosed "Information Blank."

AVERY LIBRARY
COLUMBIA UNIVERSITY

Dear Customer:

This book illustrates and describes our beautiful home designs and tells you of the advantages and savings of Wardway Ready Cut Construction.

When you build a Wardway Home, you build without fear of material shortages or delays. You know when built your home will be of pleasing design and architecturally correct. You build in ONE-THIRD less time and actually save at least ONE-FOURTH the cost of building. You know before you start exactly what your home is going to cost, and finally you are assured of a home which will always be a source of pleasure and satisfaction to you in the years to come.

The homes shown in this book are the result of years of experience of some of America's foremost home engineers and architects - specialists who have given all of their time to perfecting ideal plans for medium priced homes. You will find every home modern, efficiently laid out as to floor plan, and pleasingly designed.

Under our ready cut system all of the heavy framing material is cut at the factory and is shipped accurately fitted ready for quick erection on arrival. This means time saving and labor saving, thereby materially lessening the completed cost of your building. Many of our customers without previous building experience, erect their homes themselves and thus save all labor expense.

Think of the delays and annoyances our system of construction saves you. For one price you purchase everything (masonry materials excepted) to complete your home. No running here or there for different materials. No uncertain deliveries and costly delays, and best of all, no "extras" to run the final cost far above your original estimate, for with every Wardway Home you receive a written guarantee that everything will be furnished to build your home complete.

As soon as you have made your home selection, be sure and write us, using the enclosed information blank for your convenience. We can then give you a price on the home of your choice, freight paid to your station, and tell you lots of interesting things about it. We shall hope to hear from you very soon.

Very truly yours,

MONTGOMERY WARD & CO.

Per K. V. Ferguson
Manager Wardway Homes Division.

Prices of Wardway Homes

The list below gives the very latest prices on Wardway Homes. These figures are based on manufacturing costs and are as low as it is possible to make them. We welcome comparison of our prices with those quoted elsewhere on similar homes. Always remember, however, when comparing prices that ours are for the home complete as specified. There will be no "extras" for you to buy when your home is in the course of construction. Please keep this fact in mind when comparing our prices with others.

The five right hand rows of figures below give prices on some optional features of Wardway Homes. Each of these options is explained in detail in the paragraphs at the bottom of this page. Be sure to read them over carefully before deciding on these details of the construction of your home.

While the home will be complete without any of these features, it is true that oak flooring, for example, will add considerably to the value of the home as well as to your pleasure in living in it.

NOTE: It is our policy to maintain prices as long as possible, but we reserve the right to follow any radical changes in cost.

Special Features Which May Be Included if Desired

Oak Option Under this option we will furnish beautiful plain sawed red oak flooring $13/16$ inches thick with $2\frac{1}{4}$ inch face and woodwork for all the principal downstairs rooms of your Wardway Home, instead of our regular Douglas fir finish. The rooms included in this option are the hall, living room, dining room, den, library, and vestibule. In two-story homes, where the stairs go up from the front hall or living room, the stair treads, risers, rails and balusters are all of oak.

Asphalt Shingle Option We supply our regular Radio Slate Surfaced Asphalt Shingles instead of cedar shingles, in this option. We also include the extra roof sheathing required when asphalt shingles are used. This additional sheathing is made necessary by the fact that it must be laid tight under asphalt shingles, whereas with wood shingles it may be laid open as shown on Page 10 of this catalogue.

Storm Sash Option Includes well made storm sash for all the windows of your home, save those in the basement and attic. Storm doors for all the outside doors are also furnished.

Screen Option Includes galvanized wire screens for the windows and doors listed in the Storm Sash Option.

Shade Option Includes our high grade Oil Opaque Shades listed in General Catalogue No. 104 under Article No. 372 D 8085 for all windows (except basement and attic) and for outside doors. Can be finished in following colors: Deep Ecru; Cocoa Brown; Buff; Ivory; White; Plaza Gray; Dark Green; or Dark Olive Green. State color desired. Where color selection is not made we will furnish dark green.

Prices of Wardway Cottages and Garages

The prices quoted here on Wardway Cottages are cut as low as possible in order to stimulate the sale of these little dwellings. Wardway Cottages are furnished Ready-Cut only, and are of simple design so that they may be put up quickly and at little expense. The first group listed below are "industrial cottages" intended as all-year-round homes. The second group are designed as summer homes only.

READY-CUT COTTAGES

Prices on plumbing outfits are for modern sanitary installations but do not take into account any plumbing codes or ordinances. If your installation must be made according to a code, write us and we will give you a special estimate.

Prices for Heating Plants, Plumbing, and Electric Wiring for Any Wardway Home

See Pages 96 to 100 for Additional Information

Prices for Plumbing and Heating Materials are for Shipment from Chicago and are subject to market changes.

Heating Systems are figured to maintain comfort indoors with a minimum outside temperature of 10 below zero. This is the usual minimum for Illinois, Indiana and Ohio. If it differs in your locality heating system must be figured accordingly.

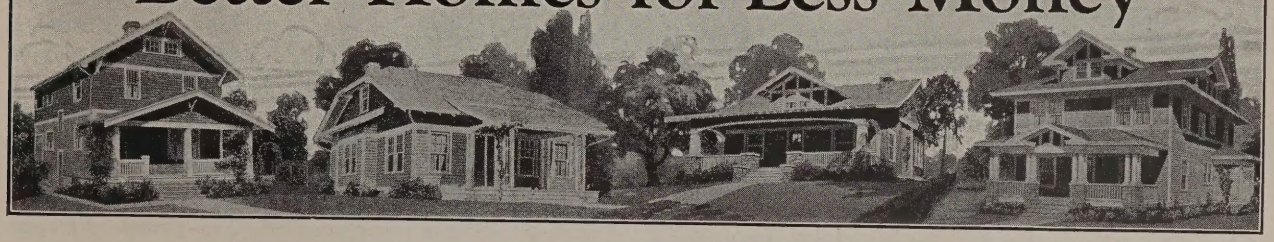
Heat Regulator (see Page 100) with Clock - $32.95 Extra; without Clock - $27.95 Extra.

*Extra Lavatory Included

Our prices on electric wiring include service entrance, safety entrance switch, steel service box for branch blocks, fuse plugs and a sufficient quantity of No. 14 rubber covered wire. Porcelain tubes and knobs for a flush switch in every room, with outlet on front porch and in case of a two-story house, three-way switches connecting upper and lower hall. Price includes two lights in basement controlled by a snap switch at top of basement steps. Attic light when necessary. Two outlets are figured for rooms containing over 140 square feet. Where living room extends entire width of house, two outlets also figured. No lights are figured for clothes closets. Prices do not include lighting fixtures.

Better Homes for Less Money



The Service and Saving Which This Book Offers You

MONTGOMERY WARD & COMPANY make it possible for thousands of families to own their own homes—families which can do so because of Wardway plans, materials and low prices. We enable thousands to build and to have better homes for less money than would be possible were they to build under the ordinary plan. These great savings and Wardway high quality are due to our enormous purchasing power and to the fact that we deal direct with you, eliminating all middlemen's extra profits.

Perfected Plans

BECAUSE we sell many Wardway Homes of each type, we are able to give thought and effort to each plan which no individual or architect could afford in the planning of a single home. Each house is the work of a staff of experts, each chosen because he is a specialist in some one phase of home building. These men have studied each house as it has been built in various climates, and have improved and revised it until every detail is just right. Wardway service *starts* with perfected plans.

Large Purchases Mean Low Costs

OUR business calls for great quantities of lumber each year. Where the average dealer in a small town measures his requirements by the dozen, we figure ours by the carload. Naturally this enables us to secure price and transportation advantages which are impossible for anyone not buying in such large quantities. These savings we pass on to you.

And the material is of the highest quality obtainable. Everything we buy must measure up to our rigid high standards. Specifications of Wardway Homes are shown complete on Pages 10 and 11. Every kind and grade of material for every part is shown, and we absolutely guarantee that all materials will be as good as, or even better than, the grade specified. Careful inspection at all points is responsible for Wardway super-quality, which is always a source of surprise and delight to the home builder.

"Extras" Are Eliminated

ANYONE who has built a home under the old-fashioned method will tell you how much trouble it is to build that way, and how many expensive "extras" there were which were not figured on at first. When you buy a Wardway Home you not only receive all the benefits of Wardway service, but you also receive a guarantee that all materials will be complete as specified and there will be no "extras." The satisfaction to be derived from having all the uncertainties and possibilities of errors eliminated in building your home is thoroughly appreciated by those who have built by Wardway methods. These methods mean actual savings in cost, less delay and better construction.

Our plans are complete to the smallest detail and have been so perfected that the erection of the Wardway Home becomes a simple matter indeed. Not only is waste in materials eliminated, but labor costs are greatly reduced owing to the ease and speed with which the various parts of the house are put together on the job. All of this goes to reduce the final cost.

To the prospective home builder these are facts too important to overlook. It is because of them that the Wardway system of construction is becoming so popular.

Read What This Customer Says of His Wardway Home

"I am greatly pleased with my home. The blue prints were easy to understand and complete in every detail.

"A contractor had estimated on practically the same house plan at $2,500, so you see how much I saved. Besides, it was finished much quicker than had it not been ready cut. There was plenty of everything and it fit perfectly.

"There have been at least 25 people to see our home after hearing it was a Wardway and each gave it the highest of praise as to material, appearance and warmth."

RICHARD BROWN,
Kalamazoo, Mich.
(Printed with Mr. Brown's permission)

Montgomery Ward & Co.

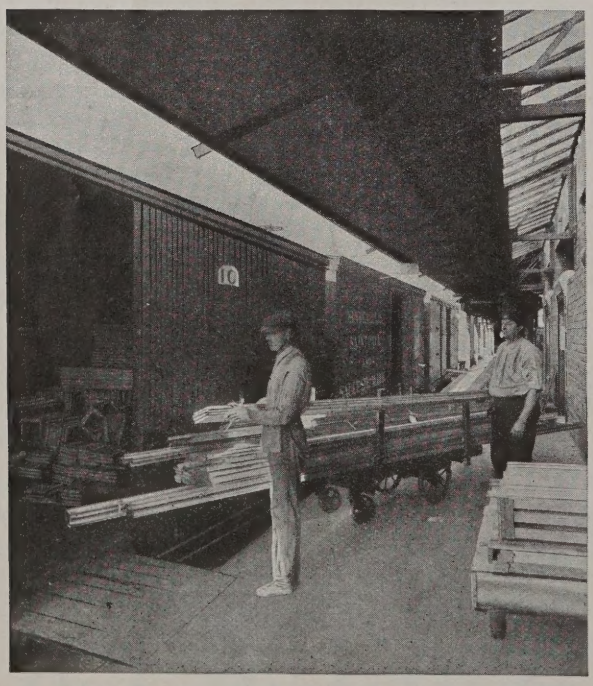
Chicago Kansas City St. Paul Baltimore Portland, Ore. Oakland, Calif. Fort Worth

Montgomery Ward & Company absolutely insure you against "extras." This is written into our guarantee, and you know when you start exactly what the lumber specified will cost you. If we make a mistake *we* pay for it, and not *you*. And buying from one source saves you considerable time, money and trouble, and makes it possible to guarantee your cost of material beyond any doubt. Think about these things *before* you build.

Our National Organization Insures Lowest Costs

THINK it over. Isn't it only reasonable to assume that Montgomery Ward & Company, selling goods in practically every part of the United States and in many foreign countries under an absolute guarantee of "Satisfaction or Your Money Back," and selling so many homes, is in a better position to save money for you and give you a better home—whatever price you pay—than you could get otherwise? And remember this: No matter from whom you buy, the lumber you use has to be shipped in and the freight charges paid. The freight is simply included in your purchase. No matter from whom you buy, you pay transportation charges.

Wardway Homes are shipped to you from the nearest available source of good lumber. This lowers your freight costs so that you really pay less when you buy from Ward's. Mills located in the best timber producing sections of the country assure you of the lowest possible freight rates, no matter in what state you live. If you live in the West or Northwest, your lumber will be the finest Douglas Fir shipped direct from a Pacific Coast mill. If you live in the South, we will ship your lumber from a mill in the heart of the best Yellow Pine forests now standing. For the Middle West, two plants at strategic points on the Mississippi River assure you the finest materials and lowest possible freight rates. Eastern points receive material from the mills having the lowest freight rates to the point where building is to be erected. The prices on Pages 1 to 4 are all figured f. o. b. the Central Western plants. If you live near the Western or Southern mills, we can quote you a delivered price—all freight paid to your station—which will be *less than* the prices shown in this book. Ask us for delivered prices by filling in and mailing to us the enclosed information blank.



All Montgomery Ward Material Is Carefully Marked, Bundled and Checked as It Is Loaded Into the Car

Order Direct from This Book

YOU will find on the following pages complete specifications which cover every detail of construction and material. You will find a selection of our finest plans, one of which is surely what you want. Under each there is a short description which tells just what you will get. Prices on the homes are given on Pages 2 and 3. In the back of this book you will find descriptions of plumbing, electric materials, heating plants, and other equipment.

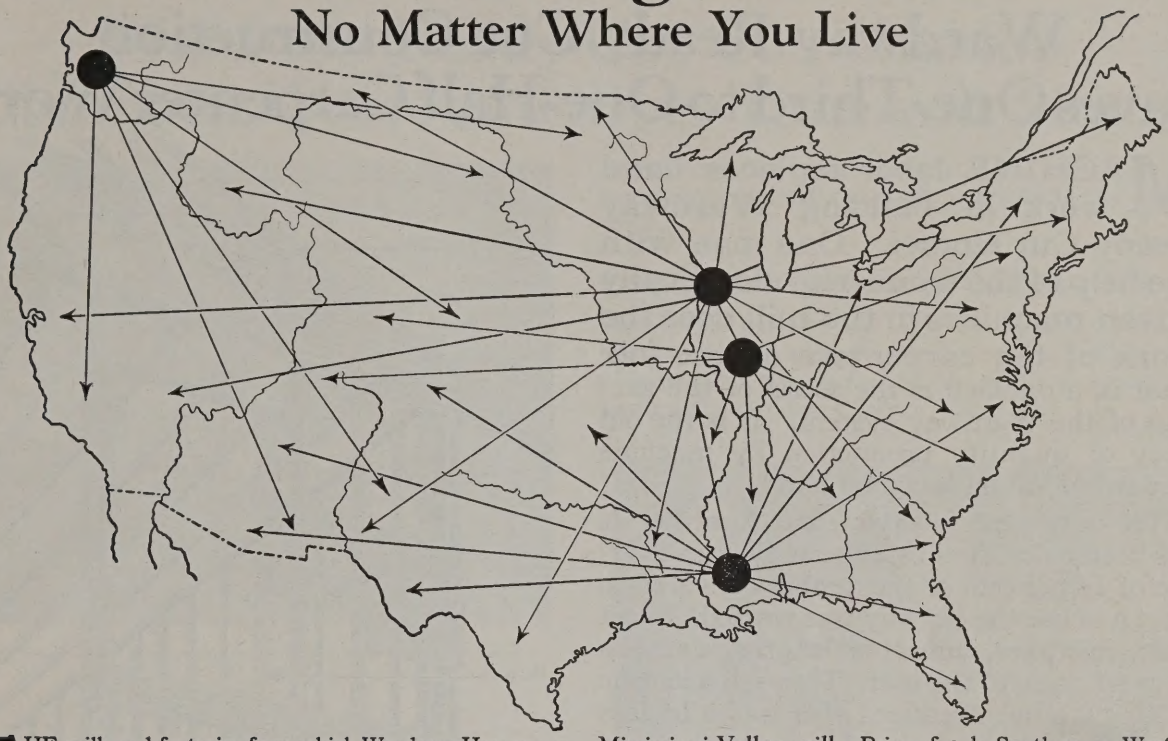
Everything in this book is sold under our 54-year-old policy—"Satisfaction Guaranteed or Your Money Back." You may, therefore, with a sense of absolute security select the very home you want at exactly the price you want to pay, and save yourself all the work and worry of figuring so many details and the consequent disappointment of having many extras to pay. Do as scores of other wise home-buyers are doing every day—order your home from this book. You will save time, money and trouble; and you are thoroughly protected by our well known guarantee—a guarantee which has "made good" for fifty-three years.

Use the enclosed information blank for securing a price on any home *delivered to your station* and other particulars regarding the home you select.

We wish to call your attention especially to our heating and plumbing service, described in detail on Pages 96 to 100 of this book. We are equipped to furnish you with plumbing complete, in a variety of pleasing styles, and any type of furnace or boiler you may desire, with all pipe, registers and fittings necessary for installation. Turn to those pages and study them carefully before deciding what type of heating plant you want in your home. On Page 4 you will find a price for each kind of equipment for all of the different houses, and for complete electric wiring.

Lowest Freight Rates

No Matter Where You Live



THE mills and factories from which Wardway Homes are shipped are situated at the most advantageous shipping points, which gives you lowest freight rates and prompt service. No matter where you live—North, South, East or West—your lumber will be shipped to you from the mill which has the lowest freight rate to your station.

All prices in this book are based on shipment from Mississippi Valley mill. Prices f. o. b. Southern or Western mills are considerably lower. If you live in the south or far west, this works to your advantage. Write for a *delivered price, freight paid,* on the home you want.

Material may all be shipped at one time, or we will hold inside finish 30 days to allow you to get the house enclosed, if you wish. It makes no difference in the freight rate.

Wardway Ready-Cut Construction Saves One-Third to One-Half Carpenter Work

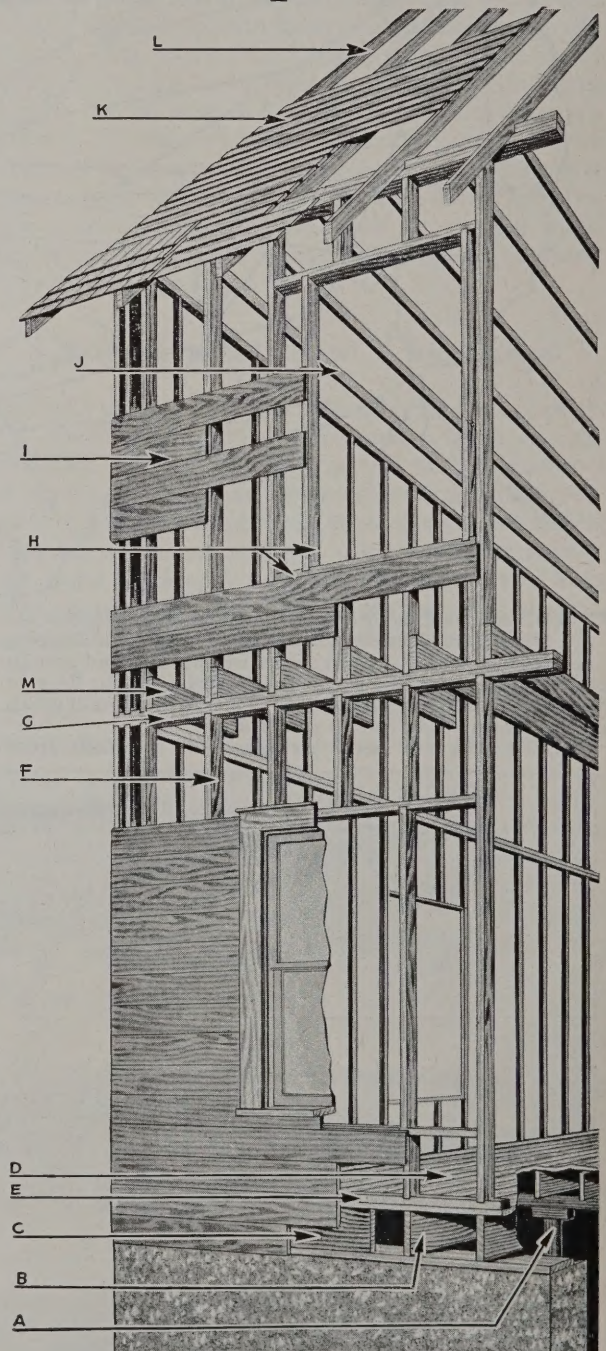
MACHINE labor replaces hand work in building Wardway Ready-Cut Homes. One man with the help of the wonderful electrically driven machines in the mill does the work of ten carpenters on the job. That in a nutshell is the secret of the savings of the Wardway system. It is the old story of quantity production by machine versus individual labor by hand.

Not only time is saved, but lumber. It has been calculated by experts that an average of 17 per cent of the lumber delivered to erect a house the old way was wasted. Short ends, mistakes, unusable lengths, cause a large addition to the cost. Through scientific cutting we have reduced this waste to *less than two per cent.* This saving alone covers the entire cost of cutting the material in the mill.

Wardway System Eliminates Mistakes

Study the illustration at the right. Note the great number of pieces necessary to build a house—the complicated angling cuts—and remember an average of *three cuts* are made in *each piece* of lumber that goes into a house to fit it into place. It means not only a huge amount of labor—very expensive labor—if done by hand, but innumerable chances for costly mistakes. The Wardway Ready-Cut System of exact measurements and scientific cutting *eliminates all chance for mistakes.* Each piece is cut exactly according to the architect's drawing, accurate to the sixteenth of an inch. Each piece is inspected by an expert and clearly marked with a printed stencil to correspond with the same piece shown on the plan. Your carpenter simply takes the piece the plan calls for, slips it into place and nails it up. It fits perfectly—cannot help it—no chance for error.

Not Ready-Cut—If you prefer, we can furnish the materials for Wardway Homes "Not Ready-Cut"—that is, without the special features explained above. The lumber as specified is furnished in standard mill-run lengths which must be cut to fit by the carpenter. Door and window frames, linen cases, kitchen cases and stair work are shipped cut-to-fit, ready to be set up. While the saving you make in purchasing a Wardway Home "Not Ready-Cut" is considerable, the maximum savings are of course secured only when you purchase a Wardway *Ready-Cut* Home.



(A) Posts, girders and bolsters cut-to-fit.
(B) All joists cut-to-fit.
(C) Box sill cut-to-fit.
(D) Sub-flooring all cut-to-fit.
(E) Bottom plate cut-to-fit.
(F) All studding cut-to-fit.
(G) Double top plates cut-to-fit.
(H) Framing for window openings cut-to-fit.
(I) All wall sheathing is shiplap cut-to-fit.
(J) Ceiling joists cut-to-fit.
(K) Roof sheathing cut-to-fit.
(L) Rafters cut-to-fit and notched.
(M) Second floor joists cut-to-fit, rest on plate.

Wardway Ready-Cut Construction Eliminates Waste and Saves Time and Money

This machine bevels both ends of a rafter and cuts the notch in one operation.

No Hunting for Pieces

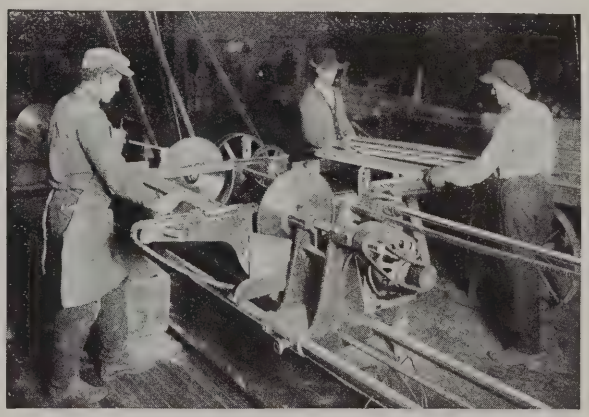
There is no confusion or hunting for pieces when building a Wardway Home. All small pieces are bundled and marked, such as framing for window and door openings, dormers, sheathing for gables, etc. All large pieces are plainly marked and all pieces which are duplicated (such as studs, joists, etc.) are marked alike and are interchangeable.

Certain materials for Wardway Homes are loaded by electrically driven trucks (in the foreground). These modern, efficient methods save you money.

When the car is ready for shipment the pieces to be used first are carefully loaded first, so that when the car is unloaded and piled they are on top. Complete instructions for piling are sent with the plans, as well as very thorough instructions covering every operation and every stage of construction, from digging the excavation to finishing the woodwork.

Carpenters Appreciate Wardway Homes

Contractors and carpenters who have built Wardway Homes are enthusiastic over them. They like to work with the fine material and they appreciate having the drudgery taken out of the job. After all, cutting up lumber with a handsaw is neither



One of the electrically driven machines which saw both ends of a board at the same time, trimming it to any desired length in a fraction of the time required by hand.

interesting nor profitable work, and carpenters find they can build three Wardway Homes while putting up two the old way; build them cheaper and still make more money themselves.

The Wardway Ready-Cut System is not only the best modern method of building, but is the only way for the man who considers cost and results. The old handsaw method is as out of date as the spinning wheel.

Trimming framing material for Wardway Homes to any length is a matter of seconds with this machine.

Read These Specifications for Wardway Homes

ALL dimension lumber throughout is of proper size for the purpose for which it is intended. The best engineering practice has been employed, and our long building experience insures that every piece of lumber in all the houses in this book is amply large to carry all loads placed upon it, and to withstand all strains and stresses.

Girders, Girder Posts and Bolsters are No. 1 Yellow Pine, cut-to-fit.

Girders, Box Sills, Wall Plates, Joists, Studding, Rafters, Blockings, Cripples, Lookouts and all Dimension Lumber are No. 1 Yellow Pine, surfaced and edged, cut-to-fit. Every piece bundled and marked wherever necessary for easy handling.

Scaffolding and Braces are furnished for two sides of the building; also roll of tar paper for covering lumber.

Bridging. A row of double 1 by 3-inch cross bridging is furnished on all joist spans 12 feet and over. Cut-to-fit.

Stair Horses for cellar, main and attic stairs and porch steps are cut-to-fit.

Sub-Flooring is furnished for the first floor of all houses and is 1 by 6-inch No. 2 Yellow Pine tongued and grooved boards, surfaced two sides, cut-to-fit.

Finish Flooring for first and second floors is 1 by 4-inch (3¼-inch face) clear flat grain Yellow Pine. This flooring is clear—no knots or defects of any kind.

Lath for all inside walls and ceilings, No. 1 soft leaf Yellow Pine, guaranteed to make a first-class job. 85 per cent of these lath are 4 feet long, 15 per cent are 32 inches long. No lath furnished for cellar or attic.

Cellar, Grade and Attic Stairs. Treads, risers and strings cut to convenient length for fitting. See Page 11 for main stairs.

Grounds, ¾ by ¾-inch Yellow Pine, furnished around all inside doors, and double course for all baseboards, as a guide for plaster.

Backing Strips, 1 by 6 and 1 by 3-inch Yellow Pine, furnished to make solid angles for plastering. Bundled and marked.

Roof Boards, 1 by 4-inch No. 2 Yellow Pine, surfaced two sides, cut-to-fit, bundled and marked and spaced about 2 inches apart. All angles for hips and valleys cut-to-fit.

Wall Sheathing, 1 by 8-inch No. 2 Yellow Pine shiplap, surfaced two sides, or 1 by 6-inch No. 2 Yellow Pine dressed and matched CUT-TO-FIT. Each section tied up in bundles, marked. Angles cut for gable sheathing.

Roof Shingles, extra clear 5 to 2 Washington Red Cedar, the best grade made. Wall shingles, where shown, are 6 to 2 Star, A Star Washington Red Cedar. All roof shingles laid 4½ inches to the weather.

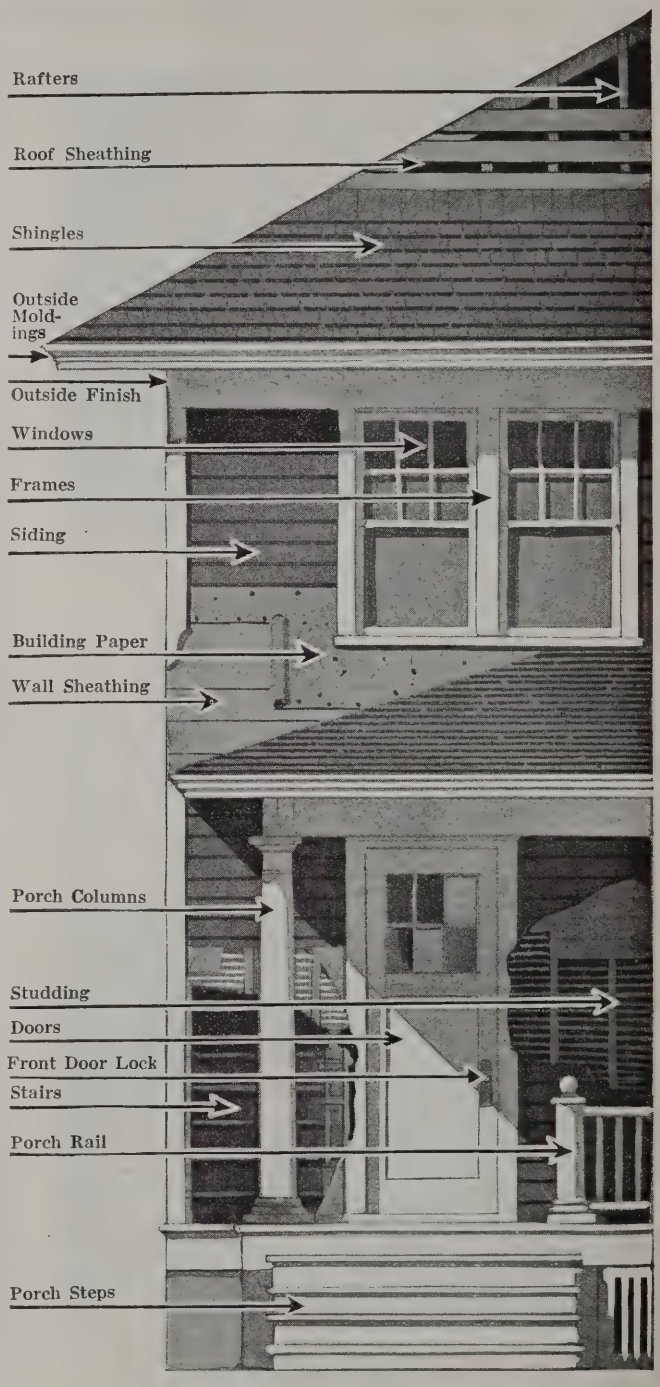
Attic Flooring, No. 2 Yellow Pine, dressed and matched, for all houses having an attic stairway. CUT-TO-FIT and marked.

Cornice Plancier, ⅝ by 3¼-inch clear Yellow Pine matched and beaded.

Where rafter ends are exposed under the cornice we furnish 1 by 4-inch clear ceiling, CUT-TO-FIT, bundled and marked.

A few of the houses with stuccoed walls also have stuccoed cornices, in which case we furnish metal lath for stucco instead of the cornice ceiling.

Outside Finish, clear grade suitable for exposure to the weather. Includes corner boards, facia, outside base, frieze, porch beams, belt, porch steps and risers, lattice frame, etc., as shown.



Siding, clear Louisiana Red Cypress or California Redwood, spaced 4½ inches to the weather, absolutely free from knots or defects. Furnished for all houses except where illustration shows shingles or stucco on outside walls.

Building Paper, red rosin sheathing paper to be used between double floors, under siding, and around all door and window frames.

All Materials Guaranteed—No Extras to Buy

Outside Moldings such as crown, bed, belt, water table and cove molding are clear White Pine or Fir, of proper size and design to correspond with each building.

Porch Columns and Rail (as shown) clear Washington Fir. Top and bottom rail with square balusters, cut to convenient lengths.

Porch Flooring, 1 by 4-inch clear edge grain Washington Fir. Full length pieces for every porch, bundled and marked.

Porch Ceilings, ⅝ by 3¼ clear Yellow Pine or Fir, matched and beaded. All full length pieces bundled and marked.

Byrkitt Patent Sheathing Lumber furnished for all outside walls of stucco houses, CUT-TO-FIT. This is the most approved method for durability and warmth in stucco houses.

Outside Frames for all windows, sash and doors CUT-TO-FIT, bundled and marked. Window jambs plowed and grooved and bored for pulleys. Pulleys furnished. Door jambs rabbeted for doors. All made of clear White Pine.

Windows and Sash are made of clear White Pine, glass set in and puttied. Double strength glass in windows larger than 24 by 28 inches. All two-light windows are check rail and made to hang on weights.

Doors—Front doors are manufactured with clear Douglas Fir panels, and White Pine stiles and rails are first quality high panel design. Interior doors are two-panel design with handsome slash grain fir panels as shown on Page 54. Rear and grade doors are glazed. All doors mortised for locks. (See illustrations on Page 54.)

Hardwood Thresholds furnished for all outside doors.

Interior Finish clear slash grain Douglas Fir, craftsman pattern in casings, base and moldings. Ends squared. Bundled and marked. Picture molding furnished for all rooms except kitchen, bath and upper halls. Chair rail furnished for bathroom. All interior finish is selected for beauty of grain and is properly machined and smoothed ready for varnish or stain.

Lattice and Trellis furnished where shown in illustration of the house.

Mantel Shelf, Dome Damper and Ash Trap are furnished when fireplace is shown on floor plan.

Main Stair in all 1½ and 2-story houses, clear slash grain Douglas Fir, bundled and marked. All tongued and grooved together, stringers housed out for treads and risers. Newels, rails and balusters furnished as shown in handsome craftsman design. All complete and machined ready to set up.

Kitchen, Pantry and Linen Cases furnished when shown on floor plan. They are clear slash grain Douglas Fir, CUT-TO-FIT, bundled and marked. Fronts are put together and shipped set up. Counter shelves are clear Hard Maple.

Hardware

Mortise Lock Sets are furnished in our bevel-edge design as illustrated on Page 54. Front door locks are solid bronze with night latch. Rear and grade door locks are solid bronze. Inside locks are plated on steel. All locks strictly first class in mechanism and furnished in antique copper finish.

Hinges—Loose pin mortise hinges of proper size are furnished for each type of door.

Sash Lifts and Sash Locks for all windows.

Cabinet and Kitchen Case Hardware includes all catches, pulls, loose pin hinges, etc., in antique copper finish.

Bathroom Hardware is all nickel plated.

Nails—Proper sizes and kinds furnished for all purposes.

Miscellaneous Hardware complete in all details, including cellar sash sets, closet coat hooks, maple base knobs, sash cord, weights, door bell plate, etc.

Tinwork

Gutters, Valleys and Flashings are furnished in heavy grade of tin, painted both sides. A special mineral paint is provided for the final coat.

Down Spouts are galvanized iron. Necessary elbows, shoes and hooks are all included.

Paints, Oil and Varnishes

Coverall Mixed Paint furnished for three coats for all outside work. Special paint is furnished for porch floors. Unless otherwise instructed, we will ship the color paint shown in plan description.

Shingle Stain is furnished for shingles on outside walls (where shown) for two brush coats. No stain for roof included.

Mirolite Interior Varnish for two coats on all interior finish. Three coats of Marproof Floor Varnish for all finished floors.

Putty, Pure Linseed Oil, Pure Turpentine included as required.

Sandpaper and Steel Wool furnished for smoothing all interior floors and finish, rubbing down varnish, etc.

White Enamel Finish for five-coat work is furnished for wainscot and woodwork in all bathrooms; one coat of hard oil, two coats white enamel, two coats of undercoating.

NOTE: Our prices include outside blinds, window boxes, etc., where shown. They do not include storm sash, screens or porch sash. These items, however, can be furnished at very low prices if wanted.

Notes

For Those Living in the Northwest

Where shipment is made from the Coast Mill (see Page 7), Fir lumber is furnished instead of Yellow Pine for framing, sheathing, flooring and outside finish.

Not Ready-Cut

If you order your home Not Ready-Cut, lumber marked "Cut-to-Fit" will be furnished uncut in standard mill-run lengths to be cut and fitted by the carpenters on the job. All window and door frames, kitchen cases and linen cases will, however, be shipped cut-to-fit on ***all*** houses, no matter how ordered.

Reversed Plans

Any plan in this book may be reversed if you so desire.

Ceiling Heights

The standard height ceiling in Wardway Homes is nine feet for the first floor, eight feet for the second.

A few homes have ceiling heights which vary from the standards quoted. Wherever this is the case, such variation is mentioned specifically in the description of the home.

Changes in Construction

Climatic conditions sometimes make additions to or omissions from our stock specifications advisable. For Southern climates you may want to omit the cellar and use shiplap in place of lath and plaster. On the other hand, those living in the extreme North may want back-plaster. Such changes can easily be made. Write us to learn how much they will add to or subtract from the price.

Masonry

Plans give full details and instructions for excavating and laying foundations, but materials for foundations, stucco and brickwork are not included with our homes. We do not furnish cement, lime, brick, sand or plaster. Complete lists and quantities of all you will require will be furnished on request.

Plans

One complete set of blue prints furnished for each home. If required, extra sets can be supplied.

Features of Wardway Construction That Save You Money

THERE are many features of construction found in Wardway Homes, both ready-cut and not ready-cut, which are not generally found elsewhere and which mean big savings and better construction. Standardizing the mill work used means that many things are done by machinery which are usually left to the carpenter on the job and are irksome, time-wasting tasks which make a huge difference in the cost of building when added all together. A few of these features are:

(1) All inside finish is thoroughly machined and smoothed. This to a large extent does away with the need for laborious hand smoothing of woodwork by the carpenter and assures that even, satiny finish which distinguishes Wardway Homes.

(2) All doors are mortised for locks. It takes but an instant on the wonderful chain mortiser and the door is ready for the lock to be slipped in and the screws driven. When the carpenter has to do this work with brace and bit, chisel and hammer, it takes a good man half an hour to do one door.

(3) All frames are shipped bundled; all cuts, rabbets, and bevels made, pulleys fitted into place and pulley pockets cut. No tool but a hammer is needed to set these frames up. It takes but ten minutes to do it, and their accuracy of manufacture insures perfect fitting windows and doors.

(4) All stair material is cut-to-fit—treads, risers, balusters and rails all ready to set up, smoothed and sanded. The rise and run of the steps is housed out on the stair stringer so all your carpenter need do is fit the parts in place and nail them together. Under the old method this work frequently took days to complete.

(5) All case fronts for kitchen and linen cases are set up at the factory. All other parts of cases are cut-to-fit, bundled and marked. All hardware such as hinges, drawer pulls, latches, etc., is furnished complete. Your carpenter has merely to set them up, nail them in place and fit the hardware. All exposed parts are machined and sanded.

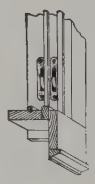
(6) Not the least important feature in the construction of a Wardway Home is the thorough and complete set of plans and instructions which goes with the material. These plans show every piece of material which enters into a house. They are by far the most complete plans furnished by anyone and are at the same time the simplest. Every case is detailed completely and every bit of construction is shown clearly. This applies not only to all carpenter work but also to masonry, plastering, painting and other things. A complete set of instructions also goes with these plans, telling in simple, easily understood terms just how to go about each step in the process. It is so simple and so thorough that many of our customers with little experience have been able to build their own homes without any difficulty. Your carpenter will find all his questions answered before they arise, and you yourself can follow the building and know just what is going on and whether or not it is right all the way through. Many of our customers assure us that this feature of Wardway plans and instructions alone was worth hundreds of dollars to them when building.

Remember, the material for Wardway Homes consists not only of lumber and millwork such as is usually furnished by the lumber yard, but hardware, including mortise lock sets, hinges, sash lifts and locks, nickel plated bathroom hardware, cellar sash sets, closet coat hooks, sash weights and door bell; all tinwork, including gutters, valleys, flashings and downspouts, all paints, oils and varnishes for three coats on all outside work, spar varnish for porch ceilings, finest Mirolite interior varnish for two coats on all interior finish, three coats of Marproof floor varnish for all finished floors, putty, linseed oil, turpentine, white enamel for four-coat work, for wainscot and all woodwork in bathrooms; mantel shelf, dome damper, and ash trap for fireplaces where shown, and kitchen cases and linen cases, where shown on the plan. Those things usually are "extras" to the bill. Remember, too, that all material for Wardway Homes is absolutely the finest grade and quality to be obtained. Montgomery Ward's huge resources and quantity buying secure this advantage for you at a cost which means proven savings on better homes.

Doors Drilled for Locks

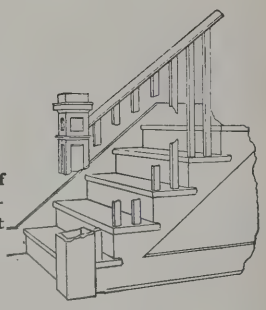
Saves at least one-half hour's work on each door.

Frames All Cut, Rabbeted, Pulleys in Place and Pockets Cut



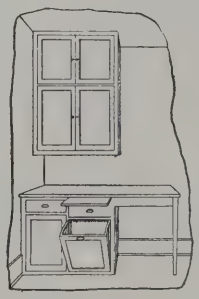
Guarantees perfect fitting windows—and saves hours of carpenter's time.

Stair Material Cut-to-Fit—Ready to Install



A great saving of labor, and a guarantee of perfect stair work.

Case Fronts Set Up at Factory



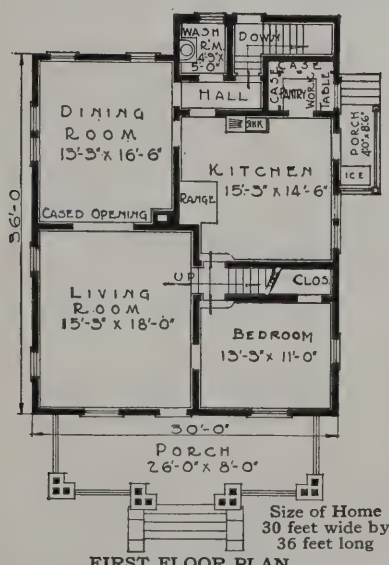
The frames for all case fronts come ready to set up — mortise and tenon joints all glued. Other parts cut and ready to fit in place. Means at least a day saved for two men.

Blue Prints and Instructions

The simplest and most complete building guides are furnished with Wardway Homes.

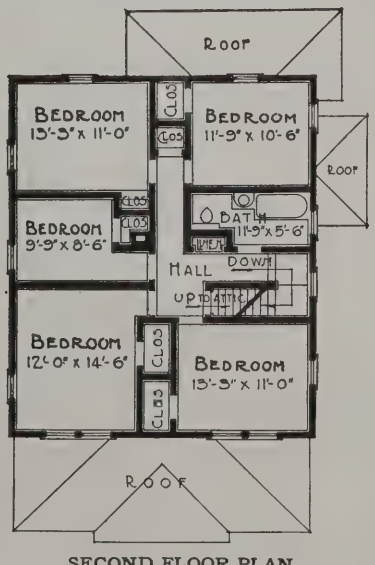
"The Warrenton"—Material Supplied Either Ready-Cut or Not Ready-Cut

A Splendid Home with Six Bedrooms



Size of Home
30 feet wide by
36 feet long

FIRST FLOOR PLAN



SECOND FLOOR PLAN

THIS dignified and handsome residence is planned for a big family. It is perhaps the best suited to the farm, yet makes an admirable city or suburban residence, also. The big porch, the massive dormers, the broad eaves and twin divided-light windows give it distinctive lines and take away any possibility of plainness.

The rooms downstairs are large. The living room is planned for a big family and the dining room will seat a large number without crowding. The stairways are so arranged that they lead directly from living room, kitchen and bedroom, an unusually convenient feature. The downstairs bedroom with its big closet is very convenient. It may be used as a library or den if preferred.

The kitchen, too, is a big room. The adjoining pantry has special cases and worktable built in. There is a door direct from the kitchen to the outside porch, where space is provided for the ice box. A door in the rear of the kitchen leads to the hall and down the steps to the grade landing. Doors from this hall also lead to the washroom and dining room. This makes it possible for the men folks on the farm to enter the washroom, clean up and pass directly into the dining room without disturbing the kitchen at all. Many windows furnish an abundance of light and ventilation.

Upstairs there are five big bedrooms, four of them having cross ventilation. Each has its own big closet and each opens directly into the hall. Also a fine linen closet such as is illustrated on Page 52. The bathroom is large and light. Steps from the upstairs hall lead to the attic, which covers the entire house. Attic space may be partitioned off into extra rooms if desired.

Although this house is unusually large and roomy, still the ground covered is not excessive. This is due to good planning and the fact that no space is wasted.

Unless you request otherwise we furnish for this home, cream paint for the sidewalls and white for the trim.

See Page 4 for cost of heating equipment, plumbing, electric wiring, storm sash, screens, and your option of Radio Asphalt Shingles and oak flooring and finish. Write us for suggestions and estimates on a water supply system and sewage disposal for this home.

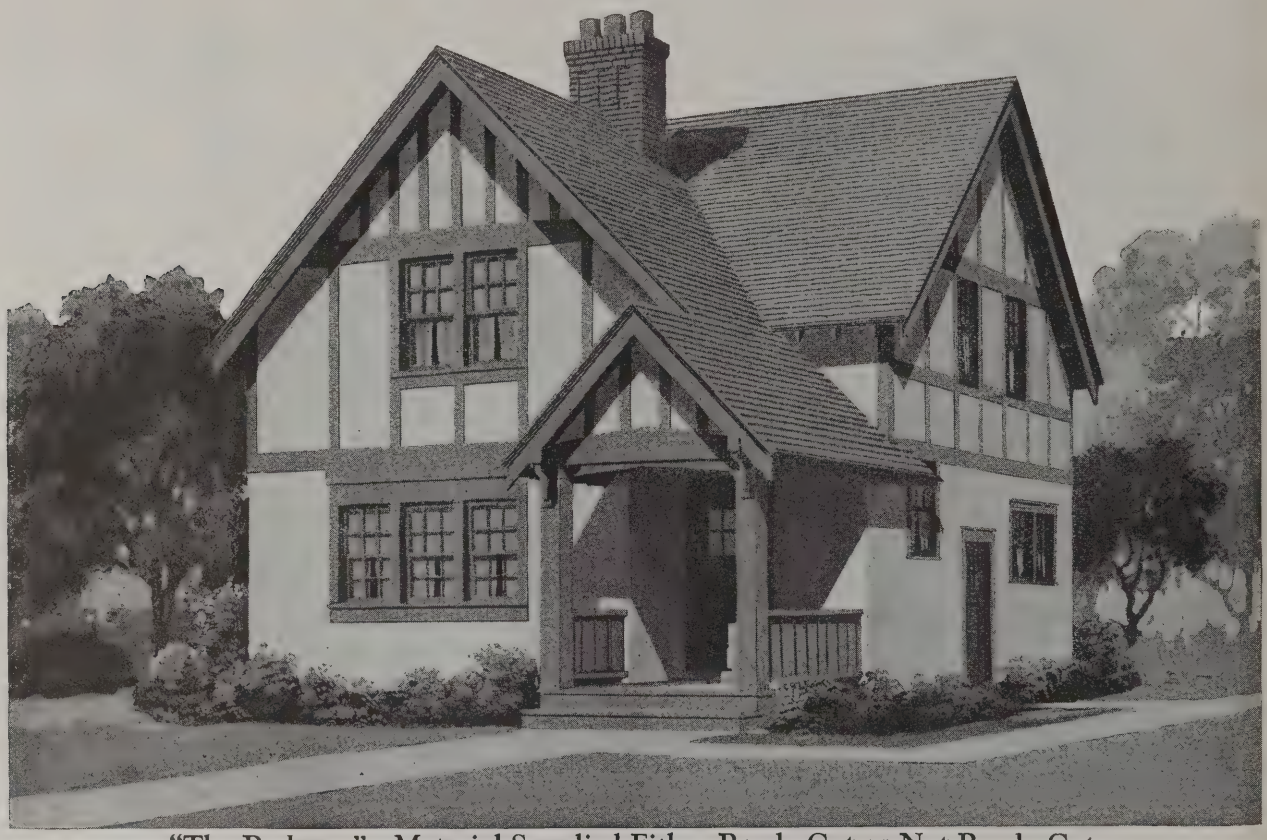
Specifications on Pages 10 and 11



"The Parkway"—Material Supplied Either Ready-Cut or Not Ready-Cut

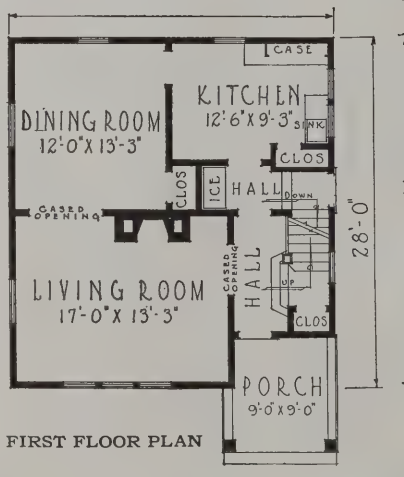
One of Our Most Beautiful English Designs

THE PARKWAY is an interesting example of beautiful English architecture. It suggests quiet and rest, and is a home that appeals to the most discriminating home builder. The outside finish is stucco with sufficient half-timbering to break up side walls and prevent any suggestion of plainness. This type of home is rapidly increasing in favor, and no matter where "The Parkway" is constructed it is certain to please and to fit in perfectly with the surroundings.

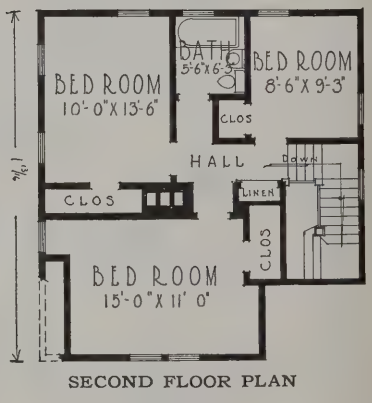
The quaint porch with its sturdy roof brackets and panelled gable end seems to radiate hospitality and invites you to the pleasant home within. On entering we find a spacious hall from which an attractively designed stair leads to the sleeping rooms above. A closet on the stair landing provides a place for clothes and outside wraps.

From the hall you enter the living room through a wide cased opening. This is an exceptionally light, pleasant room with a triple window on one side and a single window on the other. A fireplace has been provided, making this a real living room indeed.

The dining room is located directly back of the living room and this, too, is a pleasant, well lighted room. Notice the handy closet for linens and dishes. A swinging door connects the dining room with the kitchen, a room which we know, will delight the lady of the house. The sink has been located beneath the Mullion window, making a light, pleasant place in which to do the kitchen work. Our fine kitchen case No. 863, as shown on Page 53 of this catalogue, provides abundant storage space for food, dishes and kitchen utensils. A small closet is provided also for brooms, mops, carpet sweeper, ironing board, and similar household necessities.



FIRST FLOOR PLAN



SECOND FLOOR PLAN

Size of Home
26 Feet Wide by 28 Feet Long

See Prices on Pages 1 to 4
Specifications on Pages 10 and 11

On the second floor of the home you will find three fine bedrooms and bath. Each bedroom has an exceptionally large closet and plenty of windows, affording ample light and ventilation. One of our fine built-in linen closets shown on Page 52 of the catalogue, has been placed in the upper hall providing convenient storage space for linens, blankets and other household necessities.

"The Parkway" embodies all of the necessary conveniences of a well-built home. It is modern in every respect. We know you will never have cause for regret should you decide to build it for your home.

Unless you request otherwise we furnish for this home dark brown paint for the trim. Sidewalls are stucco.

See page 4 for cost of heating equipment, plumbing, etc., and your option of Radio Asphalt Shingles and oak flooring and finish.

"The Rochelle"—Material Supplied Either Ready-Cut or Not Ready-Cut

Every Desirable Feature in This Colonial Home

TO RETAIN the true Colonial style in the small home has always been a problem to test the designer's utmost skill. You will agree that our architects have succeeded admirably in "The Rochelle."

The exterior has all the charm and simplicity of the genuine Colonial home, which enjoys such a well deserved popularity. Built low to the ground, the Rochelle has a particularly inviting appearance with its hooded entrance, shuttered windows and shingled walls.

Inside is the most complete and compact arrangement of six rooms which we have ever seen. It is hard to believe six rooms of such fine size, together with as desirable features as vestibule, reception hall, coat closet, broom closet, linen closet and fireplace, can be contained in such small dimensions as 24 by 28 feet.

One enters this home through the vestibule—a very desirable feature usually found only in much larger homes. The coat closet to the right is roomy enough for all the family's wraps. A cased opening connecting the hall and living room makes the two rooms practically one. The living room is of fine proportions and is made particularly attractive by the open fireplace and the French doors leading to the porch. A cased opening connects living room and dining room. This latter is excellently planned and contains proper wall space for all the usual dining room furniture.

The kitchen is compactly arranged—a very convenient work place. Our case No. 861, as shown on Page 53, providing all the necessary room for kitchen supplies and utensils, is built right into the wall. Alongside it is the sink, and just a step away the range. The broom closet is an especially convenient feature, providing room for brooms and vacuum sweeper as well as dust cloths, aprons and such necessities, in a handy yet out-of-the-way place. A door leads from the kitchen to the front hall, giving easy access to the front door and to the upstairs without going through the rest of the house. A double rear door protects the kitchen from the outdoors, gives handy yet secluded space for the ice box, and provides an entrance to the cellar.

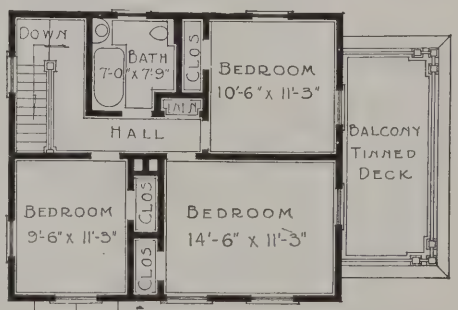
Upstairs are three splendid bedrooms, each having cross ventilation and its own big closet. There is a linen closet opening into the hall, and a large bathroom.

While this is a very economical home to build and to heat, it is as roomy as many houses half-again as large and as convenient and easily managed as the average four-room bungalow.

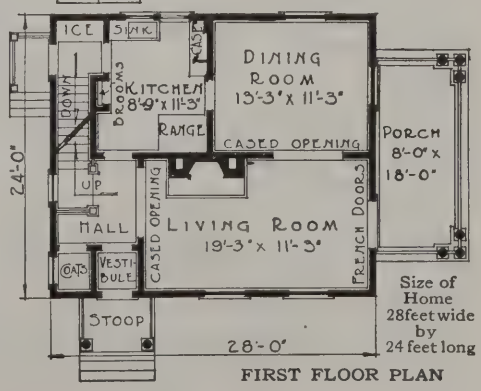
See Prices on Pages 1 to 4
Specifications on Pages 10 and 11

Unless you request otherwise we furnish for this home, silver grey stain for sidewall shingles, white paint for trim and green for blinds.

See Page 4 for cost of heating equipment, plumbing, electric wiring, storm sash, screens and your option of Radio Asphalt Shingles and oak flooring and finish. Write us for suggestions and estimates on a water supply system and sewage disposal for this home.



SECOND FLOOR PLAN



Size of Home 28 feet wide by 24 feet long

FIRST FLOOR PLAN

"The Carlyle"—Material Supplied Either Ready-Cut or Not Ready-Cut

A Charming Three-Bedroom Bungalow

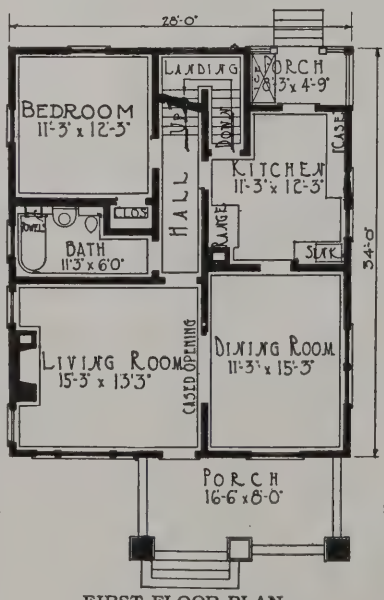
IT IS hard to believe that all the space shown on the floor plan can be packed into this charming little home, yet when you enter the completed home you will realize it has been done. The exterior is all that good taste and good architecture can desire. Especially attractive is the porch with its heavy timbered construction and massive brackets. This "craftsman" note is carefully carried out in the open rafter ends of the cornice. The outside walls of the home are stuccoed. The porch rail is cement.

Notice the fireplace flanked by two high windows which form the end wall in the living room. This charming feature is always appreciated. The dining room is of splendid size and proportion and is a fine, light room. The hall leading from the living room gives access to the kitchen, to the bathroom and downstairs bedroom as well as to those upstairs. Notice that in the bathroom a towel case is provided over the tub. (See Page 52 for picture of towel case.) This is a convenience you will appreciate.

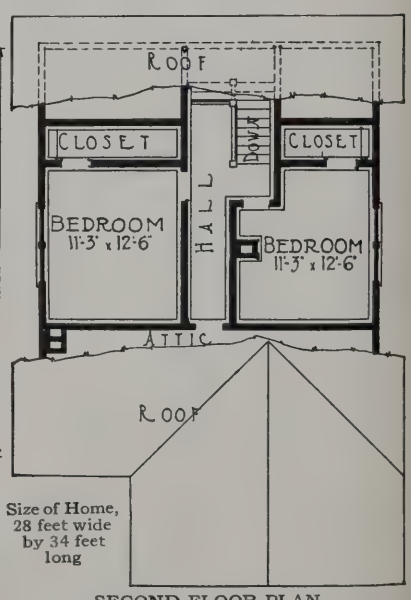
The kitchen case is design No. 862, shown on Page 53, and has a worktable in connection. The twin windows over both sink and workcase flood the kitchen with light. The cellar steps leading down from the kitchen are a very convenient feature. The inset porch to which the rear door leads furnishes room for the ice box in a cool, accessible place where the icing will not disturb or muss up the kitchen.

Upstairs is a big attic as well as two splendid bedrooms with large closets. The ceilings of these bedrooms are eight feet high, but of course slope off a bit at the sidewalls, where they measure six feet six inches high. Absolutely every foot of these rooms is actual, usable living space.

See Prices on Pages 1 to 4
Specifications on Pages 10 and 11



FIRST FLOOR PLAN



Size of Home, 28 feet wide by 34 feet long

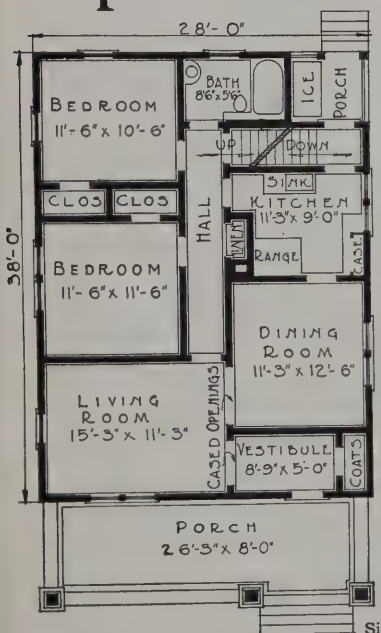
SECOND FLOOR PLAN

Unless you request otherwise, we furnish White paint for the trim of "The Carlyle."

See Page 4 for cost of heating equipment, plumbing, etc., and your option of Radio Asphalt Shingles and oak flooring and finish. Write us for suggestions and estimates on a water supply system and sewage disposal for this home.

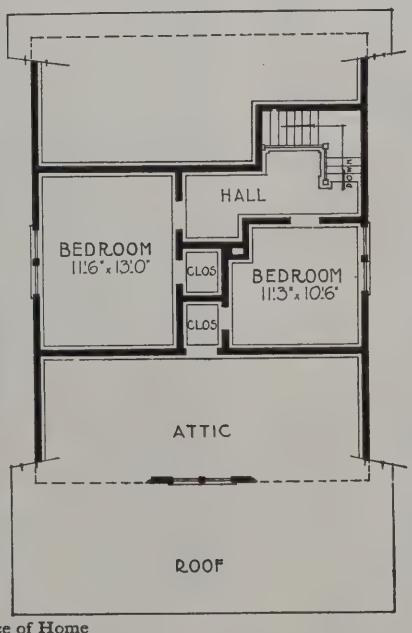
"The Danbury"—Material Furnished Ready-Cut or Not Ready-Cut

Popular as a Two or Four-Bedroom Bungalow



FIRST FLOOR PLAN—A & B

Size of Home
28 ft. wide by
38 ft. long



SECOND FLOOR PLAN—B only

See Prices on Pages 1 to 4—Specifications on Pages 10 and 11

Unless you request otherwise we furnish for this home, cream paint for body, white for trim and light green stain for sidewall shingles.

THE DANBURY may be had in two arrangements. Plan A calls for the entire second floor being used as an attic, floored, without partitions. Plan B has exactly the same downstairs as Plan A, but the upstairs is finished as shown in the floor plan.

One of the chief reasons for the great popularity of this bungalow is the handsome, clean-cut appearance of the exterior. The main roof of the house is continued out over the porch and is always an attractive feature, and when it is supported by massive porch columns and wide cornices upheld by handsome timber brackets, it is particularly appealing.

The lower half of the walls are sided with clear cypress siding, and above the belt course clear red cedar shingles are used. The handsome dormer, one of the most distinctive features of "The Danbury," is also shingled.

The front door opens into a large vestibule. A cased opening leads into the living room and another cased opening from the living room to the dining room. The long hall which opens by a door into the living room, separates the two bedrooms from the rest of the house and serves as a passageway connecting them with the bathroom and with the kitchen. The stairs go up from this hall. There is also a linen closet provided, opening from the hall.

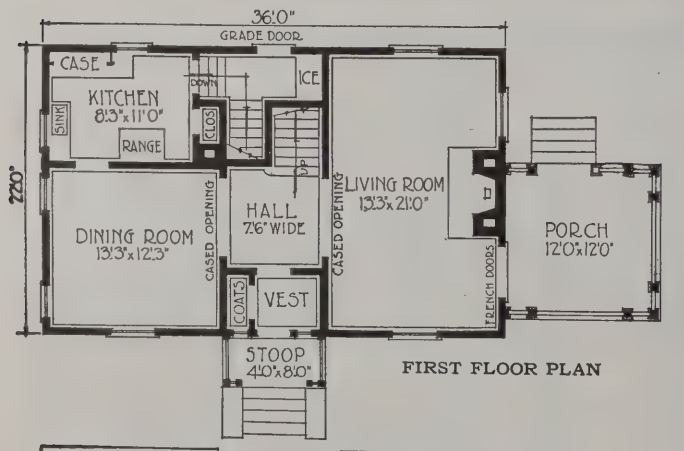
It is hard to imagine a more convenient bungalow floor plan than this, especially since it affords the much desired privacy so often lacking in a bungalow, for each of the rooms is separate, making it unnecessary to go through any one to reach another.

The kitchen is exceptionally well planned and well lighted by the big twin window. It is provided with our case design No. 861, shown on Page 53, which includes drawers, bins, cupboards and shelves for all kitchen supplies and utensils. A double door leads to the back porch, where room is provided for the ice box. Steps lead down into the cellar from the passageway between the rear door and kitchen door.

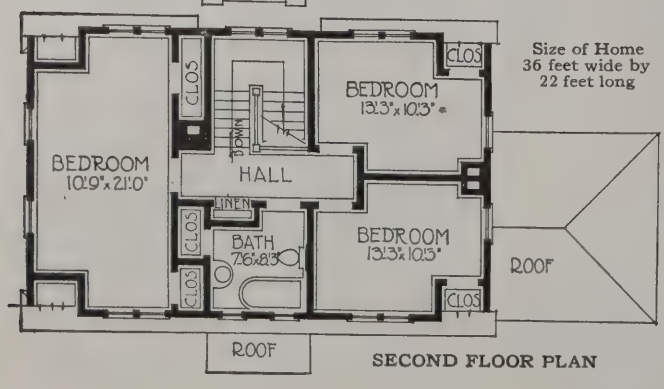
If more bedrooms are desired, Plan B provides for two more finished-off bedrooms upstairs. These are both good size rooms. Each has a fine closet, well ventilated and comfortable.

"The Danbury" is an economical house to build, and owing to its many desirable features finds a ready sale at a topnotch price when built as an investment.

"The Lexington"—Material Supplied Either Ready-Cut or Not Ready-Cut



FIRST FLOOR PLAN



SECOND FLOOR PLAN

Size of Home
36 feet wide by
22 feet long

A Charming Dutch Colonial House

HOW often we have admired the dignified simplicity and the generous hospitality in every line of the homes of long ago. "The Lexington" with its true Dutch Colonial gambrel roof, shingled walls, shuttered windows and latticed porch retains all the beauty of the early home with necessary modern conveniences added. The flower boxes, trellised entrance and porch are touches which radiate the cheer and comfort within.

Entering, you pass through a vestibule—which has a large coat closet—into a hall. Before you is a beautiful open stairway; to the right the splendid fireplace on the opposite side of the living room greets your eye. Entering the living room you are immediately impressed by its size and the beauty of the French doors leading to the porch. Three other large Colonial windows give an abundance of light and air. The position of the porch at the side gives a greater degree of privacy than one otherwise located.

The dining room is commodious, well lighted and cheery. It offers an excellent location for a buffet along the sidewall between the two windows.

The kitchen is compact and most conveniently arranged, and includes our special built-in kitchen case No. 863 as well as a built-in broom closet. The combined rear and grade entrance door is down three steps in an entry in which the refrigerator may be handily reached from the kitchen or iced from outside.

Upstairs are three bedrooms, a bath and a hallway that is well lighted by a twin window in the rear dormer. The largest bedroom has two closets, while each of the other rooms and the bath have one—an abundance of closet room, as you see. One of our deep-shelved linen cases is placed in the hall just outside the bathroom door, convenient to all bedrooms.

A feature of this house is that the long walls are at the front and rear—absolute assurance that your neighbors cannot build close enough to darken your rooms.

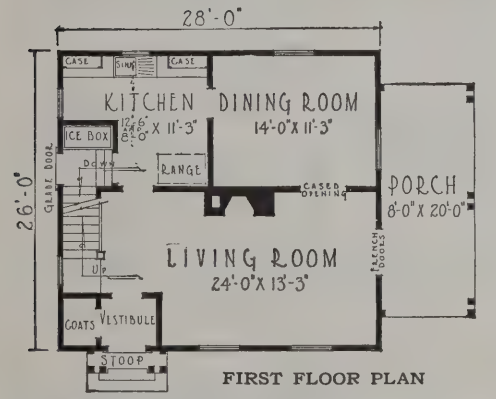
A basement under this house will give ample room for furnace, fruit cellar and laundry if desired. We furnish all windows to give proper light and ventilation. We also furnish mantel shelf, ash trap and dome damper for fireplace.

"The Lexington" is most skilfully designed, yet through our quantity production and direct sales methods is offered at a most reasonable price.

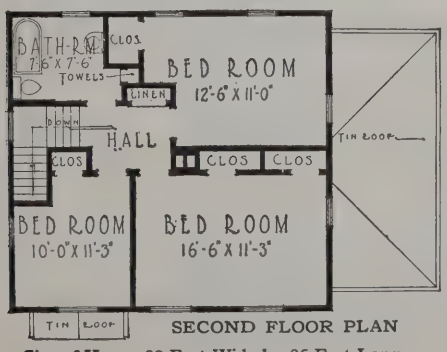
See Prices on Pages 1 to 4
Specifications on Pages 10 and 11

Unless you request otherwise we furnish for this home silver gray shingle stain for the wall shingles, white paint for trim and green for the blinds. No stain furnished for roof shingles.

"The Beverly"—Material Supplied Either Ready-Cut or Not Ready-Cut



FIRST FLOOR PLAN



SECOND FLOOR PLAN

Size of Home, 28 Feet Wide by 26 Feet Long

A Stately Colonial Home Splendidly Arranged

THIS home with its picturesque appearance will make a strong appeal to those who favor Colonial style of architecture. Everything about the home seems to blend in harmoniously, due to the care and thought used in its designing.

The exterior stucco walls may be made particularly attractive by the use of clinging vines as shown. Notice the well-balanced manner in which the windows have been arranged and their especially designed crescent shutters, also the quaint entrance with its tall narrow columns, the brick floor and steps and the old fashioned wood panelled door, all of which are in harmony in this stately Colonial home.

The large open porch, extending for 20 feet along the right end of the home sets close to the ground and provides a most inviting and delightful place to spend a hot summer afternoon or evening.

On entering the home you will find the interior equally as attractive as the exterior. A vestibule and clothes closet for outside wraps are features not found in many homes, but these have not been overlooked in "The Beverly." The spacious living room is well lighted by two large windows and the glazed French doors which lead out on to the open porch. The fireplace and the attractive open stairway, also add greatly to the charm of this homy living room.

The dining room is a pleasant, well lighted room and is connected with the living room by a wide cased opening. There is ample wall space for placing all dining room furniture without the slightest crowding. The kitchen with its efficient arrangement of built-in cases, stove, sink and ice box, will appeal especially to the housewife who knows how many steps are saved and how much easier it is to do housework in a well arranged kitchen. The two built-in cabinets No. 861 furnished with this home you will find pictured on Page 53 of this catalogue.

On the second floor are three fine large bedrooms and bath. All bedrooms have cross ventilation provided by windows in opposite walls, and an abundance of closet space. Our fine built-in linen case, shown on Page 52 of this catalogue, has been placed opening on the hall and provides ample storage space for linens, blankets and similar household equipment.

We are sure this home must appeal to you from the standpoint of arrangement, appearance and economy of construction. You cannot do better than decide in its favor.

See Prices on Pages 1 to 4
Specifications on Pages 10 and 11

Unless you request otherwise, we furnish for this home, white paint for the trim. The walls are stucco.

"The Harvard"—Material Supplied Either Ready-Cut or Not Ready-Cut

A Colonial House of Unusual Distinction

THE inviting hooded entrance, the shuttered Colonial windows, the shingled walls and the quaint gambrel roof reflect a warm hospitality within this home. It has the distinguishing characteristics of the old Dutch Colonial home with additions which make it thoroughly modern and afford maximum comfort to the owner.

"The Harvard" offers much to those who want a home a bit different from the usual, with absolute assurance of lasting satisfaction and salability, correct proportion and design and complete absence of the bizarre and grotesque.

A vestibule which keeps out the cold in winter and serves as a handy place for wraps is found just inside the handsome front door. The hall beyond opens into a large living room which runs the length of the house. It is well lighted and has a cheery fireplace almost opposite the door.

Across the hall is the dining room, separated from the porch by a pair of beautiful French doors. You surely will enjoy the meals served on this pleasant open porch during the summer months.

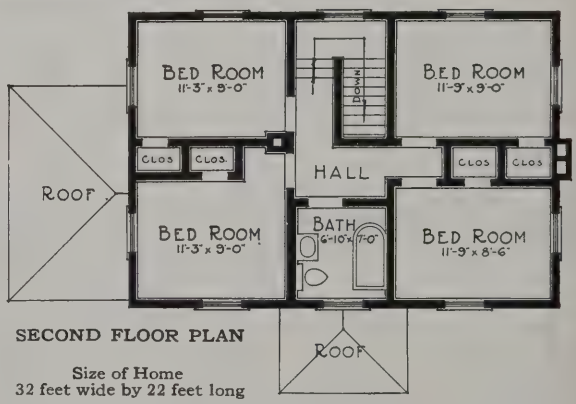
From the dining room you enter the kitchen through a swinging door. Here you will find the arrangement of doors and windows affords excellent location for range, sink and kitchen cabinet. A handy closet also is provided. The cellar stairs and the rear door are near, yet sufficiently removed from the principal working area as to prevent confusion by their use.

Each of the four bedrooms upstairs has two windows in adjoining walls and an individual closet. Entrance to the bath is from a central hall from which any bedroom is reached directly.

From any standpoint—appearance, arrangement or price—"The Harvard" offers a big opportunity to the discriminating home buyer.

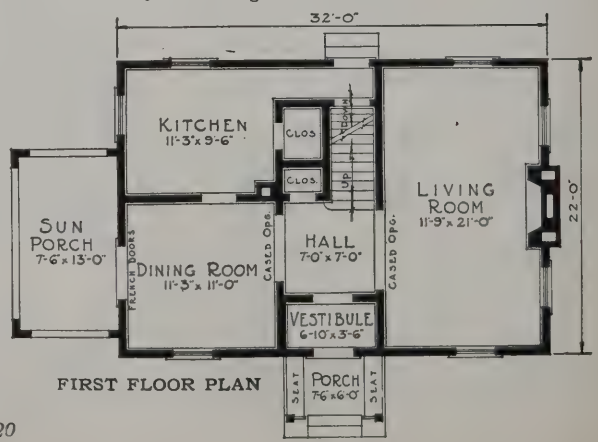
See Prices on Pages 1 to 4
Specifications on Pages 10 and 11

Unless you request otherwise we furnish for this home, silver gray stain for sidewall shingles, white for the trim and dark green for the blinds.



SECOND FLOOR PLAN

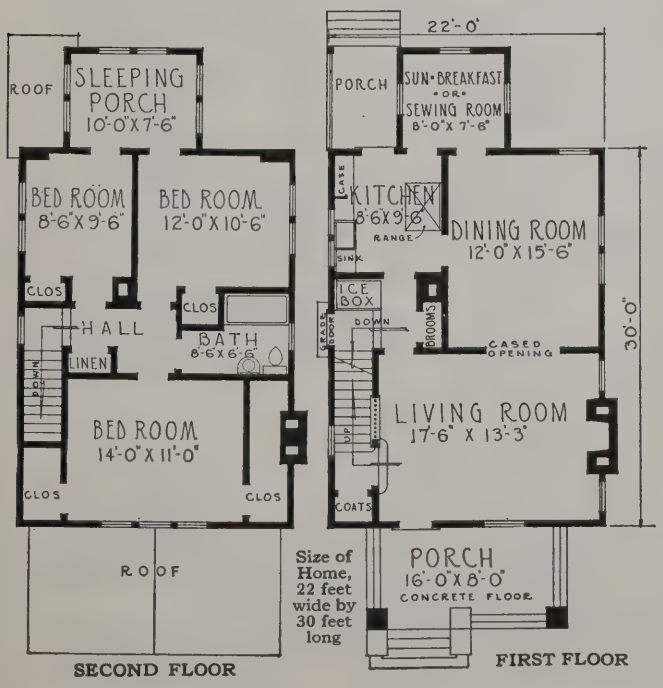
Size of Home
32 feet wide by 22 feet long



FIRST FLOOR PLAN

"The Suburban"—Material Supplied Either Ready-Cut or Not Ready-Cut

A Pleasant Home in English Style



Size of Home, 22 feet wide by 30 feet long

OUR "Suburban" design offers the discriminating builder an unusual opportunity to secure a typical English design home at a comparatively small cost. As the width is only 22 feet it may be built on narrow city lots as well as in the suburban or rural districts.

The exterior appearance is unusually attractive, due in large measure to the timbered gables and the unique, yet harmonious, treatment of roof lines. The sidewalls are stucco, which can be applied smooth or in the pebble-dash finish as preferred.

A well planned interior is essential in any home and our "Suburban" has been designed to provide maximum comfort. A large well lighted living room with cozy fireplace, roomy dining room, conveniently arranged kitchen and breakfast room occupy the first floor. A handy closet for wraps and another for brooms and kitchen equipment is provided. The sunny breakfast room is one of the features of this cozy home.

Upstairs an exceptional large bedroom extends across the entire front of the house behind which are connecting hall and bath. Two light airy bedrooms at the back have entrances to the sleeping porch —a popular feature with modern home planners. An abundance of closet room is provided as well as one of our handy built in linen cases.

"The Suburban" is a design which can be built very economically, and represents one of the best home values shown in our catalogue.

See Prices on Pages 1 to 4
Specifications on Pages 10 and 11

Unless you request otherwise, we furnish for this home, dark brown stain for trim. Sidewalls are stucco.

"The Vincennes"—Material Supplied Either Ready-Cut or Not Ready-Cut

This Handsome Bungalow Has Four Bedrooms

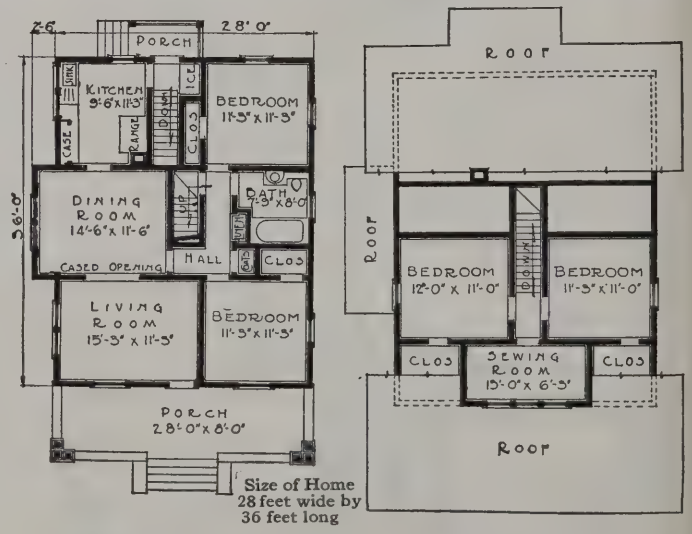
THIS splendid home follows the true bungalow style, but has as much room as a story-and-a-half house. The outside walls are sided up to the belt course, the gables and dormer being shingled. The most striking feature is the broad porch beam supported by cluster columns. This, together with the wide-open cornice supported by brackets and the sided walls extending clear to the grade line, is typical of genuine bungalow design.

Our "Vincennes" home is one of the most popular, because it combines unusually generous living space with a handsome exterior at a very low cost.

Living room, dining room, kitchen, two bedrooms, bath, hallway, coat closet and linen closet are downstairs. Upstairs are two big bedrooms and a fine light sewing room. Though not spacious in appearance, in living space this is truly a large home. See the fine size of the rooms and the numerous convenient features. Each bedroom has its own big closet. The central hall connecting the bedrooms and bathroom gives space for the stairs and for the linen closet and coat closet. Privacy, so difficult of achievement in the bungalow plan, is amply assured here. While there is an abundance of windows, still there is splendid wall space for furniture in each room. You will find the fine linen closet illustrated on Page 52, and the kitchen case, design No. 863, on Page 53.

The cellar steps lead down inside the house with an entrance into the kitchen and onto the porch. The little inset containing just room enough for the ice box is a great convenience and shows the forethought of the architect. While the ice box is handy, it is in a cool, out-of-the-way place and the ice man does not have to go in and dirty up the kitchen to ice it. The basement is excavated under the entire house. We furnish six sash, which insures its being well lighted and ventilated.

See Prices on Pages 1 to 4
Specifications on Pages 10 and 11



FIRST FLOOR PLAN

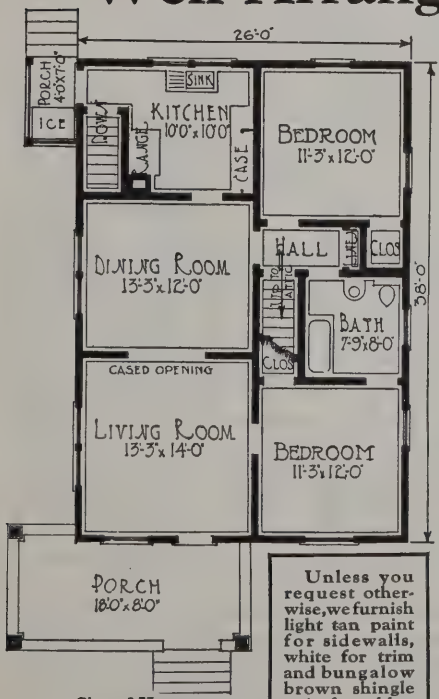
SECOND FLOOR PLAN

Unless you request otherwise we furnish for this home, cream paint for body, white for trim and bungalow brown stain for wall shingles above the belt course and dormer.

See Page 4 for cost of heating equipment, plumbing, etc., and your option of Radio Asphalt Shingles and oak flooring and finish. Write us for suggestions and estimates on a water supply system and sewage disposal for this home.

"The Laurel"—Material Furnished Either Ready-Cut or Not Ready-Cut

Well Arranged Five-Room Bungalow



Size of Home
26 feet wide by 38 feet long

Unless you request otherwise, we furnish light tan paint for sidewalls, white for trim and bungalow brown shingle stain for gables.

IN EXTERIOR appearance this home preserves the "craftsman" note so widely sought in bungalow planning. The wide porch extending beyond the house line adds much to the attractiveness of the appearance and even more to the living comfort of the home. The boxed-up rail makes it easy to screen the porch when it serves as an outdoor living room. The wide, low eaves insure plenty of shade and keep out all but the hardest of driving rains. The outside walls are covered with siding, except in the gables above the belt course, where clear red cedar shingles are used, laid alternately two and seven inches to the weather. The divided-light Plymouth windows and Oakland front door are additional touches which add to the charm of the exterior appearance.

Inside you find a most comfortable and convenient floor plan. The living room and dining room are joined by a cased opening, giving each room the advantage of the other while still preserving each as a separate room. Two windows in each room allow plenty of light and there is ample wall space for furniture.

Much thought has been spent in planning the kitchen arrangement to make it most practical and convenient. Our special case No. 863 is built right into the wall and provides room for all the kitchen supplies and utensils, as you will note in the illustration on Page 53. There is also a worktable extension on this case, with a hardwood top. The sink is placed directly under the high twin window, giving it fine light and making it a most pleasant place to work, while the range in the corner is out of the way yet convenient both to sink and case. The cellar steps lead down from the passage which leads to the rear entrance porch. Space on this porch has been provided for the refrigerator where it is handy, not in the way, and can be iced without entering the kitchen.

The hall leads from the dining room to the rear bedroom and bathroom. At the end of this hall a fine linen closet is built in, as shown on Page 52. This contains three big shelves above and drawers beneath, with all necessary drawer hardware, etc., and is a splendid addition to the home, as it furnishes room for all bedroom supplies in one place. Steps lead from this hall to the attic, which is floored over the entire house.

You enter the front bedroom from the living room. There is a door leading from this room directly into the bathroom, so that it is unnecessary to go through the rest of the house to reach this room. Each bedroom has a big closet and each has two windows in opposite walls, giving the much desired cross ventilation. This is a cool home in summer and a warm, cozy home in winter, easily heated and most comfortable under all conditions.

See Prices on Pages 1 to 4—Specifications on Pages 10 and 11

"The Leland"—Materials Furnished Either Ready-Cut or Not Ready-Cut

A Handsome Stucco Bungalow

THIS attractive design combines a bit of old English design of architecture with the latest features of modern residence construction. In offering the "Leland" to our customers, we do so with pride and with the knowledge that it represents the essence of highest architectural skill, yet a design which can be built for a very moderate sum.

One of the first features to attract the eye is the numerous windows. There are twenty-three in all, so arranged as to give an abundance of light and air, and yet mindful of space needed for furniture. Notice the attractive paneled gable over the sun parlor, with its wide projecting eaves supported by massive brackets. Also the beautiful flower boxes, materials of which are furnished with the home.

The main roof of the home is extended to cover the front porch, and the cornice projects sufficiently to insure plenty of shade during the hot summer months. The boxed porch rail also permits the porch being screened, when desired, at a minimum of cost.

Within you will find an arrangement of rooms that can not be excelled for convenience. The living room and dining room are at the front, and extend the full width of the home. A cased opening connects the two and gives the appearance of one immense living room. Handsome French doors connect the living room with the sun parlor, which has seven large windows and is indeed one of the most desirable features of this well arranged home. In the living room we have also provided for a fireplace. A cheerful fire in its open hearth will drive away the cold and dampness in the spring and fall, making it unnecessary to fire the furnace.

A central hallway provides the convenience otherwise not possible in furnishing easy access from the three bedrooms to the bath. All of the bedrooms are large, well lighted, and have plenty of closet space.

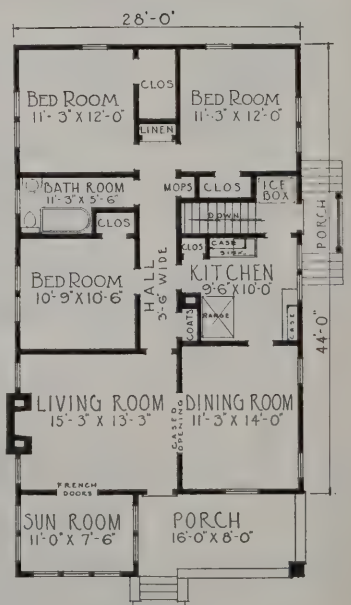
In designing the "Leland," our architects have surely considered step saving for the housekeeper. Notice the linen closet at the end of the hall. It contains large drawers and deep shelves for storing the linen, and is convenient to bedrooms, bath room and kitchen. You will find this case shown on Page 53. A small closet for storing mops, brooms, vacuum cleaners, etc., has also been provided, opening off of the hall. We also call your attention to the fine cloak closet, which is amply large to take care of the needs of an average size family.

The kitchen has been placed in the middle of this home, and is fully supplied with every convenience to make the housekeeper's time spent in this part of the home pleasant. Two large kitchen cases are provided—our No. 861 and No. 863 shown on Page 53. And in addition to these, a small closet to be used for additional kitchen equipment. Inasmuch as a large part of a woman's time is spent in this part of the home, we are sure that the many conveniences provided will be fully appreciated. Can you not imagine this home already yours, built on the lot which you have had in mind purchasing for some time? You will find just the right places to place your interior furnishings, and you can well imagine its fine interior home like appearance. No matter where you build such a home, it can not be other than a source of pride to you.

See Prices on Pages 1 to 4—Specifications on Pages 10 and 11

Unless you request otherwise, we will furnish for the "Leland," dark brown paint for trimming.

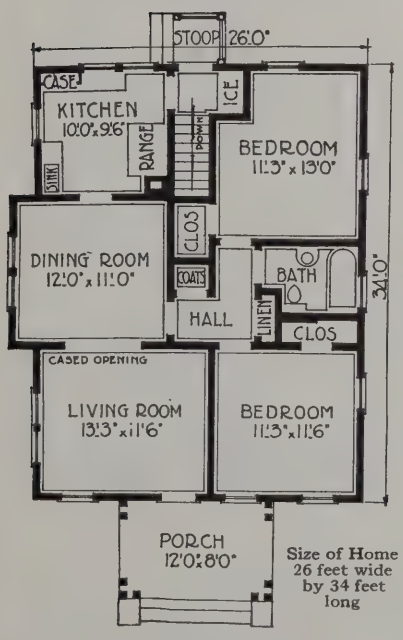
See Page 4 for cost of heating equipment, plumbing, electric wiring, storm sash, screens, and your option of Radio asphalt shingles and oak floors and trimming.



Size of Home,
28 feet wide by 44 feet long

"The Claremont"—Material Furnished Ready-Cut or Not Ready-Cut

An Unusual Design and Ideal Plan



Size of Home 26 feet wide by 34 feet long

See Prices on Pages 1 to 4
Specifications on Pages 10 and 11

THE faithfulness with which each detail carries out the motif of the design gives a most unusual but perfectly harmonious and pleasing appearance to this home. A bit different from its neighbor, this beautiful bungalow with its broad, low lines will ever express the distinctive good taste of its owner.

The battered gable ends are a unique and striking departure from the usual and are most effective. Note that the triangular area thus created is exactly the same slope as that of the roof over the dining room projection just below it—a small point, but most significant of the care and skill of the designer.

The exterior beauty is further enhanced by the belt course extending around the house, which also serves as a head casing for all outside frames. Painted white, as shown in the illustration, it is thrown into bold relief against the shingled sidewalls, adding to the interesting appearance of the whole.

The appeal this home makes to discriminating folk is only partially due to the most attractive exterior. The floor plan, too, is a most practical one. The rooms are of good size and have windows in each outside wall to admit plenty of air and sunshine. Ready access to any room without going through another is afforded by a small central hall which sets off the bedrooms and bath from the rest of the house, and provides a most desired privacy.

You will appreciate the wealth of closet space in this home. Each bedroom is provided with a spacious closet, while a handy closet for coats and wraps is found in the hall just outside the dining room door. Nearer the bath and bedroom in the same hall we have found space for one of our roomy linen closets.

Plenty of light in the kitchen is a necessity. Here we find a twin window right over the worktable of our large **No. 862** kitchen case, and a second window near the sink. Nothing interferes with the passage to and from the dining room. The cellar stairs are close at hand; truly a most remarkable arrangement for the kitchen of a small home.

An entry between the kitchen and rear outside door serves admirably as a location for the ice box, and also permits entrance to the cellar without passing through the kitchen. This entry keeps the cold air out of the kitchen on wintry days, and provides a cool place for the refrigerator without danger of freezing the food.

To preserve the low bungalow effect the cellar sash has been placed partly below grade, while the front porch is but three steps high.

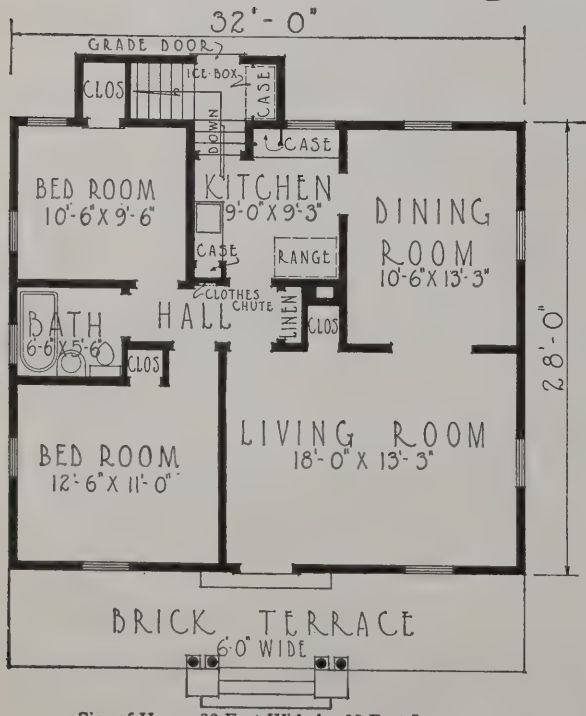
This home is not expensive—it has, in fact, many commendable points seldom found in homes costing considerably more. From any point of view "The Claremont" is one of our most attractive bungalows.

Unless you request otherwise we furnish for this home, dark green shingle stain for the wall shingles and white paint for the trim.

See Page 4 for cost of heating equipment, plumbing, electric wiring, storm sash, screens, and your option of Radio Asphalt Shingles and oak flooring and finish. Write us for suggestions and estimates on a water supply system and sewage disposal for this home.

"The Priscilla"—Material Supplied Either Ready-Cut or Not Ready-Cut

Colonial Bungalow of Fine Proportion



Size of Home, 32 Feet Wide by 28 Feet Long

THE PRISCILLA should appeal especially to those who favor the Colonial style of architecture. The lines of this home have been worked out in a pleasing manner—everything combines to make it a true Colonial type.

The hooded entrance is of distinctive design and not only affords shelter for the front door, but also serves to break the otherwise plain roof lines of the home. Note the Colonial style front entrance door, and the especially designed shutters which harmonize so well with this type of home. In designing this home, our architects have not resorted to lavish use of ornaments to make it attractive, the beauty being attained by the use of good lines and proper proportions in its designing.

On entering the home from the brick terrace which extends the full width of the building, you find a spacious living room, well lighted and suitably arranged for placing of the living room furniture. A closet has been provided opening on to this room which provides a suitable place in which to hang outside wraps.

A wide-cased opening connects the living room with the dining room. This also is a bright and pleasant room with windows on the side and rear walls. A swinging door leads to the kitchen. The layout of this room, from a standpoint of efficiency, could hardly be improved upon. A fine kitchen case is placed along the rear wall and provides a convenient storage space for dishes and kitchen utensils. Suitable locations are provided also for the kitchen range and sink, reducing to a minimum the effort required in doing the housework in this part of the home.

We know you will be delighted with the arrangement of bedrooms and bath which all open on a connecting hall, entirely separate from the other rooms in the home. Every convenience has been provided including a clothes chute from first floor to basement; also one of our fine built-in linen closets which are illustrated on Page 52 of this catalogue. You will notice that both bedrooms have windows in opposite walls which not only afford ample light, but also give cross ventilation.

"The Priscilla" is a comfortable neat appearing home.

See Prices on Pages 1 to 4
Specifications on Pages 10 and 11

Unless you request otherwise, we furnish for this home, brown shingle stain for the sidewalls and white paint for the trim.

"The Venice"—Material Supplied Either Ready-Cut or Not Ready-Cut

A Distinctive, Well-Arranged Home

THERE is a large and growing demand for a properly designed home which expresses individuality without resorting to the freak or stunt devices which do not wear well and really add nothing to the appearance of the home. Such a home is "The Venice."

Its massive paneled porch columns and newels, the interesting effect obtained by paneling the gable and sidewalls over high grade, slate surfaced roofing above the belt course, and the cornice brackets, present a unique and yet perfectly harmonious exterior. The handsome front door, the divided upper lights of the windows and gable sash are touches which indicate resourcefulness and the sense of harmony of Wardway designers.

"The Venice" has an interior arrangement which appeals strongly to every housewife. The living and dining rooms are one in effect, with an unusual amount of unbroken wall space in the latter, providing an excellent opportunity for advantageous placing of the buffet or china closet.

Each of the bedrooms has two windows and a closet, which insures the utmost convenience to occupants at all times. The bath opens directly from a connecting hall and is readily accessible yet apart from the living rooms.

A fine large pantry is a feature of the kitchen. Here there is plenty of room for all the equipment and supplies, permitting all of the space in the kitchen proper to be occupied by range, worktable, etc. One of our double-acting doors separates the kitchen from the dining room.

Certainly here is a home of unique and interesting outward appearance combined with the utmost in convenience of interior arrangement, priced remarkably low.

We furnish this attractive home in two sizes with outside dimensions ("A") 24 feet by 36 feet and ("B") 28 feet by 38 feet. Be sure to mention size desired.

See Prices on Pages 1 to 4
Specifications on Pages 10 and 11

Choice of 2 Sizes

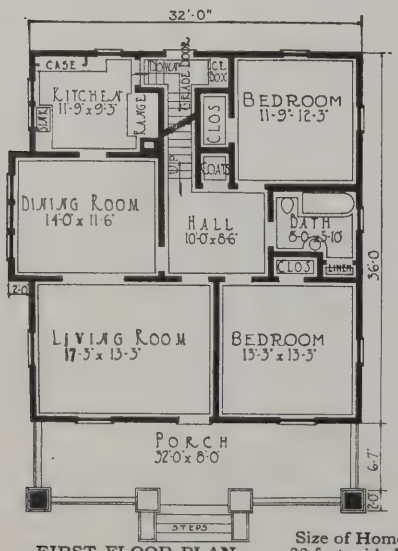
Venice "A"
Size 24 feet by 36 feet

Venice "B"
Size 28 feet by 38 feet

Unless you request otherwise we furnish for this home, cream paint for the body and white for the trim.

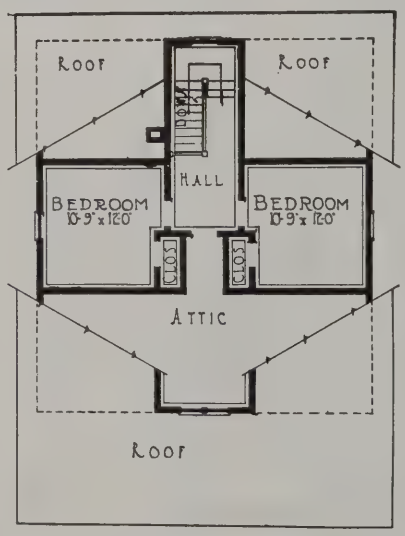
"The Buena Vista"—Material Supplied Either Ready-Cut or Not Ready-Cut

Charming, Popular, Four-Bedroom Bungalow



FIRST FLOOR PLAN

Size of Home, 32 feet wide by 36 feet long



SECOND FLOOR PLAN

See Prices on Pages 1 to 4—Specifications on Pages 10 and 11

Unless you request otherwise we furnish for this home, Colonial yellow paint for the sidewalls and white for the trim.

See Page 4 for heating equipment, etc., option of Radio Asphalt Shingles and oak flooring and finish. Write us for suggestions and estimates on a water supply system and sewage disposal for this home.

SELDOM do you see a more inviting and comfortable home than "The Buena Vista." The keynote of the whole home, both inside and out, is given by the wide porch with its heavy beam supported by massive columns at both ends, and the broad steps flanked by the stone buttresses, giving an air of comfort and hospitality thoroughly carried out in the plan. The low dormer, with its overhanging roof supported by timber brackets, and the bay window extension in the dining room, are especially attractive features.

One enters directly into the large living room, and beyond, through the cased opening, is the dining room. Directly opposite the front door a heavy two-panel fir door leads into the center hall, an arrangement which has enabled the architects to keep every room most accessible, at the same time allowing every room to be isolated if desired. It is unnecessary in this home to pass through one bedroom to reach another or to reach the bathroom—a fault so common in bungalow planning.

Opening into the bathroom there is a linen closet such as is illustrated on Page 52. To the rear of the dining room the light kitchen with twin window over the sink and a third window over the worktable, makes a fine, airy, light workroom for the housewife. The large case is our design No. 863, illustrated on Page 53.

The rear entrance is through the grade door with steps leading down to the cellar and up into the kitchen. This makes a double door into the kitchen, which keeps it warm and cozy in winter.

Upstairs are two fine big bedrooms, each with a big closet, and a large attic for storage space. "The Buena Vista" is a home for a large family or for the small, comfort-loving family who want extra room for their guests.

"The Marley"—Material Supplied Either Ready-Cut or Not Ready-Cut

A Beautiful Large Home at a Low Price

A WELL-PROPORTIONED, attractive-appearing, hip-roof home of the square type—a design that is sure to appeal to the builder who is interested in getting the most for his money.

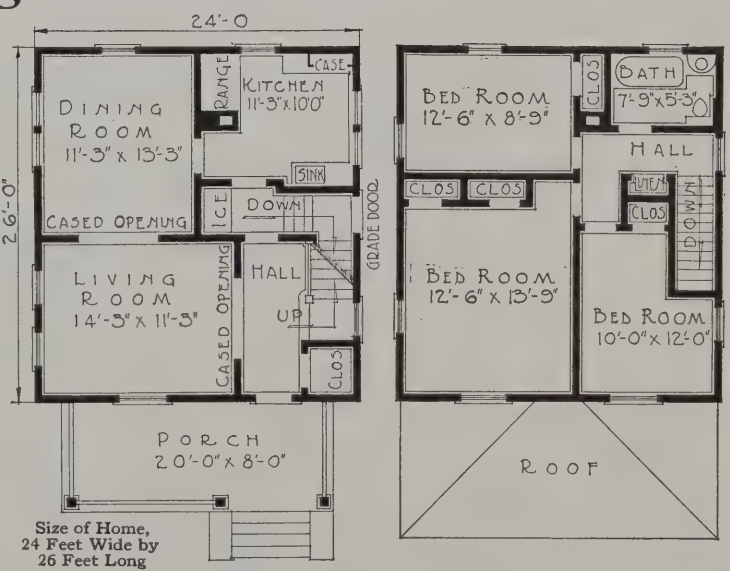
The large roomy front porch, the wide eaves, the well-balanced dormer, and the contrasting stuccoed walls above the belt course give a pleasing exterior. Plenty of windows mean a light and airy interior. All rooms in "The Marley" have windows in two walls, insuring excellent light and ventilation.

On entering the home, you step into a large light entrance hall from which the stairs lead up to second floor. Note the handy closet provided for coats and wraps. An exceptionally well-planned living room is connected by cased openings with entrance hall and dining room, giving an impression of spaciousness not ordinarily found in homes of this type.

The handily-arranged and well-lighted kitchen will appeal especially to the housekeeper. Ample wall space is provided for the range and sink, and our fine kitchen case No. 861 shown on page 53 is also furnished. Between the kitchen and front entrance hall is a stairway leading to grade door entrance, with space provided for ice box.

On the second floor are three light airy bedrooms and the bath. The large front bedroom with two closets is especially desirable. The bathroom is conveniently located off the central hall which is connected with all three bedrooms. Our handy linen closet, shown on Page 52, is provided.

"The Marley" represents one of the biggest values which we have ever offered.



Size of Home, 24 Feet Wide by 26 Feet Long

See Prices on Pages 1 to 4
Specifications on Pages 10 and 11

Unless you request otherwise, we furnish for this home, cream paint for body, below the stucco, and white paint for trim.
See Page 4 for cost of heating equipment, plumbing, electric wiring, storm sash, screens, and your option of Radio Asphalt Shingles and oak flooring and finish.

"The Orlando"—Material Furnished Ready-Cut or Not Ready-Cut

Impressive Farm Home with Five Bedrooms

THIS is a solid, very substantial home which appeals to all practical persons—city folks as well as farmers. Its whole appearance bespeaks comfort, hospitality and a substantial place in the community. The massive effect is produced by the heavy overhang of the main roof, by the dormer, and particularly by the great supporting beam on the porch held up by sturdy columns resting on boxed-up piers.

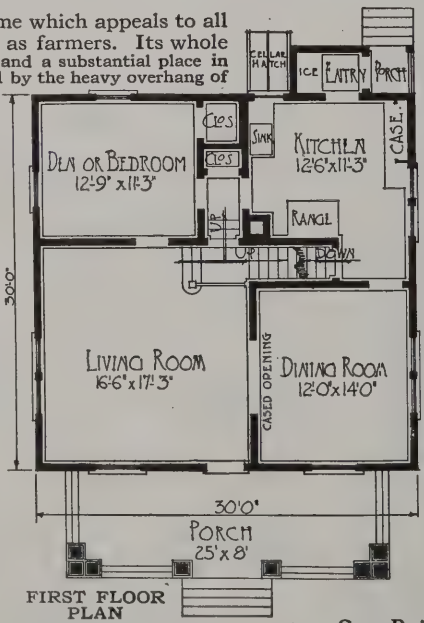
The interior of "The Orlando" is carefully planned to meet the needs of a family wanting comfort, convenience and good appearance. You enter the big square living room from the front door. To the right through a wide cased opening is the dining room of fine size and practical shape. At the rear of the living room is the den or downstairs bedroom.

The steps to the second floor lead up from the rear of the living room, having the landing flight guarded by an open rail which makes a handsome decoration. Between the den and kitchen is a little hallway from which a handy closet opens. From this two steps lead up to the landing and thence upstairs, giving what is practically a back stairs entrance by which one may reach the second story without disturbing the front of the house. This back stairway is shut off from the living room by a two-panel fir door. There is a closet off the den.

The kitchen is a big room planned for convenience. Our kitchen case No. 863 is a feature and is furnished complete ready to be built in. It is pictured and described on Page 53. A combination porch and entry furnishes space for the ice box which, though secluded, is handy and located where it can be iced without entering or disturbing the kitchen. The cellar may be entered both from the kitchen and through an outside hatchway. We furnish cellar steps and the material for the hatchway doors.

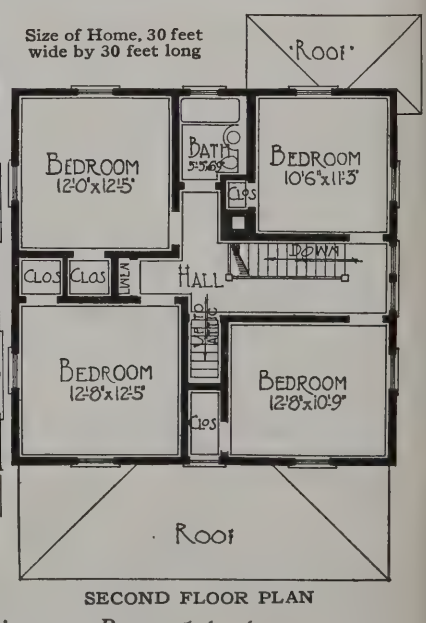
Upstairs are four big bedrooms, all having two windows and cross ventilation, each with a separate closet. The bathroom and the fine linen closet, such as is shown on Page 52, are on this floor. Steps lead to the attic, which is floored over the entire house. It is nine feet high from floor to ceiling at center ridge pole, making a large store room.

"The Orlando" is a popular home at a popular price.



FIRST FLOOR PLAN

Size of Home, 30 feet wide by 30 feet long



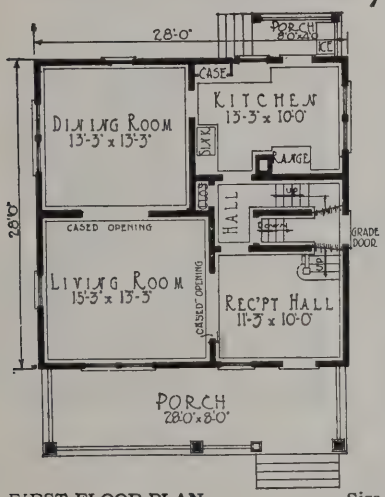
SECOND FLOOR PLAN

See Prices on Pages 1 to 4
Specifications on Pages 10 and 11

Unless you request otherwise we furnish for this home, gray paint for the body and white for the trim.

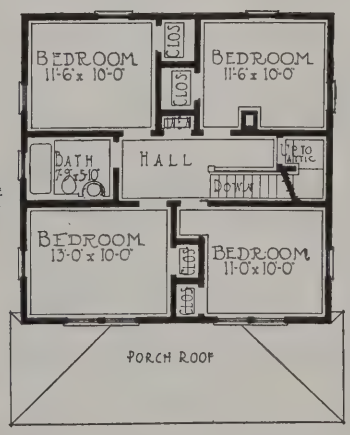
"The Panora"—Material Supplied Either Ready-Cut or Not Ready-Cut

A Universally Popular Four-Bedroom Home



FIRST FLOOR PLAN

Size of Home
28 feet wide by 28 feet long



SECOND FLOOR PLAN

See Prices on Pages 1 to 4
Specifications on Pages 10 and 11

Unless you request otherwise we furnish for this home, ivory paint for body and tan for the trim.

See Page 4 for cost of heating equipment, plumbing, electric wiring, storm sash, screens, and your option of Radio Asphalt Shingles and oak flooring and finish. Write us for suggestions and estimates on a water supply system and sewage disposal for this home.

A SQUARE hip-roof home, when the lines are properly handled, always has an air of spacious dignity and comfort. In this Wardway design this impression is enhanced by the wide eaves, the dormer, the broad front porch and the clever handling of the two belt courses which break up the expanse of outside wall. The many windows with their Colonial divided upper sash, add to the handsome appearance of the exterior and to the light and cheer within. The exterior of the house is sided with clear cypress siding—the cornice is closed.

Although not a large home as to ground space covered, "The Panora" gives the impression of size; and as every inch of space has been utilized, it really has more room than many much larger homes.

The front door leads into the big reception hall, from which the stairs lead up. At the left a cased opening reveals the living room—a fine big room lighted by three large windows. To the rear of this is the spacious dining room with its three big windows. At the back of the reception hall a door opens to the central hall which leads on into the kitchen. The entrance to the cellar is from this hall and a short flight of stairs, connecting with the main stairs opening from the kitchen is also provided, enabling the housewife or maid to reach the upstairs without going through the front hall at all. A closet is found in this hall.

The kitchen is furnished with our design No. 862 (see Page 53) kitchen case built right into the rear wall. There is room on the back porch for the ice box.

Upstairs the four bedrooms and bathroom open off the central hall. Each of the bedrooms has cross ventilation—the two front bedrooms having three windows and the other two having two windows each, making them wonderfully light, airy and cool. Each bedroom has its own big closet. The bathroom is of fine size and contains plenty of room for all necessary fixtures. A linen closet, such as is illustrated on Page 52, opens off this hall and contains room for all necessary linen and bedding. Steps leading up to the attic open from this hall.

Special attention has been paid to the wall space for furniture in the entire home, and you will not find any part of any of the rooms which cannot be utilized. For economy of space and money there are few four-bedroom homes that surpass this Wardway design.

"The Bellevue"—Material Supplied Either Ready-Cut or Not Ready-Cut

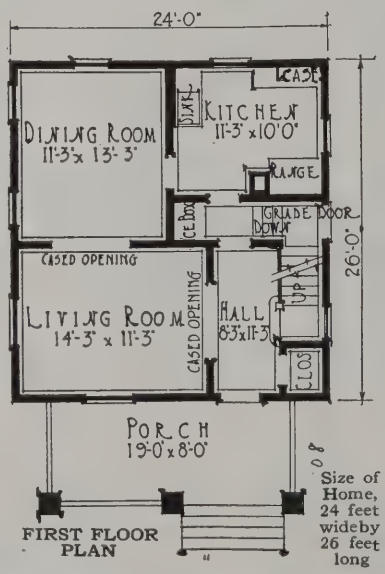
An Economical Home of Fine Proportions

FOR those who are seeking the most value for every dollar put into a house, there is no better choice than the square house. It gives more living space than any other design. Likewise, in the hands of a good architect, it is an impressive home, well lighted and convenient. Notice the fine proportions in "The Bellevue." The placing of the windows, the wide eaves, the dormer and porch, all contribute to the effect of substantial dignity. The outside of this home is covered with clear siding.

The front door opens into the reception hall. This provides space for a coat closet just inside the door. The stairs lead up just behind it. The cased opening really makes the hall a part of the living room. A second cased opening leading into the fine light dining room completes the spaciousness of the downstairs rooms. The kitchen is light and convenient. The grade door makes it unnecessary to have a direct rear entrance into the kitchen, saving that much space. Case No. 861, shown on Page 53, is built into the corner wall. This fine pantry case provides room for everything needed.

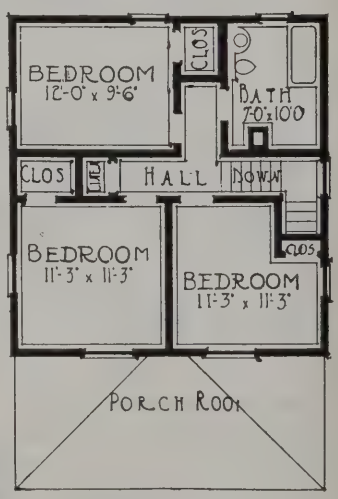
Notice that there is a direct passage from the kitchen to the front door. This is a great convenience in answering the door bell or going upstairs without disturbing the occupants of the living room or dining room. Notice the space provided for the ice box, handy both to kitchen and dining room yet in a place where its icing does not disturb or get the kitchen floor dirty. The cellar steps lead right down from the rear grade door.

Upstairs are three splendid bedrooms, each with two windows, insuring cross ventilation, and each with its own closet. At the end of the hall is a fine big linen closet, as illustrated on Page 52. Bathroom in the corner is also a comfortably large room. There are no expensive frills on this home to run the cost up, but there is no home built offering more comfort and convenience for its size and price than this one. "The Bellevue" is one of the most popular of Wardway designs.



FIRST FLOOR PLAN

Size of Home, 24 feet wide by 26 feet long



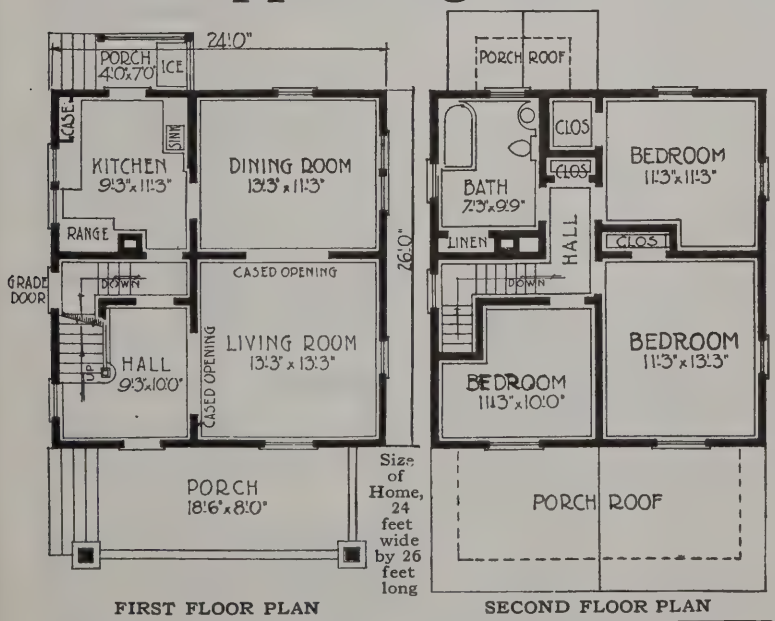
Unless you request otherwise we furnish for this home, Gray paint for the sidewalls and White for the trim.

See Page 4 for cost of heating equipment, plumbing, etc., and your option of Radio Asphalt Shingles and oak flooring and finish.

See Prices on Pages 1 to 4—Specifications on Pages 10 and 11

"The Argenta"—Material Supplied Either Ready-Cut or Not Ready-Cut

Fine Appearing Home for Town or Country



FIRST FLOOR PLAN — SECOND FLOOR PLAN

Unless you request otherwise we furnish for "The Argenta," Ivory paint for body and trim, Bungalow Brown stain for sidewall shingles.

See Page 4 for cost of heating equipment, plumbing, etc. Write us for suggestions and estimates on a water supply system and sewage disposal for this home.

THE ARGENTA is one of the most pleasing and popular half shingle designs. Its interesting exterior is due to the contrast of shingles above and siding below the belt course; the broad, massive gable roof of the porch; the wide, closed cornice, and the well proportioned dormer.

The large porch with sturdy columns and boxed rails or siding, will add another room to your home in summer which all the family will appreciate.

The front entrance is conveniently placed just at the top of the porch steps. And from the porch you enter a hall of generous size. Here the handsome open stairway commands immediate attention. Direct access to the kitchen is afforded through a small hallway from which the cellar steps descend. The plans provide for a basement under the entire house.

Through a cased opening one views the large, square living room cheerily lighted by two windows. Beyond, the dining room invites you. A large twin window in one wall and a single window in the other insure plenty of sunshine.

Working and cooking in a dark corner are annoyances the housewife will never experience in "The Argenta." A flood of light reaches the range and worktable through a twin window. Wardway kitchen case No. 862 (see Page 53) with its flour bin, drawers, shelves and hardwood cutting board, lightens the work. A grade door, making it unnecessary to use the kitchen to reach the cellar, must not be overlooked. A handy little rear porch with space for the refrigerator is a real convenience, too.

Each of the three bedrooms upstairs opens on a hall, at the end of which is a closet for the storage of clothes. Windows in all the walls readily admit the light breezes on summer nights. An unusually roomy bath is equipped with our regular deep-shelved linen case.

The features of this home are its imposing appearance, comfortable arrangement and low cost to build.

See Prices on Pages 1 to 4
Specifications on Pages 10 and 11

"The Corydon"—Material Supplied Either Ready-Cut or Not Ready-Cut

A Charming Bungalow with Large Bedrooms

THE wide dormer, the changing slope of the roof at the porch, the hooded bay window and the large, square porch pillars make the exterior of this home exceedingly pleasing. The lines are simple, in perfect harmony and entirely practical, yet varied enough to command the admiration of everyone.

The exterior walls and the square porch pillars are of stucco, for which we furnish Byrkitt patent sheathing. This home looks unusually well finished this way, but should you prefer regular siding it will be furnished at slight additional cost.

The exposed rafter ends of the dormer and main roof, the shingled dormer walls, the wide porch balusters and the outlined belt course, all contribute to the attractiveness of "The Corydon." The correct handling of these details distinguishes the properly designed home from all others.

One is surprised to find a hall in a home of this size—yet it is here with a convenient coat closet opening off of it. This feature will be appreciated every day in the year. A large cased opening between living and dining rooms makes these two practically one, yet preserves the identity of each. Fine twin windows in each insure a bright, cheery interior.

The kitchen of this home will delight every housewife, as it is well arranged from every standpoint. A full sized twin window floods with light the sink and worktable of our No. 861 kitchen case. A completely enclosed rear entry provides an excellent location for the refrigerator, keeping it out of the way and yet accessible for icing without the need of entering the kitchen. This entry will shield the kitchen from the heat of the summer sun and keep it warmer in winter. The basement stairs lead down from this entry to a full sized cellar having six windows.

Each bedroom is unusually large, having twin windows and closets of generous proportions. The bath opens off from a short connecting hall—convenient yet affording the desired privacy.

From any point of view you will find this Wardway Home the maximum in comfort, appearance and economy of arrangement.

See Prices on Pages 1 to 4
Specifications on Pages 10 and 11

Unless you request otherwise, we furnish for "The Corydon," white paint for the trim. The walls of this home are stucco.

See Page 4 for cost of heating equipment, plumbing, electric wiring, storm sash, screens, and your option of Radio Asphalt Shingles and oak flooring and finish. Write us for suggestions and estimates on a water supply system and sewage disposal for this home.

Size of Home, 24 feet wide by 38 feet long

"The Kenmore"—Material Supplied Either Ready-Cut or Not Ready-Cut

Size of Home, 24 feet wide by 38 feet long

Simple, Convenient Plan

THE strong appeal which "The Kenmore" makes to home lovers is due no less to its charming simplicity of appearance than to its distinctly practical and cozy interior arrangement. It occupies but little ground yet provides a surprising amount of floor space—more than enough for the average family. Not a bit of space is wasted; every inch is conveniently available for comfortable living.

As you enter the living room from the large front porch, a bedroom with a roomy closet is found at the left. Straight ahead through French doors of attractive design is the dining room—a bright, cheery room, radiating hospitality. Large twin windows welcome the sunshine and, in summer, the cooling breezes. A bedroom of generous size opens off the left of the dining room. A convenient closet is found in this room. As shown on the floor plan at the left, a hall giving access to a third bedroom and conveniently located bathroom also opens off the dining room.

The kitchen—always one of the most important parts of the home—is connected directly with the dining room. This is a step-saving feature which the busy housewife will like especially. Twin windows of good proportions insure plenty of fresh air and light, things which are essential if the room is to be a pleasant one in which to work. Steps leading down to the basement are handy. Throughout, the architect has kept in mind the fact that a large majority of women spend a greater part of their time in the kitchen and has done everything possible to make the room pleasant, convenient and labor saving.

It would be difficult to build a home more economical or more convenient than "The Kenmore." You probably already have noticed the generous size of every one of its six comfortable rooms, the large amount of bedroom space and the roomy porch for which the whole family will be grateful during the hot months. When you consider these points and then remember that the total ground space it requires is only 24 feet in width and 38 feet long, we believe you will admit that the designers have indeed done wonders. Their success emphasizes the wisdom and economy of buying Wardway Homes. Only in ready-cut homes can you find the combined skill and experience of the country's best architects, backed by the lessons learned by building homes in every climate—in every one of the United States. The Wardway System protects you from annoying, expensive "extras."

When you picture to yourself your own family comfortably and happily installed in "The Kenmore," and realize the exceptional and distinctive features it offers, you will agree that from practically every viewpoint this Wardway Home is one of the greatest values to be found.

See Prices on Pages 1 to 4—Specifications on Pages 10 and 11

Unless you request otherwise we furnish for "The Kenmore," Colonial Yellow paint for the body and White for the trim.

See Page 4 for cost of heating equipment, plumbing, electric wiring, storm sash, screens, and your option of Radio Asphalt Shingles and oak flooring and finish. Write us for suggestions and estimates on a water supply system and sewage disposal for this home.

"The Dresden"—Materials Furnished Either Ready-Cut or Not Ready-Cut

Exceptionally Attractive Modern Bungalow

THE "Dresden" is a leader among our many fine bungalows, and is a home that you are certain to find most interesting. It has many excellent qualities which you will readily recognize as being necessary in the new home which you have in mind. Its massive rubble stone pillars and fireplace chimney suggests sturdiness and ruggedness—and blend in perfectly with the uniquely spaced shingled side walls.

The exposed rafter ends, cornice brackets and fancy sawed verge boards bring out what is commonly called the "craftsman effect;" and these, together with the unusual porch design, certainly give this home an appearance which is hard to improve upon.

Within we find a large living room with an attractive fireplace in the end wall. A cheery fire is the only thing needed to make it complete. Picture for yourself the contentment and satisfaction to be had from such a living room.

You will find that a closet has been placed in the right rear corner of this room, which provides an excellent place for hanging wraps, umbrellas, etc. The den off the living room can, if desired, be used for various other purposes, such as an emergency bedroom, a playroom for children, music room, office, etc.

Directly back of the living room, and connected with it by a wide cased opening, is the dining room, well lighted by triple windows in the bay, and of sufficient size to seat a large number.

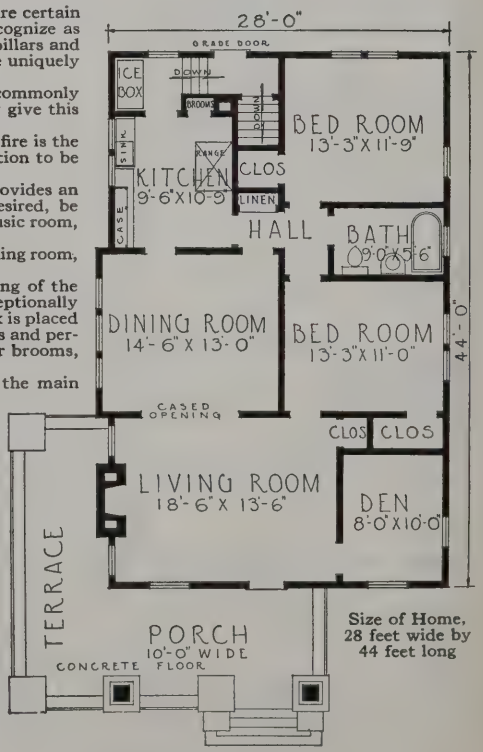
A swing door leads to the kitchen, where we view with admiration the practical designing of the architect. A kitchen cabinet, No. 863 as shown on Page 53 is furnished. This case is exceptionally roomy, providing an abundance of space for storing dishes and other kitchen utensils. The sink is placed directly beneath the twin window, and provides a pleasant spot in which to prepare vegetables and perform other kitchen duties. The small closet next to the chimney provides an excellent place for brooms, mops, etc.

Entrance from the rear is through a grade door, with a stairway to basement and also to the main floor. At the top of the stairway is a space which can be used for the ice box. It is convenient to the kitchen and well lighted by the large window in the rear wall.

A center hall is provided in the "Dresden," and it acts as a hub, permitting one to go to any part of the home with only a few steps. Notice the space in the hall marked "linen." This means that one of our attractive linen closets, as shown on Page 52, is supplied for this location.

Bedrooms should be well lighted and airy. These features were in mind when the "Dresden" was designed. Both bedrooms have twin windows, while the rear bedroom has a single window in the side wall, permitting cross ventilation. Large closets are well appreciated; and the ones provided for each bedroom are typical of the forethought of the designer.

This is one of our very latest designs, and embodies features found only in the most modern better class of homes.



Size of Home, 28 feet wide by 44 feet long

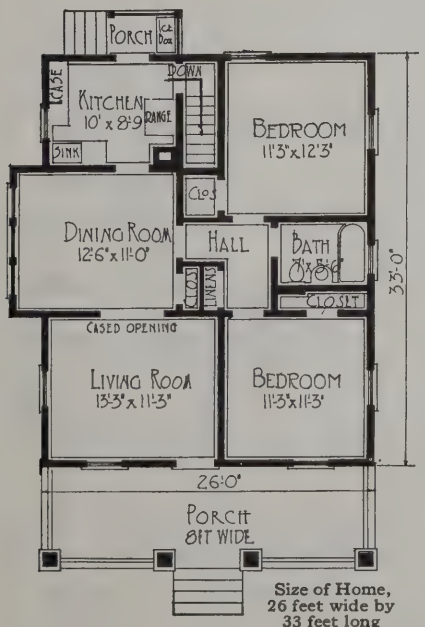
See Prices on Pages 1 to 4—Specifications on Pages 10 and 11

Unless you request otherwise, we furnish for the "Dresden," dark brown stain for side wall shingles and white for trim.

See Page 4 for cost of heating equipment, plumbing, electric wiring, and your option of Radio asphalt shingles and oak flooring and finish.

"The Aurora"—Material Supplied Either Ready-Cut or Not Ready-Cut

Everyone Admires This Splendid Bungalow



Size of Home, 26 feet wide by 33 feet long

See Prices on Pages 1 to 4
Specifications on Pages 10 and 11

WHEREVER it is built, our "Aurora" home gains a host of admirers. The simplicity and dignity of the lines, combined with the air of hospitality given by the broad eaves and the recessed porch, make it a universal favorite.

The exterior is sided with clear cypress siding up to the belt course. From here to the wide, enclosed cornice, clear red cedar shingles are used. The heavy square columns and high piers give a solid, substantial effect which sets off the beauty of the whole house.

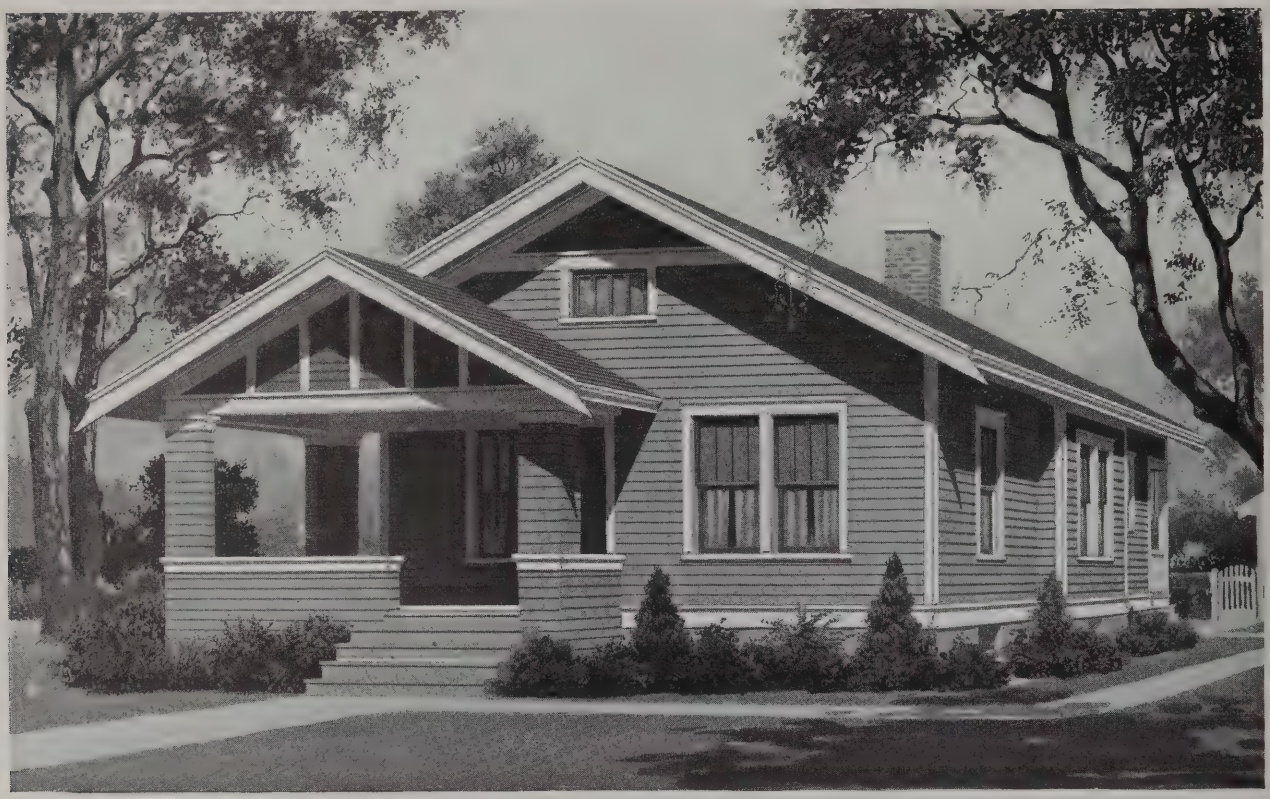
The floor plan must be considered carefully if none of its excellencies are to be missed. The front door opens directly into the living room, saving the space that usually goes into an entrance hall. The dining room is connected with this room by a wide cased opening. Notice how the dining room is made large and light by the square bay window. A coat closet opens from the dining room, as does the hall which leads to the bathroom and both bedrooms. The linen closet also opens off the hall. This hall arrangement gives perfect privacy to the sleeping quarters of the home and eliminates the objections so many have to the usual cramped bungalow plans with one bedroom leading from another.

Pay particular attention to the illustration of the linen closet on Page 52. This is a splendid feature and means much to the housewife. Note that each bedroom has its own ample closet. The kitchen is small enough to be extremely convenient and large enough to serve all practical needs. Space is provided for the big wallcase and worktable near the window. This splendid pantry case is furnished with the house at no extra charge and is built into the wall. It is case No. 861, shown on Page 53. The cellar steps lead down from the kitchen, the door being near the rear entrance, at the most convenient place. There is room for the ice box on the back porch where it is always cool, and where the ice man does not have to come into the house to ice it. There is an abundance of windows in the home, affording splendid light and ventilation.

As you will see by the specifications and description on Pages 10 and 11 of this book, the material furnished and the construction used mean a fine, well built home at a minimum cost.

Unless you request otherwise we furnish for "The Aurora," French Drab paint for sidewalls, Brown shingle stain for shingles on the dormer and sidewalls, and White for the trim.

See Page 4 for cost of heating equipment, plumbing, electric wiring, storm sash, screens and your option of Radio Asphalt Shingles and oak flooring and finish. Write us for suggestions and estimates on a water supply system and sewage disposal for this home.



"The Essex"—Material Supplied Either Ready-Cut or Not Ready-Cut

A Very Charming Five-Room Bungalow

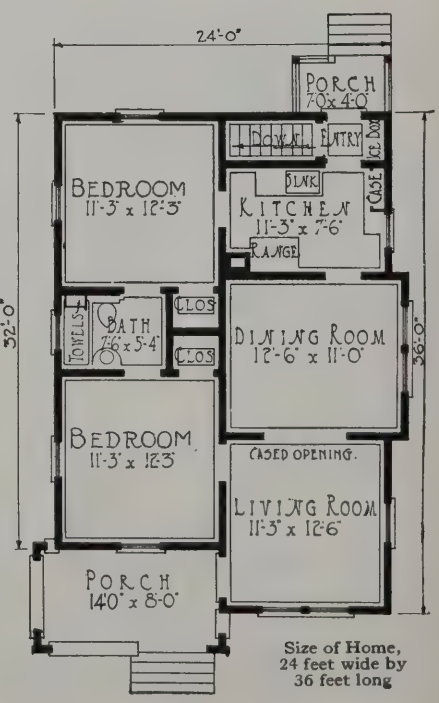
THE wide eaves and sharply cut barge boards of this home are typical of the genuine California bungalow. The outside walls, including the porch pillars, are sided. The porch gable and the little space above the belt course of the main gable are shingled—an especially pleasing effect. The inset porch gives a hospitable, inviting look to the home, which is also carried out in the interior plan.

The living room and dining room, connected as they are by a wide cased opening, are practically one big room, giving an air of spaciousness unusual in the small home. The kitchen is a model of convenience, containing our big wall case No. 861 which is illustrated on Page 53. The cellar steps go down from the rear entry, which also provides room for the ice box—a handy arrangement convenient for the kitchen but out of the way, so that the visit of the ice man does not muss things up. The kitchen sink and range are placed in their logical positions for easy work and step saving.

The two bedrooms are large rooms, each with two windows, to make them cool and pleasant in summer. Each has a closet and opens into the bathroom, which is between them. Our big towel case (see Page 52) is furnished for the bathroom. It is very roomy and provides plenty of room for the necessary bathroom supplies. This is just one of the many little conveniences you will find in "The Essex."

All in all this is as compact, convenient and charming a little home as you will discover in a long day's travel. And the Wardway system of manufacture, wholesale prices and ready-cut construction, places it within easy reach of all who really desire a home of their own.

See Prices on Pages 1 to 4
Specifications on Pages 10 and 11



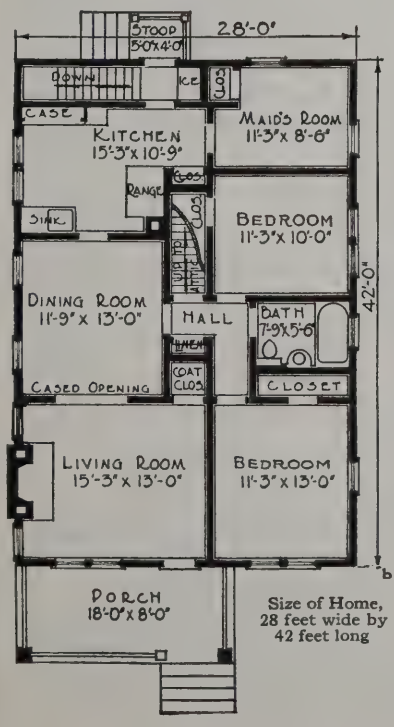
Size of Home, 24 feet wide by 36 feet long

Unless you request otherwise we furnish for "The Essex," Colonial Yellow paint for body, White for trim and Brown stain for gable shingles.

See Page 4 for cost of heating equipment, plumbing, electric wiring, storm sash, screens and your option of Radio Asphalt Shingles and oak flooring and finish. Write us for suggestions and estimates on a water supply system and sewage disposal for this home.

"The Winsted"—Material Supplied Either Ready-Cut or Not Ready-Cut

Three-Bedroom Bungalow of Unusual Merit



Size of Home, 28 feet wide by 42 feet long

AS SOON as you see "The Winsted" you feel instinctively that the interior is attractive and convenient. There is a charm about the shingled walls, the timbered brackets and the clever handling of roof lines which makes you sure that the architect has been as successful within the house as outside. And you are not disappointed when you enter.

The front door leads from the fine big porch into the living room, the principal feature of which is the big, cheery fireplace at the end of the room, flanked by two big windows. The double window on the front makes this a beautiful, light room, yet there is plenty of wall space for the furniture. Notice that a coat closet is provided off this room to take care of spare wraps.

A cased opening leading into the dining room practically throws these rooms into one, giving that much desired air of size and spaciousness. The hall connecting the bedrooms and bathroom leads from the dining room. The stairs up to the floored attic rise from this hall. Right opposite the stairway door is a splendid linen closet, a duplicate of that shown on Page 52, which provides plenty of room for towels, linens, spare bedding and all those housekeeping accessories which are so hard to store away if a suitable place is not provided for them. This hall arrangement, which connects the sleeping rooms and the bathroom, is a feature of Wardway bungalows which deserves more than passing attention. The chief objection which many people have to a bungalow is the throwing together of the rooms with the consequent lack of privacy. Very often it is impossible to reach one bedroom without going through another, which is a bother and an annoyance to many people. The hall arrangement makes the sleeping rooms absolutely private without wasting an inch of space.

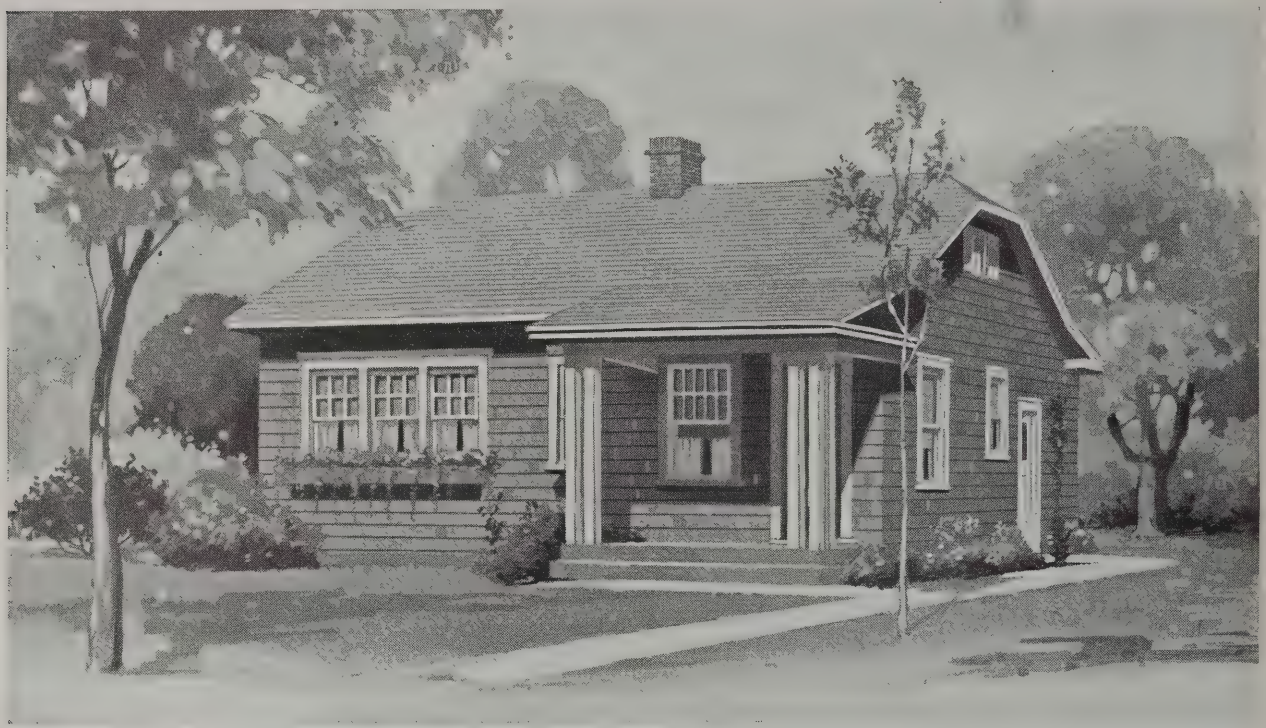
Notice the maid's room at the rear, which opens into the splendid big kitchen. The kitchen case which is built into the rear wall is design No. 863, shown on Page 53. This is a fine big, light room—big enough to take in a dining table if it is desired to serve meals in the kitchen. The cellar steps lead down from the rear entry way. This arrangement enables the delivery boy or the ice man to enter the cellar and ice the ice box without getting into the house proper, thereby saving a great deal of confusion and cleaning up. Notice that the broom closet is right back of the range. This also is a much appreciated convenience.

"The Winsted" has an abundance of big windows, giving plenty of light and good ventilation—a feature always remarked by its owners and visitors and typical of Wardway designed homes.

See Prices on Pages 1 to 4
Specifications on Pages 10 and 11

Unless you request otherwise we furnish for "The Winsted," Bungalow Brown stain for the wall shingles and White paint for the trim.

See Page 4 for cost of heating equipment, plumbing, electric wiring, storm sash, screens, and your option of Radio Asphalt Shingles and oak flooring and finish. Write us for suggestions and estimates on a water supply system and sewage disposal for this home.



"The Edwards"—Materials Furnished Either Ready-Cut or Not Ready-Cut

A Bungalow Home of Exceptional Charm

IT is the individuality of this homelike little shingled house which immediately attracts your attention. The quaint exterior with its low sweeping roof lines, its battered gable ends, and porch of colonial design, seems to give such an inviting appearance and speaks of a cozy, convenient arrangement within. The wide triple window in the front, with its divided upper light sash, and flower box below, adds that final touch and makes the exterior complete and in perfect balance.

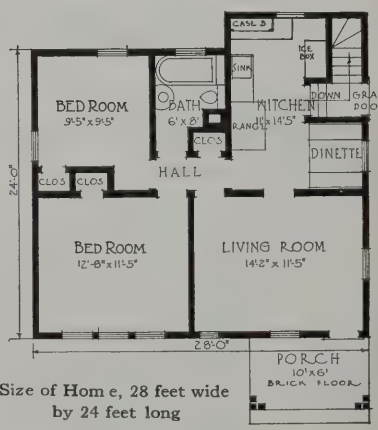
The interior arrangement supplies about everything one could wish for in a four-room home. The living room is a large, pleasant room, well lighted by its three windows and door, which has six lights of bevel plate glass in the upper part. There are two bedrooms; and the one at the front has been made exceptionally pleasant by the wide expanse of windows.

Notice how little space has been devoted to a hallway; and yet this hall connects with every room of the house and serves to keep the bedrooms and bath entirely separate from the other rooms, giving that much desired privacy to these rooms.

The conveniently laid out kitchen, with breakfast room or dinette space adjoining, makes housework in this home a pleasure. The ice box, sink, stove, and our fine built-in kitchen case No. 861, shown on Page 53, have all been arranged to eliminate unnecessary steps, and a meal can be prepared and served with half the effort required in many of the larger, less conveniently arranged homes.

From the kitchen a flight of two steps leads to a grade landing, with exterior door and stairs leading down on to basement. This is a very convenient arrangement, as it enables one to go from the outside to the basement, when desired, without passing through the other rooms of the house.

While the "Edwards" is not a large home, we believe you will agree that its carefully worked out arrangement gives an unusual amount of living space. Its small size makes it a low cost home to build, and economical to heat in winter; and the upkeep will be practically nothing.



Size of Home, 28 feet wide by 24 feet long

Prices on Pages 1 to 4

Specifications on Pages 10 and 11

Mr. Asa Burch, Contractor and Builder, Writes:

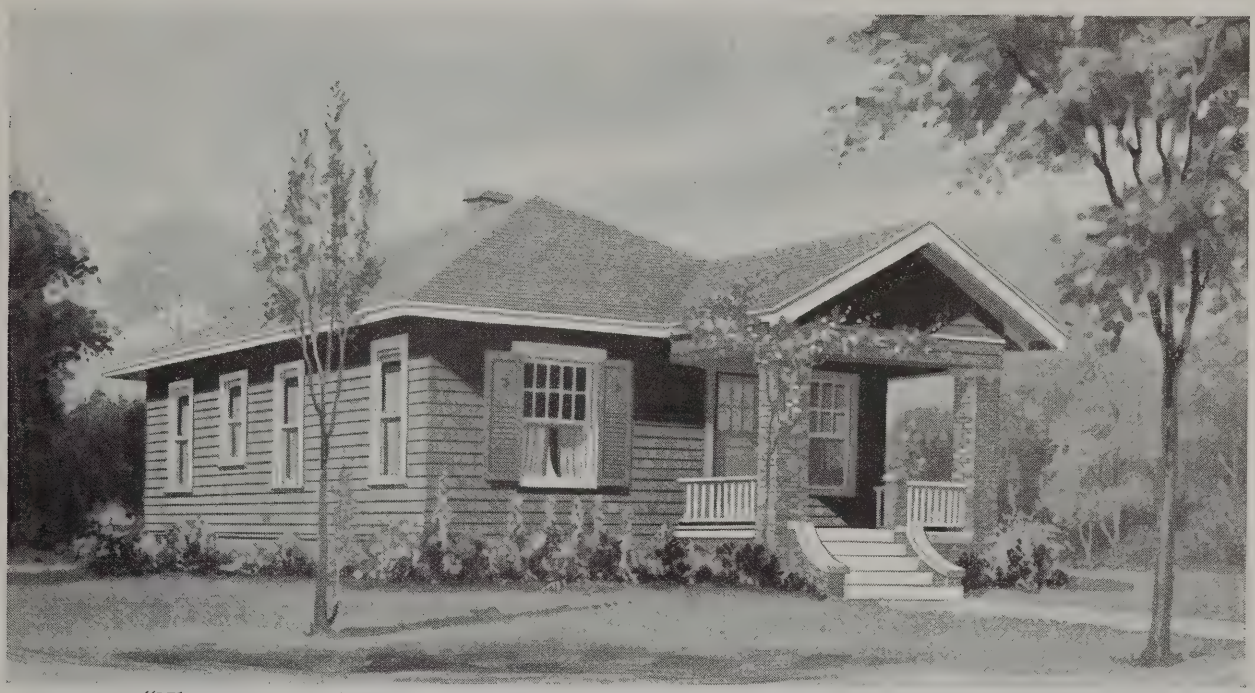
"The new home was bought for a friend, and to say he was satisfied is to put it mild. The material was all No. 1, and an oversupply of almost everything.

"I talked my friend into buying it, and his neighbors told him he was stung. But he thanks me now for the deal, and I surely thank you for the courtesies shown me in the business transactions I have had with you this season." Asa Burch, Battle Creek, Mich.

Printed with Mr. Burch's permission

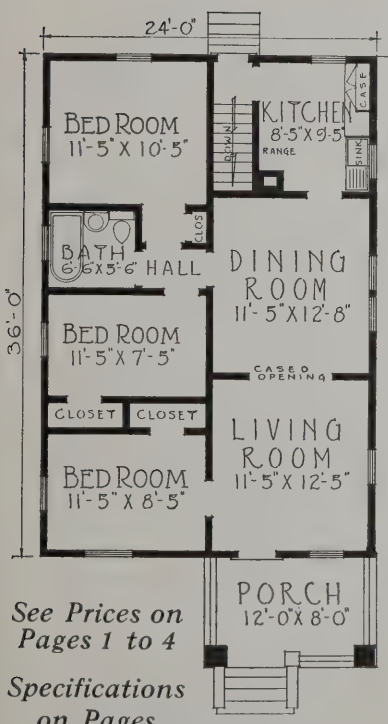
Unless you request otherwise, we furnish for the "Edwards," dark green stain for sidewall shingles, and white for trim.

See Page 4 for cost of heating equipment, plumbing, electric wiring, storm sash, screens and your option of Radio asphalt shingles and oak flooring and finish.



"The Rosewood"—Materials Furnished Either Ready-Cut or Not Ready-Cut

An Attractive and Economical Home



See Prices on Pages 1 to 4

Specifications on Pages 10 and 11

Size of Home, 24 feet Wide by 36 feet Long

WHEN we speak of home, we think not of the materials which go into the construction of a house, but rather the things which we associate with it and which makes it so dear to us. When you think of the "Rosewood," you at once picture a cozy cottage with its inviting vine covered front porch, its wide, pleasing front windows with specially designed old fashioned shutters, and its dark stained shingled side walls with pure white trim, which gives it such a clean cut, pleasant appearance. Surely such a design as this is deserving of your most careful consideration.

The floor plan provides six rooms and bath, with inside entrance to the basement. First notice the pleasant living and dining rooms, well lighted and airy. Each room really appears much larger than this floor plan would indicate, through their being connected by a large cased opening. This, however, does not cause them to lose their separate identity.

Three bedrooms furnish ample sleeping quarters for an average size family, and each has been provided with a good size clothes closet. The two rear bedrooms and bath are most conveniently arranged, all opening onto a connecting hall, which keeps them separate from the other rooms of the house and gives that very much desired privacy for these rooms.

The kitchen is well arranged for the placing of necessary equipment. The sink has been located directly below the side wall windows, making a pleasant spot indeed in which to work. Our kitchen case No. 861, shown on Page 53, is furnished, and provides ample storage space for dishes, food, etc.

If you are looking for a six-room home which will give utmost value for every dollar expended, you are sure to find it in our "Rosewood" design.

Thoroughly Satisfied—Saved at Least $200

"In answering your letter about my Wardway Home, will say I was very much pleased with it. I sold it before it was near completed. The materials were all O. K., and I had plenty of everything and some materials left over. I could not have built the house if I would have had to cut the lumber; so I like the ready-cut system fine. I saved at least $200 on the cost of the lumber.

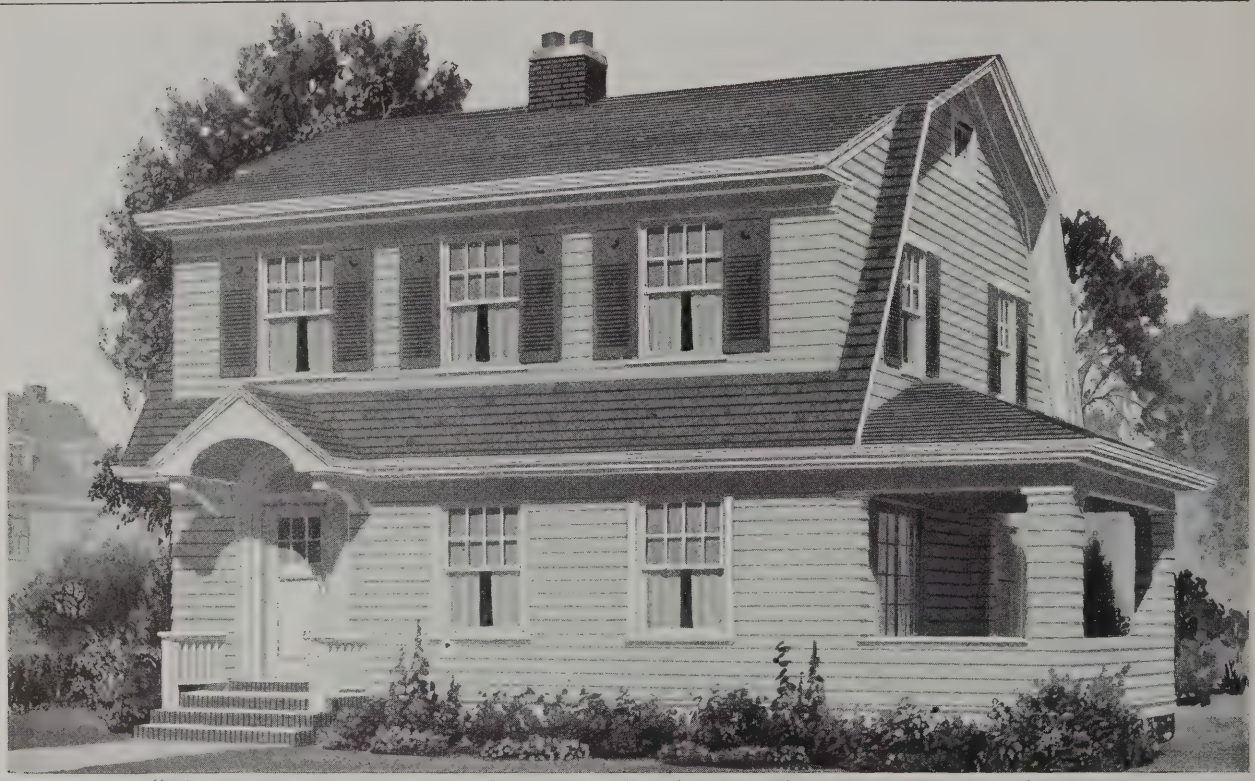
"Kindly quote me the price of your Winsted home, freight prepaid, with wiring equipment. I am thinking of building this next summer."

A. L. Bungarner, Topeka, Kan.

Printed With Mr. Bungarner's Permission

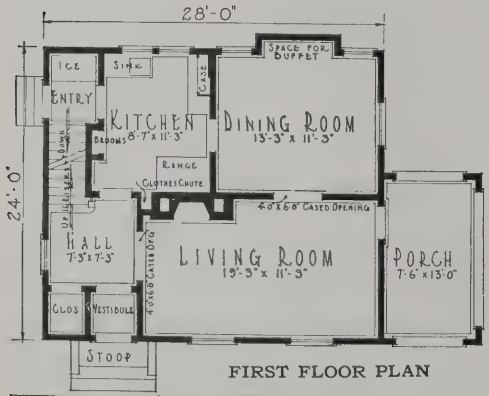
Unless you request otherwise, we will furnish for the "Rosewood," dark brown stain for the side wall shingles, and white paint for trim.

See Page 4 for cost of heating equipment, plumbing, electric wiring, storm sash, screens, and your option of Radio asphalt shingles and oak flooring and finish.

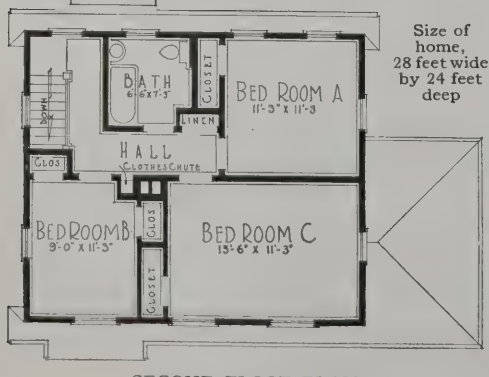


"The Princeton"—Materials Supplied Either Ready-Cut or Not Ready-Cut

Dutch Colonial Home with Ideal Plan



FIRST FLOOR PLAN



Size of home, 28 feet wide by 24 feet deep

SECOND FLOOR PLAN

THE beauty and charm of this attractive Colonial home are instantly appreciated by every true home lover. It is a masterpiece in architecture being equally as well arranged as it is attractively designed.

"The Princeton" is a truly Dutch Colonial Home with its low gambrel roof, its wide dormer, its quaint slatted blinds, and its wide 8-inch bevel siding. The massive hooded entrance with brick steps and terrace is exceptionally well designed and seems to invite you to the pleasant rooms within.

From the vestibule you enter a large pleasant hall off of which a convenient closet for outside wraps is provided. The open stairway leads up from this hall and at the right a wide archway forms the entrance to the long living room. This room is especially pleasant. In winter its greatest charm will be the cheery open fireplace; in summer the terrace door at one end will lead you out onto a cool enclosed porch. Through the cased arch we enter the dining room which is made more pleasing by the shallow alcove with window on either side which provides an effective background for the buffet.

As always in Wardway homes, the kitchen is a model of convenience. Sink and built-in kitchen case (No. 861, shown on Page 53) are flooded with light from the twin windows. Ironing board and brooms have their own special closet; the icebox stands in the entry, close to basement stairs and outside door while a second door opens directly into the front hall.

Note how carefully the second floor is planned to make each of the three bedrooms as large and well ventilated as possible, to give each such splendid closet space, to bring the bath directly over the kitchen in order to save on plumbing. The linen closet (shown on Page 52) is convenient to every room, while a clothes chute drops soiled linen to the basement.

We believe you will agree that "the Princeton" is a home which leaves little to be desired.

See Prices on Pages 1 to 4
Specifications on Pages 10 and 11

Unless you specify otherwise we will furnish for "The Princeton," white paint for the body and dark green paint for the blinds.

See Page 4 for cost of heating equipment, plumbing, etc., and your option of Radio Asphalt Shingles and oak flooring and finish. Write for suggestions on a water supply system and sewage disposal for this house.

"The Hinsdale"—Materials Furnished Either Ready-Cut or Not Ready-Cut

Cozy Bungalow Home for Farm or Suburb

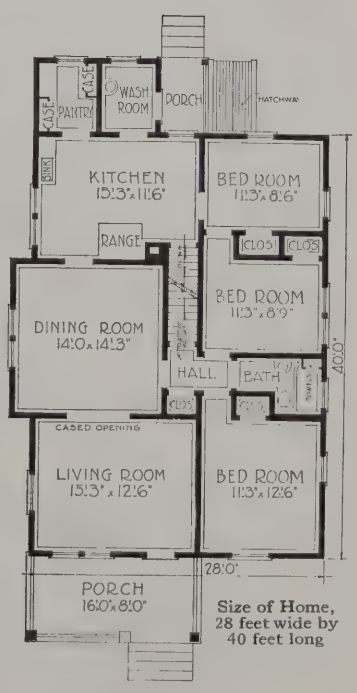
THE HINSDALE has been designed primarily as a farm home although it is equally as suitable for a suburban or city residence.

Farm homes all on one floor are becoming more and more popular each year as they are so convenient and so much easier to care for. This home has been planned to provide every convenience that a farm home should have. You will note a large pantry with two built-in cases has been provided. There is also a wash room which opens onto the rear porch enabling farm hands to wash up before entering the house at meal time. Where this home is built in a suburb or city the wash room may be used as an entry or store room. Both an inside and outside basement entrance is provided.

Dining and living room are unusually large and pleasant, and the wide cased archway makes them practically one. From the small central hall, stairs ascend to the well-lighted attic, and one also enters the sleeping quarters and bathroom. Exceptionally wide windows make each of these three rooms very light and well ventilated, and careful planning has given them large closets. The third bedroom opens from the kitchen—a desirable feature for the farm home.

"The Hinsdale" is a home of which any farming community will be proud, for it is as attractive in appearance as it is in floor plan. It is sided only to the belt line. The gables are finished with stained shingles, and are also half timbered—a very pleasing effect. The open cornice and sturdy brackets give this home the air of welcome which has always been the spirit of the American farm family.

See Prices on Pages 1 to 4—Specifications on Pages 10 and 11



Size of Home, 28 feet wide by 40 feet long

Unless you request otherwise we furnish for this house brown shingle stain for wall shingles, light tan paint for the body and white paint for the trim.

See Page 4 for cost of heating equipment, plumbing, electric wiring, storm sash, screens and your option of Radio Asphalt Shingles and Oak flooring and finish. Write for suggestions and estimates on a water supply system and sewage disposal for this house.

"The Allerton"—Material Supplied Either Ready-Cut or Not Ready-Cut

Spacious Bungalow with Three Bedrooms

THIS wide, hospitable home has a universal appeal, and the floor plan is so sensible and convenient that it is popular alike in town and country. Beautiful exterior treatment, comfort and conservatism are its dominating notes. It is a type which will always be in good style and a home which, with its wide eaves, broad porch and many windows will always bespeak the comfort of those who live in it.

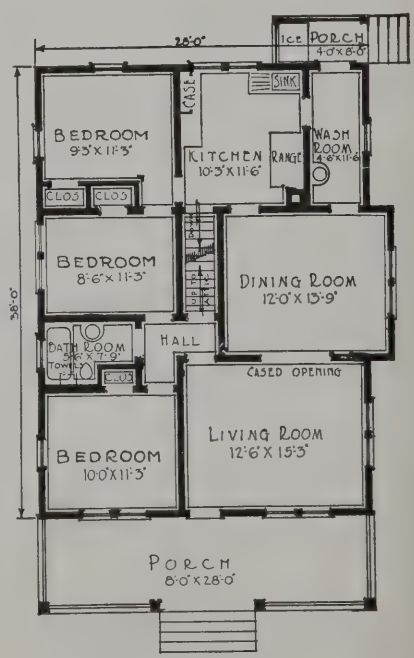
The outside walls are shingled. The belt course, which also serves as a cap for the windows, the timbered brackets supporting the eaves, and the divided upper sash of the windows, give just the proper amount of trim to the exterior. There is a big attic floored over the entire house, giving ample space for storage. The attic stairway leads up from the center hall.

It is hard to believe that so much living space can be obtained in a bungalow of such conservative dimensions. Notice that there are three fine bedrooms, each with its own large closet and plenty of light and ventilation. The front door opens into the fine size living room. As one enters, the big light dining room is seen through the cased opening which connects the two rooms and gives a very spacious effect. The living room has four windows as well as the glazed sash in the door. A small hall opening into the living room permits access to the front bedrooms, the bathroom and the attic stairs. This arrangement gives perfect privacy and quiet to the bedrooms and separates the sleeping quarters from the balance of the house. The rear bedroom has a convenient door into the kitchen.

Notice that the rear entrance is through the washroom, from which doors open directly into the kitchen and dining room. This feature is much appreciated both in town and on the farm, but it is particularly advantageous in the farm home. On such occasions as threshing time, when many extra hands are being fed, they can clean up and pass directly into the dining room without disturbing the kitchen, where the work is always at its height just before the meal is served.

The kitchen is admirably arranged for convenience and ease in getting the work done. The big case, design No. 862 as shown on Page 53, is right by the window. Just across from it, hardly a step distant, is the sink, also lighted by the big twin window. The range is conveniently placed but out of the way. The cellar stairway goes down from the kitchen—much the handiest arrangement.

When you look this plan over carefully and realize the amount of living space contained in it and then look at the dimensions, you will readily appreciate the fact that there is no waste space. Consider the saving in heating over the usual home containing as many bedrooms. This alone is a big item. Homes built from this plan dot the country from New England to California. Everywhere it appeals to the careful, conservative buyer who wants to secure the most comfortable and best looking three-bedroom bungalow for his money.



Size of Home, 28 feet wide by 38 feet long

Unless you request otherwise we furnish for this home, dark green stain for sidewall shingles and white paint for the trim.

See Page 4 for cost of heating equipment, plumbing, electric wiring, storm sash, screens and your option of Radio Asphalt Shingles and oak flooring and finish. Write us for suggestions and estimates on a water supply system and sewage disposal for this home.

See Prices on Pages 1 to 4
Specifications on Pages 10 and 11

"The Maryland"—Material Supplied Either Ready-Cut or Not Ready-Cut

Size of Home, 24 feet wide by 38 feet long

An Especially Pleasing Six-Room Home

FOR attractiveness of exterior and arrangement of interior, few designs compare with "The Maryland." Its individuality and charm are sure to attract the home buyer with the most discriminating taste. The sloping roof broken by the pretty dormer, the full width porch with four sturdy columns, the divided upper sash of the windows and the attractive bevel plate front door, are details of design that make it stand out among its neighbors. Distinctiveness is never obtained in Wardway Homes at the expense of good taste the latter governs always.

The living room is the center of family life, and that room in "The Maryland" provides the necessary elements to make it pleasant—plenty of light, ample space for piano, davenport and library table.

Two of the three bedrooms have closets and windows in adjoining walls. The bath is at the rear of the house and easily accessible from any of the rooms. The rear bedroom may be used for a sewing room or nursery if not needed.

Plenty of room is found in the kitchen for all necessary equipment, with an ideal space for the worktable right under the twin window.

The plans call for a cellar under the entire house, a most desirable arrangement. An enclosed rear passageway is provided, which makes it possible to go direct to the basement without passing through the kitchen, and to go from the kitchen to basement without going outside. Six cellar sash are provided with the home.

Surely a most livable home—good looking, with a practical floor plan—and all at a most reasonable cost.

See Prices on Pages 1 to 4—Specifications on Pages 10 and 11

Unless you request otherwise we furnish for this home, brown stain for wall shingles, Colonial yellow for body and white paint for the trim.

See Page 4 for cost of heating equipment, plumbing, electric wiring, storm sash, screens and your option of Radio Asphalt Shingles and oak flooring and finish. Write us for suggestions and estimates on a water supply system and sewage disposal for this home.

"The Belmont"—Materials Supplied Either Ready-Cut or Not Ready-Cut

Delightful Straight-Line Bungalow Five Rooms at Moderate Cost

THIS fine Bungalow will be sure to please you and it is sold at a price which makes it an exceptional bargain. It is very well arranged and compact, and has all the conveniences and comforts that a small family could wish for. "The Belmont" is of the more conservative bungalow type. Hip roof, wide overhanging eaves and exposed rafter ends create a pleasing effect and help bring out the beauty of straight lines so popular in American architecture.

From the front porch you enter a well-lighted living room which is connected with the dining room by a wide-cased opening. Both of these rooms are well-proportioned and the wide opening between make them appear more roomy than the actual dimensions indicate. The kitchen, connected with the dining room by a swinging door, is also exceptionally light and pleasant. Windows are provided in both the side and rear walls, and in addition, there is a glazed door leading outside. An inside stairway has also been provided leading down to the basement.

The bedrooms and bath all open on a connecting hall, entirely separate from the other rooms of the house. This assures privacy and is an arrangement used in nearly all of our best five-room homes. "The Belmont" will appeal particularly to owners of narrow city lots, as it is only 20 feet in width which permits its being used on the narrow city lots as well as wider suburban lots or in the rural districts. We cannot recommend "The Belmont" too highly as we consider it a fine value at the low price quoted. You will make no mistake if you decide to build this home.

See Prices on Pages 1 to 4
Specifications on Pages 10 and 11

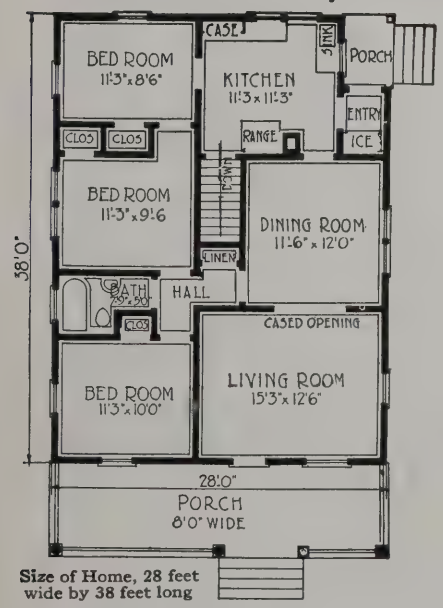
"The Roanoke"—Material Supplied Either Ready-Cut or Not Ready-Cut

This Roomy Bungalow Has Three Bedrooms



Size of Home, 28 feet wide by 38 feet long

ONE has but to glance at this cozy home to be favorably attracted by it. The main house roof has been continued out over the porch. This gives it the hospitable and inviting appearance so desirable in any home. The shingled dormer with its replica of the hip-roof of the house breaks up the roof lines in a very attractive way and adds to the broad, low appearance of the home. The handling of the outside walls is particularly worthy of comment. They are sided up to the belt course, which incidentally takes the place of the top casing of the window frames. From thence to the open cornice, clear red cedar shingles are used. This gives a variety of effect which is especially pleasing on a rather plain exterior.

The front door opens directly into the splendid living room and a cased opening leads on into the dining room. Both of these are fine light rooms of excellent size and proportion. A door leads from the dining room into the center hall which opens into the first and second bedrooms and the bathroom. A linen closet also opens off this hall, such as is shown on Page 52. This linen closet is furnished complete with all shelves, drawers, doors and necessary hardware, and contains sufficient room for all bedding and linen.

Each of the bedrooms has its own closet. The rear bedroom has doors opening into the center bedroom and kitchen. The rear entrance leads on to an enclosed entry which provides room for the ice box, and thence to the back porch. This makes a double door into the kitchen, protecting it amply in cold weather. The kitchen is furnished with our case design No. 862, illustrated on Page 53. This case has plenty of room for all kitchen supplies and has bins, drawers, mixing board and divided utensil drawer with space for all the usual cooking equipment.

The cellar stairs lead down directly from the kitchen to the center of a big cellar excavated under the entire house. We furnish all cellar sash, frames, cellar steps, etc.

For a three-bedroom bungalow, few homes for anywhere near the price can offer half the advantages of this Wardway design.

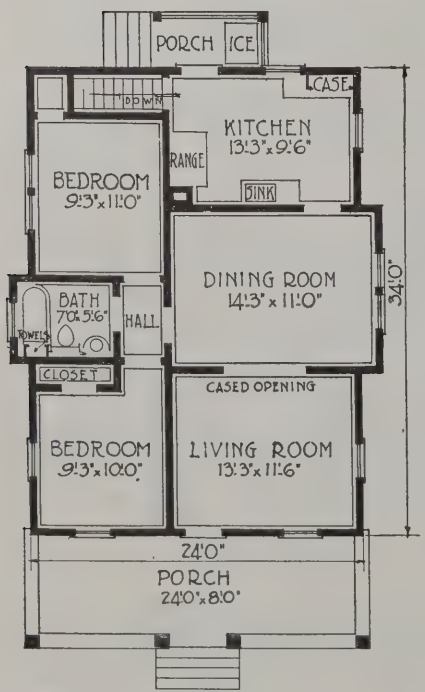
Unless you request otherwise we furnish for "The Roanoke," Gray Stone paint for body, White for trim, Bungalow Brown stain for wall shingles.

See Page 4 for cost of heating equipment, plumbing, electric wiring, storm sash, screens, and your option of Radio Asphalt Shingles and oak flooring and finish. Write us for suggestions and estimates on a water supply system and sewage disposal for this home.

See Prices on Pages 1 to 4
Specifications on Pages 10 and 11

"The Monteroy"—Material Supplied Either Ready-Cut or Not Ready-Cut

An Ever Popular Five-Room Bungalow



Size of Home, 24 feet wide by 34 feet long

THIS one-floor home has all the features which have made the bungalow so popular, and yet is a little more conservative in exterior appearance. A particularly pleasing feature is the dining room extension window with its gable roof breaking up the roof line and adding greatly to exterior appearance and interior comfort. You may screen part or all of the fine porch, making an outdoor living room for summer which will be much appreciated by the entire family.

Inside there is no wasted space, every inch being usable and livable. The front door enters the fine living room, which is lighted by a large window in each outside wall. A cased opening leads into the dining room, throwing the two rooms practically together into one large light room. Observe the careful attention which has been given to wall space in these two rooms. Several different arrangements of furniture are permitted, a fact which will appeal to every housewife.

The kitchen is unusually light, with two windows and the glazed rear door. It is most convenient as well, with our fine pantry case No. 861, illustrated on Page 53, built into the wall. This case includes shelves, drawers, bins, mixing board and plenty of space for all the kitchen utensils and supplies. The door to the cellar steps is adjacent to the door on the rear entry porch, making it convenient to reach from either outside or inside. Space is planned for the ice box on the rear porch, where it is cool and easily accessible from the kitchen and can be iced without the ice man coming into the house.

The sleeping quarters are separated from the rest of the house by the small hall which opens off the dining room. This gives access to both bedrooms and the bathroom, making it possible to enter any of the three rooms without passing through another, assuring privacy and convenience. Each bedroom has its own closet, both of which are of good size. A towel case, such as is illustrated on Page 52, is furnished for the bathroom and contains room for all towels and other bathroom supplies.

The basement is excavated under the entire home. We furnish cellar steps as well as all sash, frames, etc. "The Monteroy" plan makes an exceptionally livable and cozy home, thoroughly in keeping with its surroundings, no matter where it is built.

See Prices on Pages 1 to 4
Specifications on Pages 10 and 11

Unless you request otherwise we furnish for this home, dark brown paint for the body and white for the trim.

See Page 4 for cost of heating equipment, plumbing, electric wiring, storm sash, screens, and your option of Radio Asphalt Shingles and oak flooring and finish. Write us for suggestions and estimates on a water supply system and sewage disposal for this home.

"The Girard"—Material Supplied Either Ready-Cut or Not Ready-Cut

Small, Handsome Home

THE appearance of a home is not necessarily the result of the money spent on it. Careful planning and tasteful designing make the small and inexpensive home as good looking as a larger and much more expensive one. Our "Girard" home is an excellent example of this. Such architectural details as the uneven roof design, wide cornice with returns, the raised roof over the two front windows, the perk little hood over the front entrance with its cornice continued across the front of the house and joining the porch—these things and the setting of the house low on the foundation, while adding very little to the cost, have made a distinctive and unusually handsome home.

The front door leads to the reception hall, from which the stairs rise and from which a cased opening leads into the fine big living room. A coat closet is placed at the end of this hall. The living room is in excellent proportion and contains good wall space for all the usual pieces of living room furniture. It is connected with the dining room by another cased opening, giving each of these rooms the advantage of the light and space of the other.

The kitchen is provided with our case No. 861, built into the wall, and the other fixtures have their places provided, giving an unusually compact and convenient working arrangement, step-saving but comfortably roomy.

French doors open from the living room onto the wide porch—a much appreciated feature. The unusual roof treatment allows ceilings seven feet eleven inches from the floor, and full height windows in the bedrooms upstairs. There is plenty of closet room, and a linen closet such as is shown on Page 52, opens into the hall.

The outside measurements of "The Girard" are only 22 by 24 feet, allowing it to be placed on a small city lot. Still it contains as much living space as many homes of much larger size, and is so distinctive and unusual in its appearance as to appeal to nearly everyone. The window boxes shown in the illustration are furnished with brackets without extra charge.

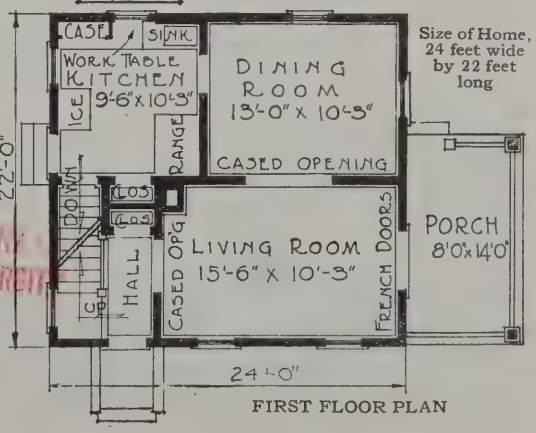
SECOND FLOOR PLAN



Size of Home, 24 feet wide by 22 feet long

FIRST FLOOR PLAN

"The Cordova"—Material Supplied Either Ready-Cut or Not Ready-Cut

A Farm Home of Beauty and Comfort

COMPARE "The Cordova" with the average farm home in your neighborhood—its striking beauty is immediately apparent. It combines the elements of appearance and comfort in a way that appeals strongly to those who long for the convenience of a city home in a story-and-a-half structure.

Consider the charming exterior, the big front porch and the shingled walls above the belt course.

The interior of this wonderful home offers every advantage desired in a town or country home. Besides a bedroom and bath, the first floor includes a large living room and dining room; also a kitchen of ample dimensions, well lighted by a big triple window. Just back of the kitchen is the pantry, equipped with two of our kitchen cases, Nos. 860 and 862, as shown on Page 53. The washroom with separate entry from the rear porch, adjoins the pantry and is worthy of note. Here the men can clean up for meals without using the kitchen sink.

The stairway to the cellar is easily reached from the corner of the kitchen or directly from the rear porch. We furnish all cellar sash and frames.

The first floor bedroom has two windows properly placed with regard both for exterior appearance and space for bed and dresser within.

Upstairs are two more large bedrooms, each having twin Colonial windows. The space within the large front dormer serves excellently as a nursery, storage or sewing room, while the rear dormer lights the upstairs hall and stair landing.

A decision to purchase this Wardway Home is one you will never regret.

Unless you request otherwise we furnish for this home, white paint for the body and trim and dark green stain for the sidewall shingles.

Some of the Beauties and Conveniences Included with Wardway Homes

French Doors

Many Wardway Homes have handsome French doors as illustrated at the left. They are weather-tight, serviceable doors, yet they let in more light than a window and are an attractive room decoration.

Furnished complete with necessary hardware, where shown on plans.

A Handsome Sun Room

Many Wardway Homes are shown with sun porches. The sash are priced extra and can be furnished where desired. Many people consider it the most attractive room in the house.

Unusual Wardway Features

Handsome Stairway

The stairway is usually the most prominent piece of millwork in the home. We are very proud of our stairwork, and you will be too, for not only is it unusually fine workmanship, but all parts are carefully cut and fitted at the mills so the carpenter has only to nail them up.

This feature not only means a saving of many dollars in labor costs—it insures your getting a handsome, finely built stairway.

Fireplace Fittings

Wherever a fireplace is specified in the plan, we furnish a handsome heavy wood mantel shelf as shown in the illustration, dome damper and ash trap. The brick and tile is not furnished because of varying tastes. Write for our Building Material Catalogue for complete line of fireplace equipment.

Built-in Linen Closets

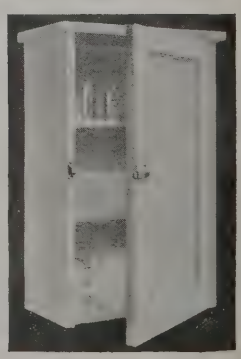
This fine linen closet is furnished complete without additional cost in all Wardway Homes where shown on the plan. It is built right into the wall and has ample room for the bedding, linens and all those odds and ends that are so hard to find room for. It systematizes your housekeeping.

It is three feet wide, six feet eight inches high and one foot six inches deep. Has three big drawers and four shelves.

Reaches you ready to set up, trim and hardware complete.

Towel Case

This towel case is furnished in many Wardway Homes where a linen closet is not provided. Has room for all bathroom supplies. Shipped taken apart, complete with nickeled hardware.



Convenient Kitchen Cases Like These

Are Furnished with Many Wardway Homes Without Extra Cost

No. 860

ONE of the kitchen cases shown here is furnished in practically every Wardway Home. The case which will best fit in the space available in the kitchen is included in the plans to be built right into the kitchen wall and is furnished *complete* at no extra cost.

Each cupboard extends to the ceiling and has five shelves 11½ inches deep. Bottom section of each case includes tilting flour bin which will hold full sack of flour; divided utensil drawer with spaces partitioned off for knives, forks, spoons, etc.; cupboard space for pots and pans, and extra drawers according to size. Removable hardwood mixing board is part of every case. Worktable top is hardwood. Will not nick, cut or scar.

Cases, drawers, doors, etc., are clear fir. Case fronts are shipped glued up. All other parts are cut to fit, bundled and marked. All hardware is included. Plans give complete details of cases, showing just how they fit together.

These handy cases are furnished with Wardway Homes as indicated on the plans. See description of home, which specifies the design furnished.

No. 863

Sturdy, Attractive Doors Like These Are Furnished with Every Wardway Home

For the past several years there has been a strong tendency toward the use of Fir for interior and exterior doors. This is due largely to its beautiful grain and to its exceptional weather resisting quality.

One of the Handsome Fir front doors illustrated below is furnished with each Wardway Home, the choice depending upon which design is most suitable. The interior doors used throughout are the two-panel style shown here.

The doors illustrated are furnished with the beautiful slash grain Fir panels, and White Pine stiles and rails, giving a fine-appearing and sturdy construction.

"Oakland" Front Door

The handsome front door illustrated above is one of the pleasing styles we furnish with Wardway Homes. It is made of first quality Fir slash grain panels and clear White Pine stiles and rails. We furnish this door where it harmonizes with the rest of the home.

Two-Panel Door

This fine-appearing, two-panel, strictly "A" grade door is furnished for the interior of your Wardway Home. The panels are slash grain Fir, a wood of great natural beauty, and the stiles are made of clear White Pine. Makes a strong and dependable door.

"Pacific" Front Door

On some homes, a plain front door harmonizes with the general appearance better than a somewhat more elaborate one. In such cases we furnish the door shown above. It is made of "A" quality slash grain Fir panels and clear White Pine stiles and rails

Outside Lock Set

This handsome front door lock set of solid bronze, finished in antique copper, is furnished for nearly all Wardway Homes. Workmanship is excellent, design beautiful and quality unsurpassed. Fitted with night latch. Guaranteed.

Inside Lock Set

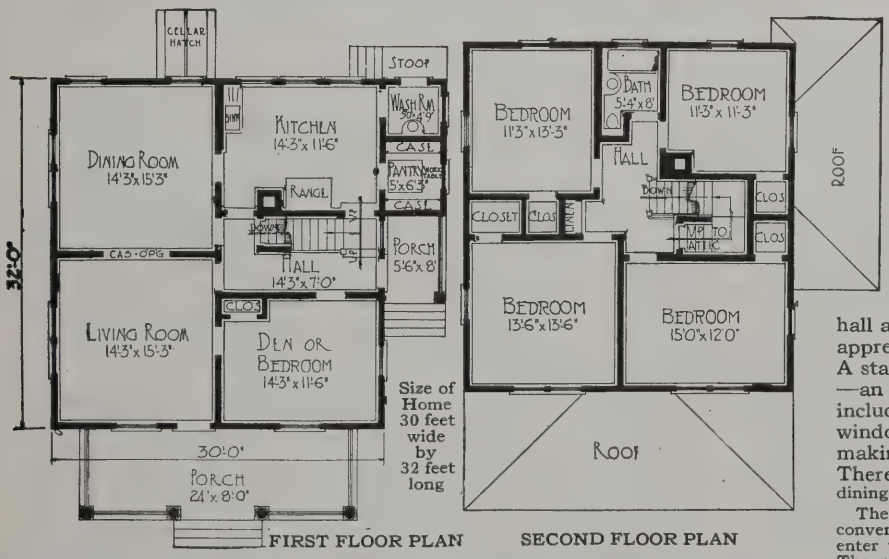
This strong, well-designed lock set in antique copper finish is furnished for all interior doors in Wardway Homes. A simple, plain design, it will always look well and is easily cleaned.

Bathroom Lock Set

The outside of the lock set furnished for bathrooms matches other interior sets. The inside is nickel plated and equipped with convenient thumb latch. This is typical of the care given details in Wardway Homes.

"The Miami"—Material Supplied Either Ready-Cut or Not Ready-Cut

A Farm Home of the Most Practical Kind



THIS home represents a combination of all those features desired by most farm folks. The large living room is a feature which everyone wants. You will notice the dining room also is large—in fact unusually so. This is to accommodate the frequent farm guests and the threshing crew in the summer. The extra room for den, bedroom or farm office is a necessity for the farm home. A fine room has been provided for this purpose.

The side entrance and the side hall are perhaps the most unique and best appreciated feature of the whole house. A stairway also leads up from the kitchen—an added convenience. "The Miami" includes a fine big kitchen. Its triple window extends clear across the back, making it practically as light as a porch. There is plenty of room here for a big dining table if it is wanted.

The rear entrance is through a washroom, convenient for the outdoor workers, who need not enter the kitchen before they are ready to eat. The pantry is completely lined with cases and worktables, the design being a combination of those shown on Page 53. Cellar steps lead down from the hall under the main stairway.

Upstairs are four big bedrooms, each having its own closet and each having windows in opposite walls, securing the best of light and cross ventilation. The bathroom is convenient to all bedrooms and the linen closet is a feature which every woman wants in her home. Illustration of this closet is shown on Page 52 of this book. The attic is floored, steps leading to it from the upstairs hall. There is an outside hatchway entrance to the cellar at the rear. "The Miami" has proven one of our most popular Wardway designs for the country home.

Unless you request otherwise we furnish for this home, cream paint for the body and white for the trim.

See Page 4 for cost of heating equipment, plumbing, etc., and your option of Radio Asphalt Shingles and oak flooring and finish. Write us for suggestions and estimates on a water supply system and sewage disposal for this home.

See Prices on Pages 1 to 4—Specifications on Pages 10 and 11

"The Michigan"—Materials Furnished Either Ready-Cut or Not Ready-Cut

One of Our Most Popular Bungalows

IN looking over the many designs of homes which are illustrated throughout this book, one is almost certain to hesitate when they reach the "Michigan."

We will venture to say that you have never seen a home quite like it. This is because very few homes have had the great amount of thought and care used in designing them that our architects have expended on this unusual bungalow.

How much the two well proportioned, correctly placed dormers add to this home can little be appreciated. Without them the home would present a low, squatty appearance which would greatly lessen its unusual charm. The dormers, however, are but one of the many features which set this home apart and far above the usual bungalow designs.

Notice how perfectly this home is balanced with its beautiful front entrance door, flanked on either side by side lights designed to match perfectly with the door. On each side of this entrance are two twin windows; and you will note that the upper sash of the windows are divided in the same manner as the glass in door and side lights.

Seldom will you find a home with such a spacious porch. It extends the full width of this home; and you can well imagine what a comfortable spot this provides for whiling away the warm summer evenings. The interior is equally as attractive as the exterior. The living room is exceptionally large, with a fine fireplace at one end which adds so much to the comfort and cheerfulness of any home. The dining room is connected with the living room by a wide cased opening, and especially bright and cheery with its three large windows.

The kitchen is just the right size and conveniently arranged, thereby eliminating extra steps and unnecessary work. Our fine built in kitchen case No. 861, shown on Page 53, is furnished, and provides ample storage space for dishes and other kitchen utensils.

Can you imagine a more convenient and compact arrangement of bedrooms and bath? Not an inch of floor space has been wasted, and yet both rooms have ready access to the bath and good closet space in addition. Each bedroom has an abundance of light, and fine cross ventilation is provided by the windows in opposite walls.

Another feature which should not be overlooked is the fine attic which this home affords. This extends the full width of the home and is completely floored, making an ideal space for storage, children's playroom, for drying clothes, or similar uses. Stairs to the attic are placed directly over those going to the basement and lead up from the corner of the dining room. The two dormers and windows in each gable furnish ample light. It seems to us that you would go a long way before finding a better value in a five-room bungalow than is offered in our "Michigan."

Size of Home,
34 feet wide by 28 feet long

Thoroughly Satisfied—Saved Several Hundred Dollars

"We certainly are a satisfied Wardway Home owner. We are very much pleased with the building materials in our Florence home. Everything was in first class shape. We know we saved several hundred dollars by purchasing our home from you.

"Your ready-cut system saves much time and labor expense. We recommend your Wardway Homes to anyone wishing to purchase a home.

"We wish to thank you for the saving you have made us, and hope that others will give you the same chance." Homer Lefler, Macomb, Ill.

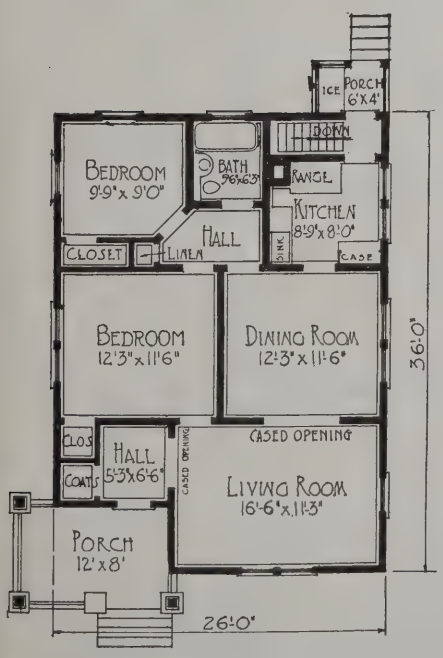
Printed with Mr. Lefler's permission.

Unless you request otherwise, we furnish for the "Michigan" cream paint for side walls below the belt course, white for trim, and dark brown for shingles in gable ends.

See Page 4 for cost of heating equipment, plumbing, electric wiring, storm sash, screens, and your option of Radio asphalt shingles and oak flooring and finish.

"The Berwyn"—Material Supplied Either Ready-Cut or Not Ready-Cut

Pleasing Five-Room Bungalow, Unique Design



Size of Home, 26 feet wide by 36 feet long

THIS cozy home will well repay careful consideration. The more you study it the more you will be impressed with its pleasing exterior, its convenient, attractive arrangement and the genuine economy of space and money.

The partly inset porch makes the otherwise plain exterior unusually attractive, besides being a most comfortable addition to the home. You enter a square reception hall off which is a coat closet. The cased opening leads into a splendid living room which runs across the front of the house. This is connected with the dining room by a cased opening which adds to the spaciousness of the effect. A door leads directly from the living room to the front bedroom. This room is also entered from the hall which leads to the rear bedroom and bathroom. Observe that a linen closet is provided off this little rear hall. Each bedroom has its own closet. There is none of the congested effect so often found in bungalows of this general design. There is plenty of room and the skill of the architect has provided that the sleeping quarters are entirely removed from the rest of the home.

A swinging door connects dining room and kitchen, the latter being perhaps the most thoughtfully planned room in the home. Notice that kitchen case design No. 860, illustrated on Page 53, is built into the wall nearest the dining room. The sink also is near the dining room door. Standing in front of the range you may reach the sink simply by turning around, while the case is but a step away. The cellar steps, leading down from the rear entrance, bring the vegetable and fruit reserve stores very near. The rear porch provides a sheltered cool place for the ice box, where it is out of the way yet accessible.

Because it owes its good looks and convenience to fine design and proper planning, this is one of the most economical homes possible to build.

See Prices on Pages 1 to 4—Specifications on Pages 10 and 11

Unless you request otherwise we furnish for this home, light brown paint for the sidewalls and white for the trim.

See Page 4 for cost of heating equipment, plumbing, electric wiring, storm sash, screens and your option of Radio Asphalt Shingles and oak flooring and finish. Write us for suggestions and estimates on a water supply system and sewage disposal for this home.

"The Oakland"—Material Furnished Ready-Cut or Not Ready-Cut

Two-Bedroom Bungalow Unique in Plan

HOW often have you wished for a home with the many delightful features contained in our "Oakland" design.

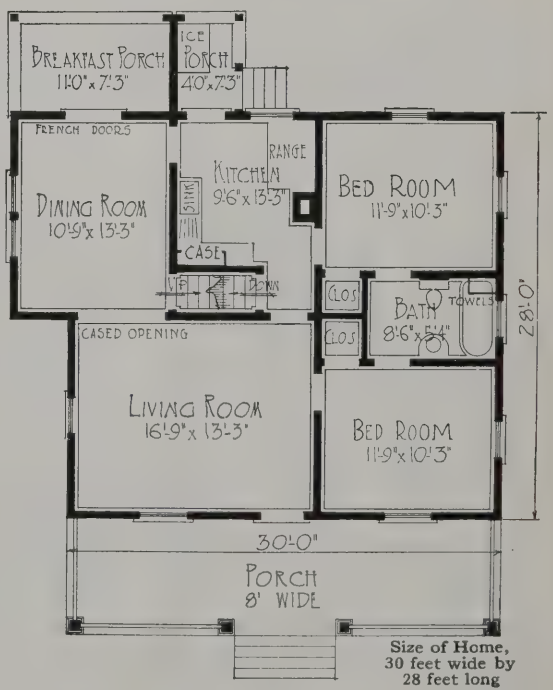
We believe you will agree that it would be hard to improve on the exterior appearance of this home. Everything seems to be in just the right proportion and to blend in perfectly together. The long sloping bungalow roof lines are broken by a well-designed double window dormer. The front porch is unusually large and pleasant with its open baluster rail and heavy square columns. The projecting dining room wall, the unique treatment of outside wall with siding below and special spaced shingles above the belt course all combine to make this a very attractive bungalow home.

We know this home will have a special appeal for those who love the out-of-doors as it has that delightful feature, a breakfast porch. This opens from the pleasant dining room through double French doors and is so convenient to the kitchen that breakfast can be served there as easily as in the dining room. This however is but one of the charms of "The Oakland" as every room is spacious, airy and pleasant. The kitchen with sunlight streaming in through the glazed door and window is so arranged that it has ventilation from all four sides. Sink and worktable which includes our kitchen case No. 861 shown on Page 53 stand at right angles to one another, a perfect arrangement for the "one-woman" kitchen. The basement stairs are centrally located and convenient to both kitchen and living room.

Just imagine what a pleasant living room this will be—so unusually large and well planned to take care of furniture. Note how the dining room, opening towards the left, seems quite a part of the living room yet has the privacy so often lacking in the small home. A stair leads from the dining room up to the spacious attic.

The two bedrooms open directly from the living room and kitchen. Each has windows in two walls giving fine cross ventilation and is provided with a good size closet. The bath between them opens into both.

"The Oakland" is a charmingly distinctive little home and it is little wonder that it is a popular choice among Wardway Home owners.



Size of Home, 30 feet wide by 28 feet long

Unless you request otherwise we furnish for "The Oakland," Gray Stone paint for body, White for trim, Bungalow Brown stain for wall shingles.

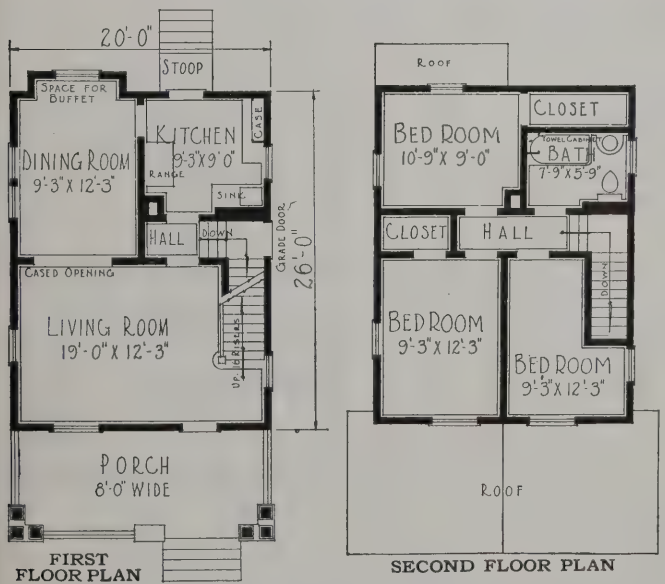
See Page 4 for cost of heating equipment, plumbing, electric wiring, storm sash, screens, and your option of Radio Asphalt Shingles and oak flooring and finish. Write us for suggestions and estimates on a water supply sytem and sewage disposal for this home.

See Prices on Pages 1 to 4

Specifications on Pages 10 and 11

"The Pinehurst"—Material Supplied Either Ready-Cut or Not Ready-Cut

Handsome Home of Stucco, Half Timbered



Size of Home, 20 feet wide by 26 feet long

Unless you request otherwise we furnish for "The Pinehurst", Dark Brown paint for trim. Sidewalls are stucco.
See Page 4 for cost of heating equipment, plumbing, etc., and your option of Radio Asphalt Shingles and oak flooring and finish. Write us for suggestions and estimates on a water supply system and sewage disposal for this home.

STURDY and substantial, "The Pinehurst" is a HOME in every sense of the word. It has the charm of individuality, for although the combining of stucco and half timber is popular, it is still unusual enough to be distinctive. Every detail—the steep roof with its wide barge boards and supporting brackets, the broad windows, the hooded porch with its massive brick pedestals and grouped pillars—is architecturally perfect.

The entire front of the house is one big, pleasant living room, with graceful open stair at one end and light from three sides. Almost a part of it is the dining room, well lighted by a mullioned window, and with an alcove which makes an effective setting for the buffet.

The kitchen deserves special attention, for it is so practical a plan. The window and glazed door bring it light from two sides, so stove, sink and worktable (our kitchen case, No. 861, shown on Page 53) have direct light at all hours of the day. A door into the entry gives access to basement stairs, grade door and living room, bringing the kitchen within a few steps of the front door, yet shutting out its sounds and odors.

The three large bedrooms are carefully arranged with the best of ventilation from windows on two sides and wonderfully large, roomy closets that will delight every housekeeper. The bath, at the head of the stairs, is directly over the kitchen, which simplifies and lessens the cost of plumbing.

The basement is excavated under the entire house, and we furnish all sash and frames.

See Prices on Pages 1 to 4
Specifications on Pages 10 and 11

"The Iowa"—Materials Supplied Either Ready-Cut or Not Ready Cut

A Practical Six-Room Home

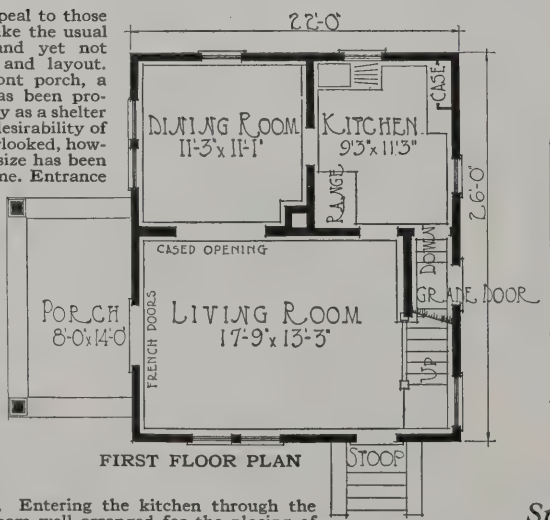
THIS design will appeal to those desiring a home unlike the usual run of buildings, and yet not freakish in appearance and layout. Instead of the usual front porch, a simple entrance hood has been provided, which serves merely as a shelter for the front door. The desirability of a porch has not been overlooked, however, and one of a good size has been added at the side of the home. Entrance to the porch is effected through the pair of French doors at the end of the living room.

Note the usual treatment of dormers, which protrude on each side of the home and break the otherwise plain, monotonous roof lines.

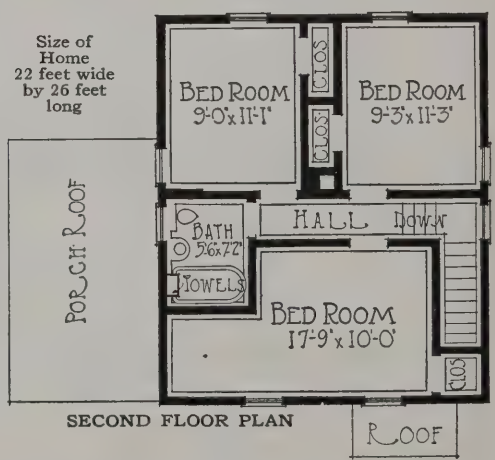
The interior layout provides six spacious rooms and bath. The living room is unusually large; the dining room directly at the rear, connected by a wide cased opening, is an exceptionally light, airy room with its three large windows. Entering the kitchen through the swing door, we find a room well arranged for the placing of necessary equipment. The sink has been located directly beneath the rear wall window; and our fine built in kitchen case No. 861, shown on Page 53 has been included.

Beautiful semi-open stairs leads to the second floor, where three large pleasant bedrooms are arranged, each with a good size closet.

Build this home, and you will build for the future. The design will never be out of date, and it will look well in any surrounding. Here is individuality, good appearance, comfort and economy.



FIRST FLOOR PLAN



SECOND FLOOR PLAN

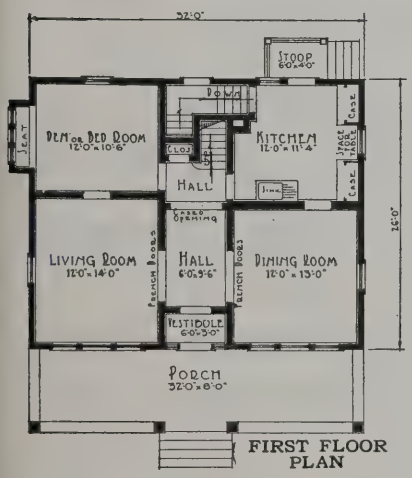
ROOF

See Prices on Pages 1 to 4
Specifications on Pages 10 and 11

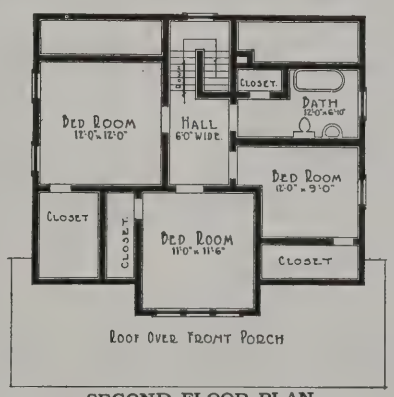
Unless you request otherwise, we furnish for the "Iowa," cream paint for the side walls below the belt line, white for the trim, and dark brown for the side wall shingles.

"The Hamilton"—Material Supplied Not Ready-Cut Only

A Handsome Two-Story Bungalow



FIRST FLOOR PLAN



SECOND FLOOR PLAN

Size of Home, 32 feet wide by 26 feet long

THE HAMILTON offers you all the charm and attractiveness of a bungalow design without the sacrifice of any of the features found in the larger homes. The long sloping roof broken only by the splendid dormer, gives a most pleasing, artistic effect. The porch carried under the main roof line extends the full width of the house, and because of its solid boxed rail offers a splendid opportunity to screen at small cost. The wide cornice together with the exposed rafter ends of the main roof and dormer, unite to give this home a most handsome exterior.

Attractive features of this home are the triple windows in living room, dining room and den, evidences of the fact that Wardway designers are most appreciative of the value of light and air in these rooms. Entering through a vestibule into the hall, one views the living and dining rooms on opposite sides through beautiful French doors. Each of these rooms is splendidly planned to receive the usual furniture.

As the visitor enters the hall the open stairway at the extreme back of the house is visible through a handsome glazed door, providing an effect which is usually found only in the largest and most expensive homes.

Back of the living room note especially the room with the cozy window seat. This will always prove a most livable, enjoyable room, an attractive den or extra bedroom.

The kitchen is unusual in that built-in cabinets with a worktable occupy space along one entire wall, an arrangement which gives an unusually large amount of storage space for utensils and food supplies. A window directly above the worktable insures a supply of light just where it is needed. Convenient spaces are provided for the sink and range. Four steps lead down to the grade door opening onto an entry from which the steps to the cellar descend.

Three bedrooms and bath upstairs all join a central hall. Every housewife will be delighted with the number of closets in "The Hamilton." There is one in each of the bedrooms, a linen closet in the bathroom and a small coat closet at the foot of the stairs on the first floor.

The remarkably handsome interior of this home, equipped with beautiful French doors, elaborate kitchen cases, handsome open stairway and three sets of triple windows, is typical of the completeness of Wardway Homes.

See Prices on Pages 1 to 4
Specifications on Pages 10 and 11

Unless you request otherwise, we furnish brown paint for the body and ivory for the trim of "The Hamilton."

See Page 4 for cost of heating equipment, plumbing, electric wiring, storm sash, screens, and your option of Radio Asphalt Shingles and oak flooring and finish. Write us for suggestions and estimates on a water supply system and sewage disposal for this home.

"The Stanton"—Supplied Either Ready-Cut or Not Ready-Cut

A Substantial Seven-Room Home

IF YOU want to obtain the greatest possible value for your investment, you will decide on the square type of home. The square house is the most economical to build. It is compact, making it convenient for the housewife, and it is the easiest type of home to heat.

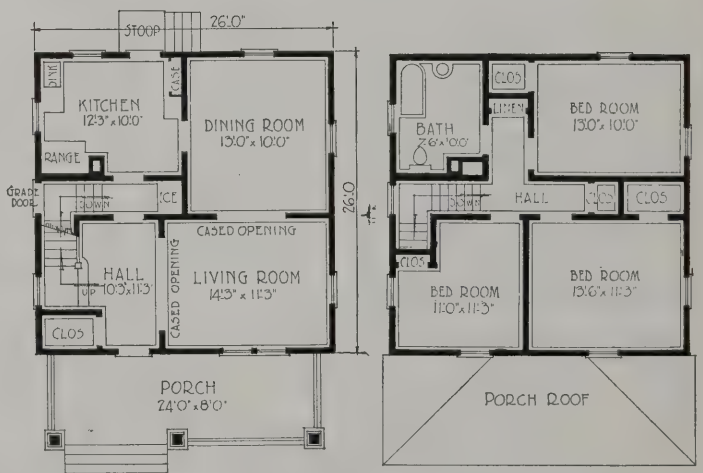
Many square homes are plain and unattractive, but not "The Stanton." A well-proportioned dormer breaks the otherwise plain roof lines, and a substantial 8-foot porch extends the full width of the home.

The floor plan arrangement provides seven light pleasant rooms and bath. The small reception hall, the living room and dining room are practically thrown together by the wide-cased opening, giving them a much more spacious appearance than otherwise would be possible.

The kitchen is connected with the dining room by means of a swinging door. But another door through the entry also connects it with the reception hall, giving easy access to the front door and stairs. The cellarway also leads down from the entry with a grade door at the landing. The kitchen is convenient size with ample wall space for stoves, sink and work table. Space for the kitchen range is provided at the side of the chimney, and our kitchen case No. 861, shown on Page 53, is included and conveniently placed near the dining room door. Windows on both sides and an outside door provide excellent ventilation.

The second floor is just as well arranged as the first. The bathroom has been located directly above the kitchen, which permits of the most economical installation of plumbing. Each of the three bedrooms has a good sized closet, and, in addition, the plan calls for one of our fine built-in linen closets on Page 52 of this catalogue. You will notice that each bedroom has cross ventilation provided by windows in opposite walls, and yet the thoughtful placing of doors and windows leaves plenty of space for the bedroom furniture.

If you want a square home that is space-saving and convenient, a home that combines the very best of architectural designing and one which can be built economically, you should by all means choose "The Stanton." It will be a constant source of pride and satisfaction to you.



FIRST FLOOR PLAN SECOND FLOOR PLAN

Size of Home, 26 Feet Wide by 26 Feet Long

See Prices on Pages 1 and 4
Specifications on Pages 10 and 11

Unless you request otherwise, we furnish for "The Stanton," gray paint for sidewalls and white for trim.

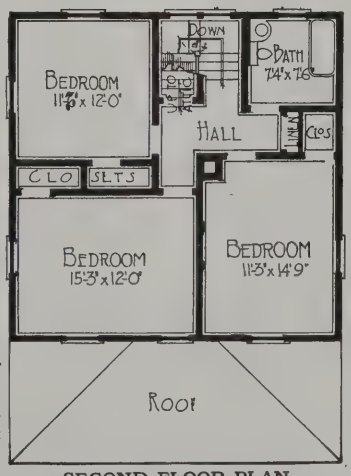
See Page 4 for cost of heating equipment, plumbing, etc., and your option of Radio Asphalt Shingles and oak flooring and finish. Write us for suggestions and estimates on a water supply system and sewage disposal for this home.

"The Montville"—Material Supplied Either Ready-Cut or Not Ready-Cut

Four Big Bedrooms in This Handsome Home

FIRST FLOOR PLAN

Size of Home 28 feet wide by 28 feet long



SECOND FLOOR PLAN

Unless you request otherwise we furnish for this home, cream white paint for the sidewalls and white for the trim.

See Page 4 for cost of heating equipment, plumbing, electric wiring, storm sash, screens, and your option of Radio Asphalt Shingles and oak flooring and finish.

THERE is a substantial dignity in the handsomely designed and well built square house which makes it an ever popular type and a type always in style. To this advantage is added the maximum of room and the greatest possibilities for convenient arrangement.

Before studying the floor plan of our "Montville" home, note the little architectural touches which make it distinctive. The broad eaves on the dormer, house and porch are the dominating note. They give it that solid, substantial appearance so greatly sought. The excellent spacing of the windows is worthy of comment. The porch baluster extending from the ground to the rail seems to give the house a particularly sturdy setting. These are things which do not cost any more money but which make all the difference in the world in the appearance of the home. The broad front porch adds as much to the comfort of the home as it does to the appearance.

The room arrangement is splendid. Windows in all walls give the utmost light and ventilation. The living room and dining room are connected by a six-foot cased opening which makes the front of the house practically one big room. The arrangement of doors makes it easy to get from one room to the other with the fewest possible steps, a great feature in saving housework.

Notice that the kitchen is equipped with our case No. 861 shown on Page 53—to be built in the wall, with room for all the necessary kitchen equipment. The rear entry is a particularly handy feature, furnishing a convenient yet secluded space for the ice box, and providing a double door for the kitchen which keeps out cold and drafts in winter. The downstairs bedroom may be used as a den or library if desired.

Upstairs the three bedrooms are all fine large rooms, each with its own closet. There are no cut-up ceilings or walls in these rooms. Each of them has the much desired cross ventilation, also plenty of wall space for the furniture. At the end of the hall you will find a built-in linen closet, the entire material for which we furnish—doors, drawers, shelves, etc., as illustrated on Page 52. The attic is floored over the entire house and the back stairs lead up from the hall.

Although the dimensions of our "Montville" home permit its being built on a very medium sized lot, it contains as much room as many homes which cover a great deal more ground and cost several times as much money.

See Prices on Pages 1 to 4—Specifications on Pages 10 and 11

"The Elmwood"—Material Supplied Either Ready-Cut or Not Ready-Cut

A Favorite Five-Room Home

THE simplicity of this bungalow home is its chief charm. The low roof broken by the dormer, extends out over the porch, making it really a part of the home, and not just an afterthought tacked on, as are so many porches. The cornice is open, leaving the rafter ends exposed—a pleasing craftsman note.

The plan includes large living room and dining room, two fine bedrooms and kitchen. The living and dining rooms are connected with a wide cased opening which gives each room the advantage of the light and space of the other, but separates them distinctly. The living room is lighted by three windows and the glazed front door, making it exceptionally cheery and cool in summer, yet allowing plenty of wall space for the furniture. The dining room has two windows and a handy closet at the rear.

Each bedroom has two windows and its own big closet. They are unusually large sleeping rooms for this size house.

The kitchen is just as carefully planned and thoroughly equipped as our most expensive houses. The sink and range are placed close to each other so the work can be done handily; and the pantry case and ice box are opposite, only a step away. The case shown on the plan is our No. 861 design, illustrated on Page 53. It is built right into the wall and has plenty of cupboard space, drawers, tilting flour bin, divided utensil drawer, mixing board—in fact it is a complete pantry right in the kitchen.

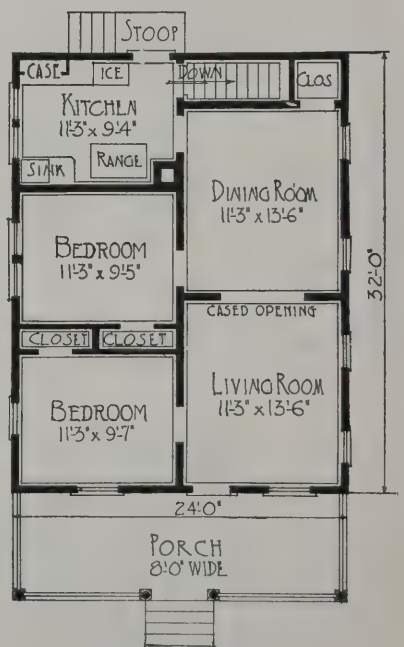
The outside door and cellar door are placed close to each other—so the cellar is handy both from outdoors and indoors.

This design fits on a small lot and makes an ideal home for a small family. It is also much in demand as a farm home and as a farm tenant home. Its low cost, fine appearance and adaptable plan have made our "Elmwood" a favorite in every state of the Union.

See Prices on Pages 1 to 4—Specifications on Pages 10 and 11

Unless you request otherwise we furnish for this home, gray paint for the body and white for the trim.

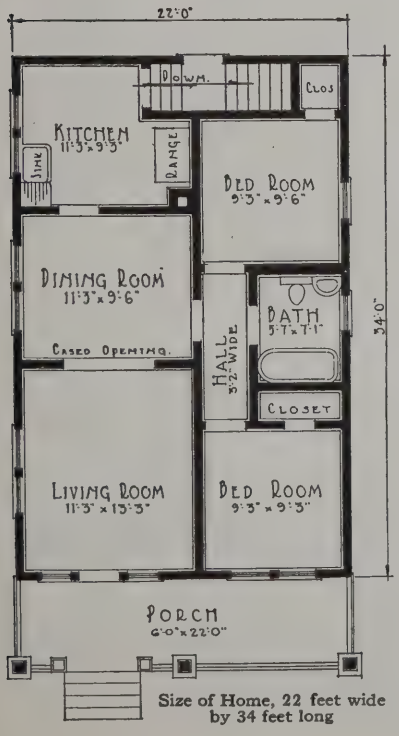
See Page 4 for cost of heating equipment, plumbing, electric wiring, storm sash, screens, and your option of Radio Asphalt Shingles and oak flooring and finish. Write us for suggestions and estimates on a water supply system and sewage disposal for this home.



Size of Home
24 feet wide by 32 feet long

"The Florence"—Material Supplied Either Ready-Cut or Not Ready-Cut

A Distinctive Five-Room Cottage



Size of Home, 22 feet wide by 34 feet long

THE FLORENCE is one of our favorite Wardway designs and is planned to give you the utmost comfort and convenience at a very moderate cost. These shingled walls, the broad, comfortable porch, the exposed rafters and sturdy brackets on the porch gable, are most charming. These features no doubt have contributed to the great popularity of "The Florence." The Colonial door and quaint Colonial windows also add their part, giving a particular touch of style which makes it just a little different from the ordinary house.

The rooms are all of good size, well proportioned and properly lighted and ventilated. You will note throughout the various Wardway Home designs shown in this book that particular attention has been paid to ventilation and lighting features. Entering the beautiful glazed front door, flanked by windows on either side, you gain the impression of an unusually large room because of the large cased opening, which has the effect of combining living and dining room yet really preserves their separate identity.

A small hall separates the bedrooms and bath from the rest of the home. Sleeping rooms with easy access to the bath and bathroom secluded from the other rooms of the home, is the ideal arrangement. Note that Wardway designers have not overlooked the necessity of a good size closet in each of these bedrooms.

The kitchen has a most convenient place for the stove, while a twin window furnishes light for sink and worktable. The combined rear and grade entrance, which is but three steps below the level of the kitchen floor, makes it possible to take supplies in and out of the basement without going into the kitchen. The ceiling is 8 feet 4 inches high.

In every way "The Florence" is planned to give you the utmost comfort and convenience, with a most attractive exterior at a very moderate cost.

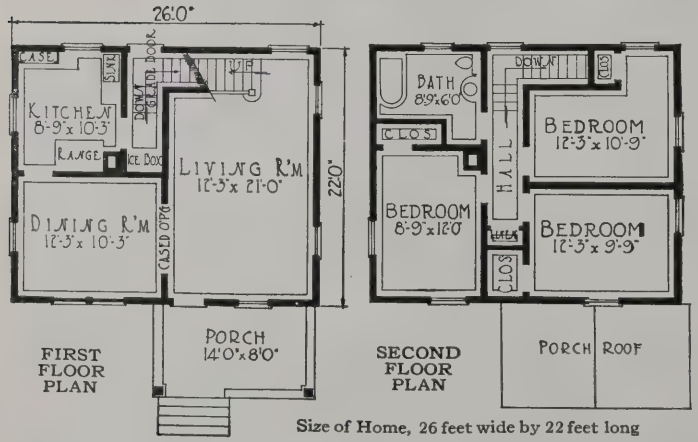
See Prices on Pages 1 to 4—Specifications on Pages 10 and 11

Unless you request otherwise we furnish for this home, bungalow brown shingle stain for all sidewall shingles and white paint for the trim.

See Page 4 for cost of heating equipment, plumbing, electric wiring, storm sash, screens, and your option of Radio Asphalt Shingles and oak flooring and finish. Write us for suggestions and estimates on a water supply system and sewage disposal for this home.

"The Forsythe"—Material Supplied Either Ready-Cut or Not Ready-Cut

A Home Economical to Build



Size of Home, 26 feet wide by 22 feet long

THE FORSYTHE is another one of our Wardway designs which has met with popular favor. It is an ideal home for the average family, combining so many of the essential features, such as a large living room, three spacious bedrooms and bath and an artistic, cozy front porch. These are the details which always appeal to the purchasers of this home.

It is a handsome two-story, three-bedroom home, combining all the things which make for convenience and comfort but with all unnecessary features eliminated, making it one of the most economical homes in size and number of rooms ever designed.

The outside walls are covered with siding up to the belt course, and from there to the cornice covered with clear red cedar shingles. Paint for the siding and stain for the shingles are furnished.

The front door leads directly from the comfortable porch into the living room—a splendid big room which occupies half of the entire downstairs, and is well lighted by four big windows and the glazed front door. Excellent wall space is provided for furniture. Stairs go up from the rear of this room.

The dining room opens through a cased opening from the living room, and is of splendid proportions. The kitchen, at the rear of the dining room, is provided with kitchen case design No. 861, as shown on Page 53. The small size of the kitchen is a great asset, for the various fixtures fit into their proper place and can be reached with a minimum of steps. Space for the ice box is provided at the end of the entry hall, where it is easily reached from outside and from the kitchen. It is out of the way and can be iced without entering the kitchen. Convenience is gained and expense saved by combining grade door and rear entrance.

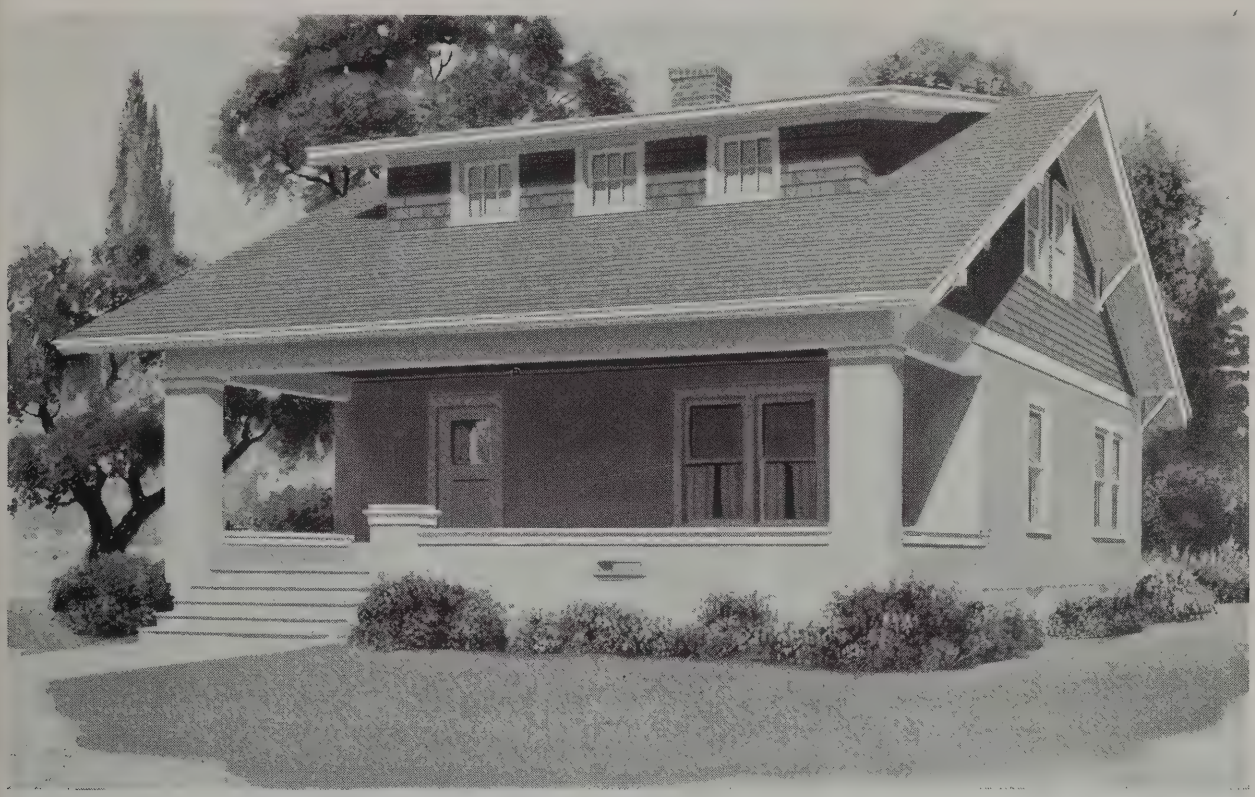
Three fine bedrooms are provided upstairs, each with two fine windows furnishing cross ventilation. Each has its own big closet. The bathroom is of ample size and there is a linen closet at the end of the hall.

Although our "Forsythe" home only occupies the small space of 22 by 26 feet, and is consequently very reasonable in price, not one of the rooms is cramped or small. In fact there is an air of spaciousness about the whole place which belies the small outside dimensions.

Unless you request otherwise we furnish for this home, grass green stain for wall shingles, ivory paint for the body and white for the trim.

See Page 4 for cost of heating equipment, and your option of Radio Asphalt Shingles and oak flooring and finish. Write us for suggestions and estimates on a water supply system and sewage disposal for this home.

See Prices on Pages 1 to 4—Specifications on Pages 10 and 11



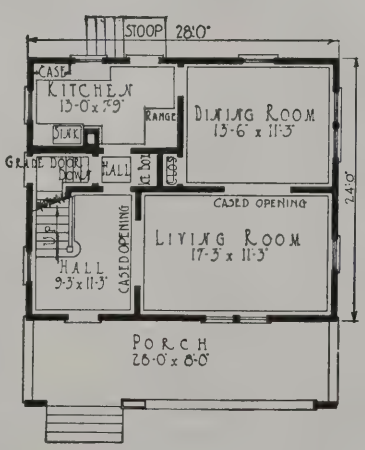
"The Waverly"—Material Supplied Either Ready-Cut or Not Ready-Cut

Three-Bedroom Stucco and Shingle Bungalow

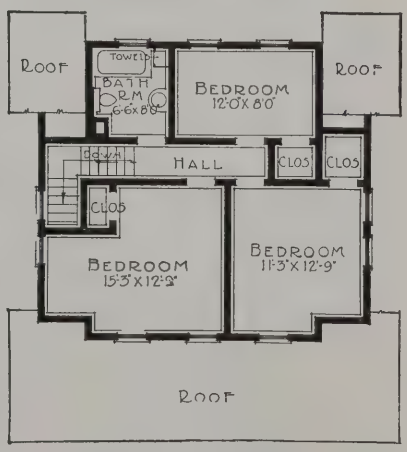
THE wealth of room in this fine home is a constant source of surprise to all who see it. The front and rear dormers break up the plain roof line and add a distinctive touch to the exterior—also providing for full height ceilings on the second floor except for the small cut-offs in the front bedrooms at the side of the dormer, where the ceiling slopes down to a height of 5 feet 6 inches at the wall.

The exterior is stucco on Byrkitt sheathing up to the belt line. From here up it is covered with shingles over shiplap and building paper. The unusually wide cornice is supported by handsome timber brackets.

Downstairs the front door leads into the big reception hall from which the stairs rise. Cased openings connect the hall and living room and the living room and dining room. The latter two are splendid big rooms, each with three windows, and wall spaces carefully calculated for all the usual pieces of furniture. There is a convenient closet opening into the dining room.



FIRST FLOOR PLAN



SECOND FLOOR PLAN

Size of Home, 28 feet wide by 24 feet long

The kitchen is connected with the front hall by a little hallway which furnishes room for the stairs leading down to the grade entrance. Here there is room for the ice box, where it is convenient and can be iced without entering the kitchen. The kitchen is provided with our kitchen case No. 862 and work-table directly under the rear window. A side window throws direct light on the sink. The arrangement of kitchen fixtures is one which makes for great convenience and ease of working.

Each of the two front bedrooms upstairs has three windows. The back bedroom has two. Each bedroom has its own closet. There is plenty of room in each bedroom for the usual furniture. The bathroom is provided with a towel cabinet such as is shown on Page 52.

For those who desire fine appearance and comfort without sacrifice of economy, our "Waverly" home has a strong appeal.

Unless you request otherwise we furnish for this home, bungalow brown stain for dormer and gable shingles, white paint for trim. Walls below belt are stucco.

See Page 4 for cost of heating equipment, plumbing, electric wiring, storm sash, screens and your option of Radio Asphalt Shingles and oak flooring and finish.

"The Norwood"—Material Furnished Either Ready-Cut or Not Ready-Cut

A Roomy Home of Attractive Design

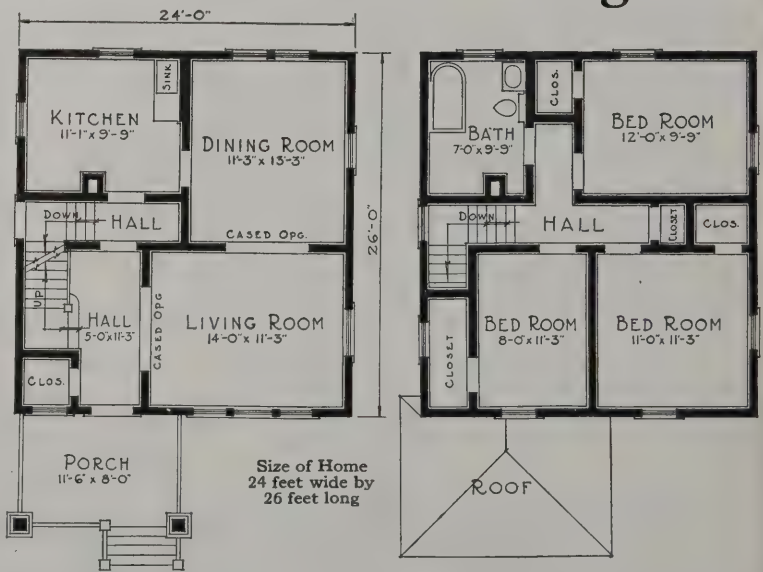
IN "THE NORWOOD" the usually severe lines of the square hip roof house are skilfully broken by the well planned porch and the handsome roof dormer. Other worthy architectural touches are the use of the decorative brackets supporting the closed cornice of the main roof, as well as the dormer and porch roofs, and the slight flare given the shingled sidewalls over the belt course. The spacing of the windows is admirable. While retaining the features of economy and convenience, which make the square house a very popular type, there is no sacrifice of beauty.

The convenience of the plan is entirely in keeping with the general excellence of "The Norwood." To the left of the front door as one enters the hall, is a roomy coat closet, well lighted by a high window. The stairs go up from the hall and a wide cased opening leads into the finely proportioned living room. A door connects with the rear hall which leads on into the kitchen. There is space at the head of this hall for the ice box in a position entirely out of the way yet easily accessible. The entrance to the kitchen and cellar is through the grade door, so that the refrigerator may be iced without entering the kitchen. The large dining room is lighted by three windows, the arrangement of windows and doors giving plentiful space for the furniture. Notice that the kitchen is lighted by two windows, while the living room has a large triple window in the front and a fourth large window in the sidewall.

Upstairs are three fine bedrooms and a large bathroom. Observe the abundance of closets. There is a large one opening into each bedroom and an extra closet in the hall. The closet off the smaller of the two front bedrooms is lighted by a full sized window, and is so large that it can also be used as a dressing room if desired. Each of the bedrooms has cross ventilation, yet there is plenty of wall space for all necessary furniture.

For a house of its size "The Norwood" offers an unusual number of excellent features. It is one of the most satisfactory homes that we have ever designed and will well repay your careful study.

See Prices on Pages 1 to 4
Specifications on Pages 10 and 11

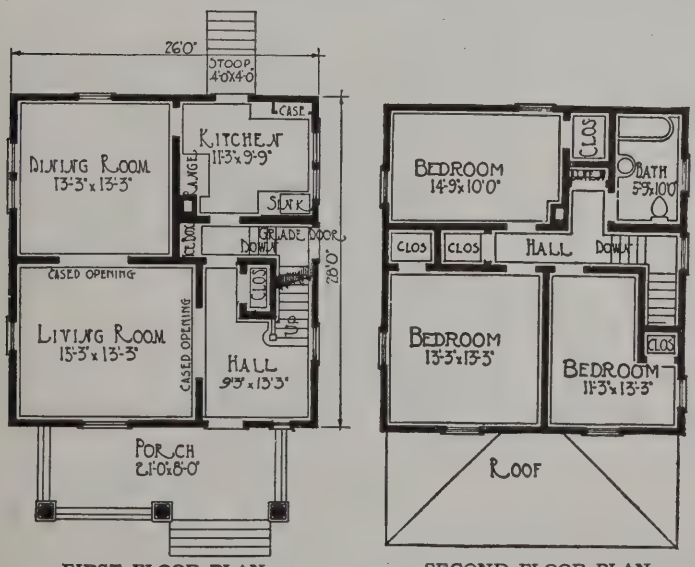


Unless you request otherwise we furnish for this home, cream paint for sidewalls below belt, white trim and brown shingle stain for wall shingles.

See Page 4 for cost of heating equipment, plumbing, electric wiring, storm sash, screens and your option of Radio Asphalt Shingles and oak flooring and finish. Write us for suggestions and estimates on a water supply system and sewage disposal for this home.

"The Shirley"—Material Supplied Either Ready-Cut or Not Ready-Cut

A Comfortable Two-Story Stucco Home



FIRST FLOOR PLAN — SECOND FLOOR PLAN

Size of Home, 26 feet wide by 28 feet long

Unless you request otherwise, we furnish white paint for the trim of "The Shirley." Walls are of stucco.

See Page 4 for cost of heating equipment, plumbing, electric wiring, storm sash and screens. Write us for suggestions and estimates on a water supply system and sewage disposal for this home.

THIS dignified, conservative home with square lines, hip roof and wide eaves, is a very popular type, embodying as it does economy of space, good looks and the utmost in comfort. The walls are stucco. The porch columns rest on foundations of cement blocks which harmonize with the stucco walls.

The plan inside can hardly be bettered for convenience, usable living space and economy. The front door opens into the big reception hall, from which the steps lead to the upstairs. To the left the wide cased opening leads into the living room, and at the rear a door connects with the small hall which leads on into the kitchen, making direct communication possible from kitchen to front door and on upstairs without disturbing the occupants of living room or dining room. A large closet for coats and wraps is provided in this hall.

The living room is lighted by two big windows and is of fine proportions, providing generous wall space for all the necessary living room furniture. Three big windows give exceptional light to the dining room, which is comfortably large and has fine wall space.

The kitchen is provided with our fine wall case design No. 861, illustrated on Page 53, providing room for all the supplies and equipment of the kitchen. A rear door opens onto a stoop. The cellar steps, leading down to the grade entrance, are handy both to kitchen and front hall.

The upstairs is devoted to three fine bedrooms and the bathroom. Notice how unusually large two of the bedrooms are, and the third is a very good size room. Each bedroom has two windows in opposite walls, permitting cross ventilation, and each has its own closet. There is an extra closet opening from the hall, also a linen closet such as is illustrated on Page 52. This unusual amount of closet room appeals especially to the housewife.

By referring to the price columns you will see that although you obtain six big rooms with all the necessary conveniences, the price is unusually low and the house does not cover much ground. These features combine to make it one of the most popular Wardway sellers.

See Prices on Pages 1 to 4
Specifications on Pages 10 and 11

"The Superior"—Material Supplied Either Ready-Cut or Not Ready-Cut

Popular Home with Large Living Room

A HOME of stately beauty. The simple, straight lines, the perfect harmony of the hip roof and dormer, the wide, closed cornice and large porch create an impression of lasting dignity unsurpassed by any other type of house architecture. The use of a belt course and the proper placing of the many large windows remove this home from the class of the commonplace square house. The bay window in the dining room admits a flood of light which adds immensely to the attractiveness within.

The spacious living and dining rooms connected by a large cased opening are the especially attractive features of this home. These two rooms, in which the family spends practically all of its waking hours while at home, should be light, well ventilated and well arranged. In "The Superior" they have these and many other desirable qualities.

A fine pantry opens off the kitchen. It is large enough to hold all the food supplies for the average size family on the farm or in town. The range fits nicely into the corner between the pantry and dining room entrance, while the opposite corner offers a light, well ventilated location for sink and worktable. From one corner of the kitchen, stairs lead down past a handy grade entrance to the cellar. We furnish the cellar stairs and windows.

At the end of the living room the stairway leads to the well lighted second floor hall, from which any of the three bedrooms and bath are accessible. These bedrooms are planned to give the maximum amount of comfort, each having a good size closet and two windows in adjoining walls. The bath has a handy linen closet.

If you want a home with plenty of room, economical of space and convenient, you will find it in our "Superior."

FIRST FLOOR PLAN

Size of Home
24 feet wide by
26 feet long

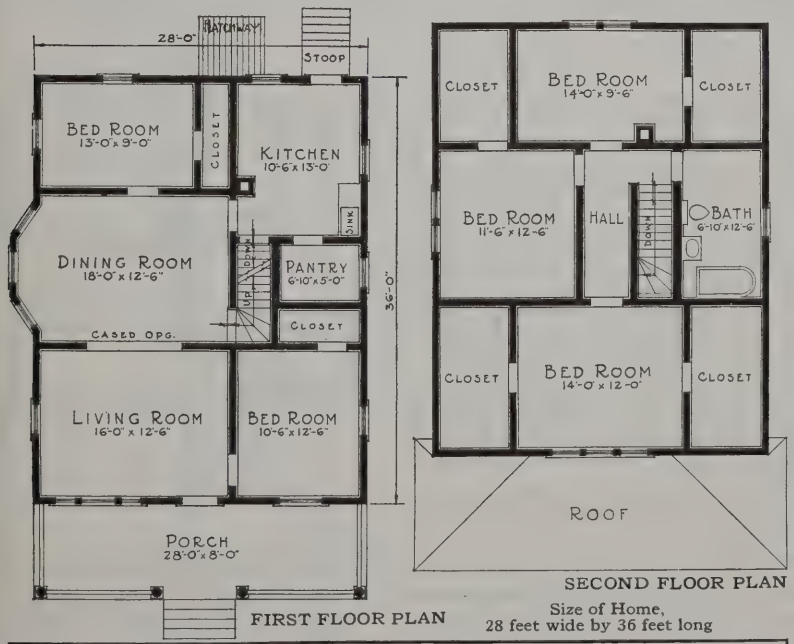
SECOND FLOOR PLAN

Unless you request otherwise we furnish for this home, light tan paint for the body and white for the trim.

See Page 4 for cost of heating equipment, plumbing, etc. Write us for suggestions and estimates on a water supply system and sewage disposal for this home.

"The Ohio"—Material Supplied Not Ready-Cut Only

Five Bedrooms in This Bungalow Home



FIRST FLOOR PLAN

SECOND FLOOR PLAN

Size of Home,
28 feet wide by 36 feet long

A HOME of most interesting exterior appearance, perfect proportions and designed in the very best taste. A porch the full width of the house with four handsome, round columns, the broad roof with return cornice and the well-placed bay window, combine to give this home an air of dignity equalled only in the individually designed houses.

Nothing is more depressing than a home whose interior is forever dark because of an insufficient number of windows. Twenty-two windows, a beautiful front door glazed with bevel plate and a glazed rear door, make this one of the cheeriest, best lighted homes that you will find anywhere.

Two bedrooms downstairs and three upstairs make it ideal for the farm, when plenty of reserve sleeping quarters are desirable, or for the city man with a large family.

The living and dining rooms are both large, pleasant rooms with a wide cased opening between. The kitchen is extremely well arranged with space for sink and worktable where they will get an abundance of light. Do not overlook the handy cellar entrance and the fine large pantry containing over 30 square feet. Here is ample space to store the supplies necessary for the larger-than-average family.

The basement is reached from the outside through a convenient hatchway near the rear entrance.

If you need plenty of room, well arranged and combining the very best of architecture, you cannot go wrong in selecting "The Ohio."

Unless you request otherwise we furnish for "The Ohio," Colonial Yellow for the body and White paint for the trim.

See Page 4 for cost of heating equipment, plumbing and quality lighting fixtures.

Specifications on Pages 10 and 11

"The Clarendon"—Material Supplied Either Ready-Cut or Not Ready-Cut

True Bungalow, Planned on Conservative Lines

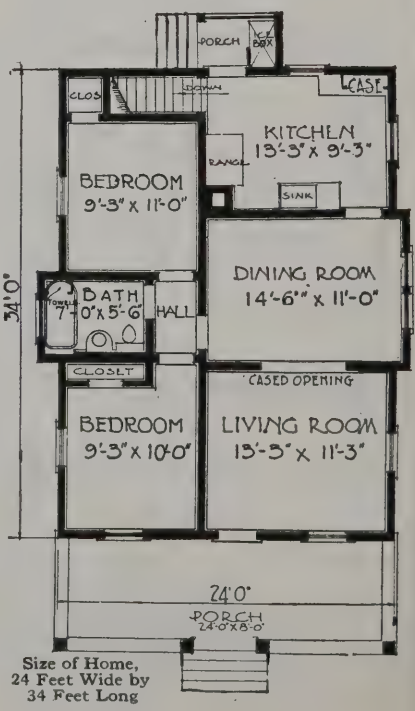
NOWADAYS, when the bungalow is made an excuse for so many extreme and ofttimes outlandish effects, it is a relief to see a home of this type—simple and straightforward in design—owing its good looks to its lines and proportions rather than to freakish trimmings. The broad, low roof extending out over the porch with its open cornice, is a particularly effective feature, relieved as it is by the front dormer. The bay window extending from the dining room not only increases the size of that room, but by breaking up the line of the sidewall enhances the appearance of the home. The porch rail is sided clear to the ground line.

The plan is a model of convenience and comfort. The front door opens directly into the fine general living room, which is in turn connected with the dining room by a cased opening. From the dining room a door opens into the little central hall which connects both bedrooms and bathroom. By this arrangement the bedrooms are each kept off from the rest of the house yet accessible. It is unnecessary to go through either to reach the bathroom. Each bedroom has two windows and its own closet.

The kitchen is large for this size home and very carefully planned for the comfort, convenience and efficiency of the housewife. It is well lighted by the glazed rear door and by two windows which are in opposite walls, making for a cool, pleasant kitchen no matter how hot the weather. In the corner of the room is placed a built-in cupboard case and worktable. This case extends from floor to ceiling and provides shelves, drawers, bins and cupboard space for all the necessary kitchen utensils and kitchen supplies. It is case No. 861, illustrated on Page 53, and is completely furnished with all necessary hardware at no extra cost. The worktable top and cutting board are of hard, close grained wood which will not mar nor absorb dirt.

The cellar steps lead down from the kitchen at a point handiest to the outside door. Towel case such as is illustrated on Page 52, is furnished for the bathroom. The cellar is excavated under the entire house, and we furnish all necessary cellar sash, frames, etc.

See Prices on Pages 1 to 4—Specifications on Pages 10 and 11



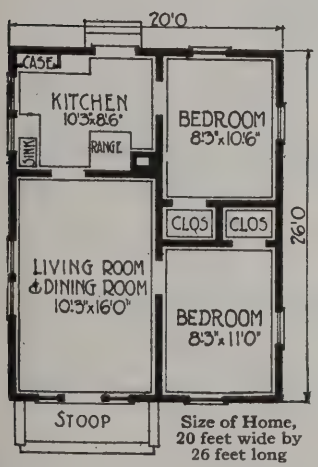
Size of Home, 24 Feet Wide by 34 Feet Long

Unless you request otherwise, we furnish for this home, light tan paint for the sidewalls and light slate for the trim.

See Page 4 for cost of heating equipment, plumbing, electric wiring, storm sash, screens, and your option of Radio Asphalt Shingles and oak flooring and finish. Write us for suggestions and estimates on a water supply system and sewage disposal for this home.

"The Glendale"—Material Supplied Either Ready-Cut or Not Ready-Cut

Remarkable Value in a Four-Room Home



Size of Home, 20 feet wide by 26 feet long

ONE is immediately impressed by the unique and handsome front entrance with which this little home is provided. The front door sidelights and the sloping hood supported by sturdy brackets, lend a spirit of warm hospitality seldom found even in homes costing even more.

The low, sloping roof with its overhanging cornice and wide barge board is very pleasing. The effect of the outside wall sided to the belt, with shingles laid plain above, is to be commended in a home of this size, as it makes it appear larger than it really is.

The large living and dining room contain enough space for the comfortable accommodation of all necessary furniture. It is well lighted by a large twin window on the side and windows on either side of the front door.

Each bedroom has two windows in adjoining walls, which will always provide air circulation. A closet of good size opens from each bedroom.

The kitchen has a double window over the sink, giving plenty of light where it is needed. Our kitchen case No. 861, shown on Page 53, is located so that the worktable gets an abundance of light from the rear door, which is glazed with double strength glass. A convenient space is provided for the range.

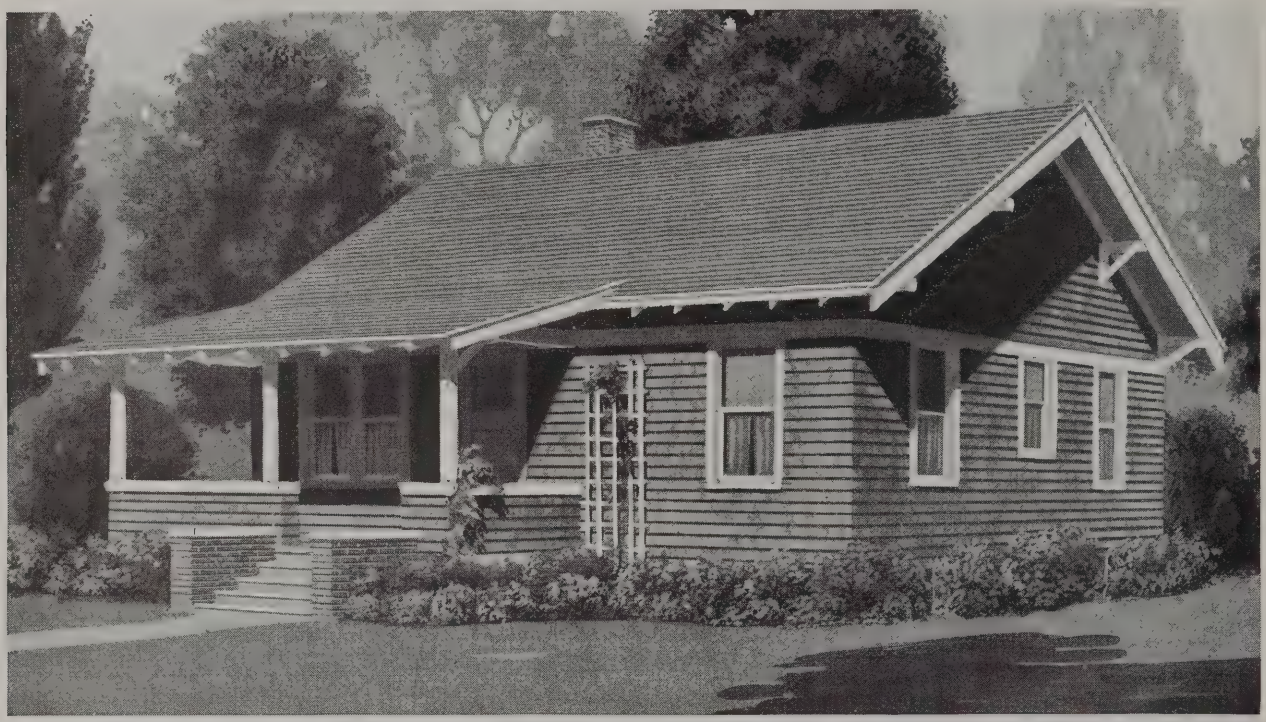
For the low price quoted you get the same high grade specifications as on our high priced homes. Without question our "Glendale" is one of the greatest values you could possibly find in a small, well designed, well arranged, fine appearing home.

NOTE: Unless you request otherwise we furnish for "The Glendale," White paint for the body and trim and Brown stain for the wall shingles.

See Prices on Pages 1 to 4—Specifications on Pages 10 and 11

A Wardway Home for Your Home

Are you a renter with a vacant lot or some ready money in a savings account? If so, figure what you pay a year for rent as interest on an investment at 6%. Do you pay $20 a month or $240 a year? If so, have you figured this is 6% on $4,000? Now turn to any $1,000 Wardway Home shown in this book. From $2,200 to $2,500 will pay for any ordinary lot and erect such a home complete with furnace heat, good modern plumbing and electric lights. Taxes, insurance and incidentals will run from $3 to $4 a month. Why pay 6% on $4,000 in the form of rent? And if you are paying more than $20 a month the comparison is still worse—$25 a month means 6% on $5,000. How would the $1,000 home, built with modern improvements, compare with what you are getting for $20? Why let a landlord use you for an investment? You have some money saved? You have some reasonably certain position? You would like to feel the satisfaction and added confidence which come from ownership? Then why not act? If you are industrious, steady, live within your means—a bank or a building and loan, your employer or some acquaintance is ready to loan you a reasonable amount. You can arrange this credit easily yourself and keep in your pocket what any time payment plan has to charge for investigating the credit of thousands who do not buy. A Wardway Home will help accomplish the remainder. Result—cashing in on your own investment; a greater confidence and self-satisfaction and a true realization of that highest desire and aim—a real home—a place to keep your loved ones.



"The Marengo"—Material Supplied Either Ready-Cut or Not Ready-Cut

A Handsome and Convenient Bungalow

THE low, sweeping roof of this home and the shingled walls, give it the cozy, inviting appearance so much desired in a bungalow. This effect is increased by the wide steps flanked by the shingled buttresses. The careful designing to give this Wardway Home the most convenient room arrangement and to utilize every possible inch of floor space is evident in the floor plan. From the big porch one enters directly into the living room. Although there are four windows in this room, giving an abundance of light and air, still there is plenty of wall space for furniture. A broad cased opening directly opposite the front door gives an effect of distance which makes both rooms appear even larger.

The kitchen, which adjoins the dining room, is compact and splendidly planned. The housewife can get a meal with very few steps, as sink, case and range are within reach when one stands in the center of the floor. The case is our No. 861, illustrated on Page 53. It contains shelves, drawers and bins for all kitchen equipment and supplies, and is furnished without extra charge to be built right into the wall. Notice the twin window which gives ample light for both sink and worktable. The grade door combines an outside entrance with a cellarway entrance.

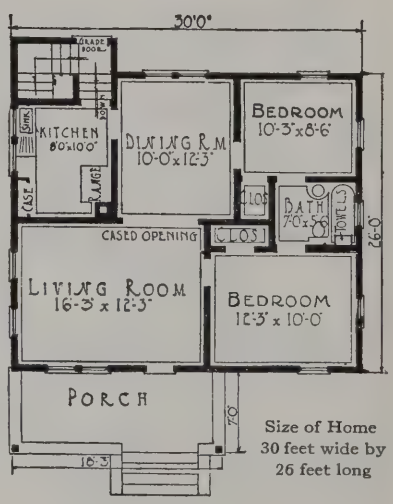
Both bedrooms are of ample size and are square, without cut-up walls or ceilings. Each has a closet and the bathroom between is in the most convenient place. The towel case as shown on Page 52, is furnished for the bathroom.

The more you study this plan the more its good points will appeal to you. Although it covers very little ground space, its walls enclose five fine, livable rooms, their arrangement leaving nothing to be desired in the way of privacy, convenience and comfort. For instance, notice how the doors are placed to give the maximum of wall space together with the easiest communication between all rooms. This house is very easy to heat.

The porch is easily screened and adds an outdoor living room for the summer. For those desiring a summer home more finished than the usual small cottage, our "Marengo" design has a particular appeal, but it is ordinarily occupied the year round as a dwelling for the small family.

Why not invest your savings in this homey little bungalow? If you have a lot and have saved a little money, your building and loan association will advance you enough to build this home and you can pay back the loan as you would pay rent.

See Prices on Pages 1 to 4—Specifications on Pages 10 and 11



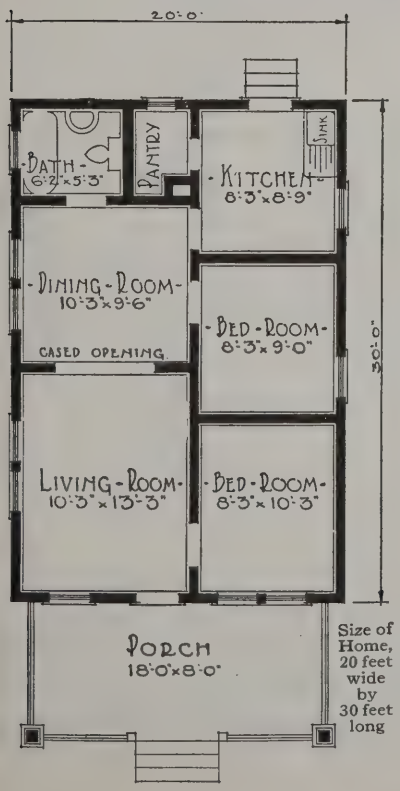
Size of Home 30 feet wide by 26 feet long

Unless you request otherwise we furnish for "The Marengo" Brown stain for the wall shingles and White paint for the trim.

See Page 4 for cost of heating equipment, plumbing, electric wiring, storm sash, screens and your option of Radio Asphalt Shingles and Oak Flooring and Finish. Write us for suggestions and estimates on a water supply system and sewage disposal for this home.

"The Lawndale"—Material Supplied Either Ready-Cut or Not Ready-Cut

A Charming Five-Room Bungalow



Size of Home, 20 feet wide by 30 feet long

OUR "LAWNDALE" is one of the popular five-room homes of the bungalow type. It has a most attractive exterior with its divided light Colonial windows and bungalow front door to match. The roof is of a low pitch, which harmonizes well with the bungalow home. A large front porch, more spacious than ordinarily found on a small house, is another feature worthy of consideration. The shingled sidewalls, favored by so many buyers, add distinctiveness to the home. This shingle effect has also been carried out in the porch column pedestals, which is somewhat unusual. Picture this cozy little bungalow, with its brown stained shingle wall and trimmings painted pure white, as your home. It surely is a home of which you could well be proud.

On entering the home we find a spacious living room connected with the dining room by a wide cased opening. This tends to give the effect of one exceedingly large room, yet each preserves its individual identity. Both rooms are well lighted by twin windows. Two bedrooms provide ample sleeping quarters for the average family and Wardway designers have made them of practical size. The bathroom is convenient to each. The fine kitchen with its handy pantry will appeal to the housewife. Shelves may be arranged in the pantry to care for the usual kitchen equipment and supplies.

The ceiling height is eight feet. The plan, the quality of materials and the very low cost of building "The Lawndale," commend it to every prospective home builder. It is an excellent example of the economies of Wardway construction, whether bought ready-cut or not ready-cut. You get a house which is distinctly a home, and you get it without any unnecessary items of expense or "extras," on which some dealers depend for profits.

This is a point well worth your special attention. When you buy "The Lawndale" or any other Wardway Home, you buy the entire house at one time. We guarantee each home to be complete with your original purchase.

See Prices on Pages 1 to 4
Specifications on Pages 10 and 11

Unless you request otherwise we furnish for this home, bungalow brown stain for the sidewall shingles and white paint for the trim.

See Page 4 for cost of heating equipment, plumbing, electric wiring, storm sash, screens, and your option of Radio Asphalt Shingles and oak flooring and finish.

"The Illinois"—Material Supplied Either Ready-Cut or Not Ready-Cut

A Substantial Eight-Room Home

THE strong, simple lines of the exterior and the comfortable, commonsense arrangement of rooms combine to make this an exceedingly popular home. The 30-foot front porch with its large round columns and a boxed rail will be a favorite gathering place for the family on summer evenings. The portion directly in front of the dining room could be screened at small cost.

The spacious living room and dining room are lighted by a large triple window and separated by sliding doors which make either room private and permit considerable fuel economy, as the dining room may thus be partitioned off on cold winter nights.

The large kitchen is an attractive feature, particularly on the farm, where heavy demands are made upon it at certain times of the year. Across the small hallway from which the steps lead to the second floor is a first floor bedroom, highly appreciated always because it makes an ideal nursery, sewing room or den, if it is not needed as a bedroom.

Four roomy bedrooms upstairs with a fine hall with linen closet, provide ample sleeping quarters for the average family. Each of these bedrooms has good light, cross ventilation and closets—desirable in every bedroom. The stairway to the attic is in the hall—a most convenient location.

Our plans provide for a cellar under the entire house, giving ample room for furnace, fuel, fruit, storage and laundry. We supply cellar sash and frames.

"The Illinois" is a home which meets in every way the requirements of the farmer or city man with a large family.

THIS stately square Home is an exceptional value. Its large pleasant living room with open staircase at one end is indeed delightful and provides plenty of space for a big family. Opening from the living room through a wide arch is the bright well-lighted dining room with its three big windows and swinging door leading to the kitchen.

Notice how well the kitchen is planned. It is flooded with light through the twin windows and glass in rear door. The stove, sink and built-in case No. 861 as shown on Page 53 with its fine worktable are but a step apart. From the kitchen three steps lead down to a convenient grade door entrance and from there another short flight of steps leads to the basement. A door from kitchen to living room provides a short cut to front door and upstairs rooms.

Three pleasant well-lighted bedrooms and bath comprise the second floor. Each bedroom has two or more windows and a fine large closet. The bath is provided with towel case as shown on Page 52 and you will find that placing this room directly above the kitchen means a substantial saving on plumbing.

The exterior of "The Colby" is as well designed as the interior is perfectly planned. The straight hip roof with its massive dormer, the broad porch with its sturdy columns, the divided upper sash windows and the side walls with siding below and stained shingles above give "The Colby" a distinctive charm seldom found in a home which can be built for such a moderate cost.

See Prices on Pages 1 to 4
Specifications on Pages 10 and 11

"The Huron"—Materials Furnished Either Ready-Cut or Not Ready-Cut

A Distinctive Home, Exceptionally Well Planned

IT IS the square type of home which appeals to the greatest number of home buyers. This is not to be wondered at, as this style of home gives more value for the money invested than any other you might build. Square lines mean economical construction costs, simple and attractive design, and large rooms well arranged for the placing of interior furnishings.

To say that a home of square lines can not be attractive, would be foolish, when you consider the effective way in which our architects have worked out the construction and arrangement of this beautiful home pictured above.

We want to call your particular attention to the wide spreading exposed eaves of the porch, dormer and main roof of the home. Each is designed with just the proper amount of overhang and the right pitch, and is in perfect proportion to the building. Any tendency toward plainness in the appearance of this home has been eliminated by varying the construction of the side walls, using siding and corner boards below the belt course, with stained shingles above. The windows are also provided with divided light upper sash, which adds one more attractive feature to the exterior.

The wide, roomy front porch is something which should not be overlooked, as this will be especially appreciated during the warm summer months. The double column roof support is rather unusual, and still further sets this home apart from the usual run of plain, ill proportioned square dwellings.

On entering the home, you are at once delighted with a spacious living room which is connected with the dining room by a wide cased opening. Directly back of the dining room is the kitchen, which is provided with our fine built in kitchen cabinet No. 860, shown on Page 53. Notice how conveniently the kitchen is connected with the basement and outdoors by the grade and cellar stairway.

On the second floor of the home, a well lighted hall connects the three bedrooms and bath. Careful planning has provided each bedroom with ample closet space, and an abundance of light and ventilation is afforded by two large windows in each room.

Our built in linen closet, shown on Page 52, is also furnished with this home, and is a feature which will be greatly appreciated by the housekeeper as it provides an ideal storage space for linens and bedding. How seldom is a feature of this kind found in homes quoted at the price asked for the "Huron" design.

If you contemplate the erection of a new home and want to obtain the greatest possible value for your investment, this home surely deserves your favorable consideration.

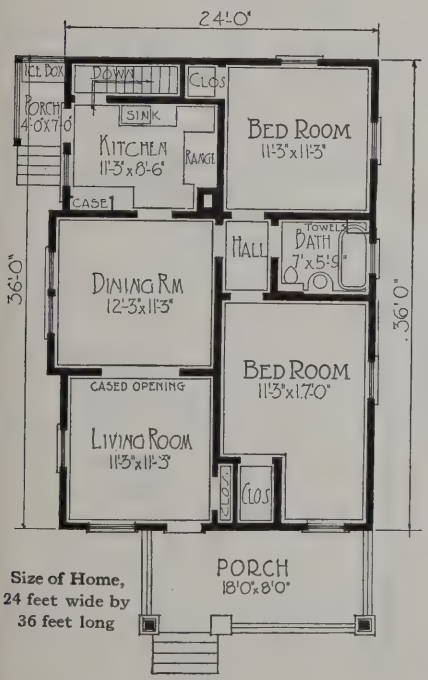
"The Birchwood"—Materials Furnished Either Ready-Cut or Not Ready-Cut

A Most Popular Five-Room Home



Size of Home, 24 feet wide by 36 feet long

THE "Birchwood" certainly looks like a real home with its broad, comfortable lines so characteristic of the bungalow style of architecture. It certainly combines a most attractive exterior with a remarkably convenient and well arranged interior, and is a home which one might be proud to build in any community.

The home has many unique features which lend to it individuality, and set it apart as a home very unlike the usual run of bungalows.

The windows have been furnished in the two-light design, made exceptionally wide, and seem to fit in perfectly with the general design of the home. The wide belt course above the windows, which also serves as a cornice frieze board, is rather unusual, as is also the construction of the porch with its roof combined with the main roof of the home. Large stone buttresses have been designed as porch column supports, and these seem to be in exact keeping with this sturdy and substantially constructed part of the home.

Our architects have eliminated what would otherwise be a long plain wall space by the projecting bay in the dining room, which not only adds greatly to the appearance of the home, but at the same time increases somewhat the size of the dining room.

A covered back porch is also provided with latticed panels on each side, giving privacy and a shelter for the back door.

The interior is very well planned. The living room is of good size, with a handy cloak closet just inside the front door. The dining room is even larger, and the wide cased opening between these rooms permits their being used practically as one when the occasion demands. The kitchen, which is connected with the dining room by means of a swing door, is provided with our kitchen case No. 861, shown on Page 53. This gives convenient storage space for dishes and other kitchen utensils.

Both bedrooms and bath are entirely separated from the other rooms of the home, and all open onto a connecting hall. This is an excellent arrangement and gives the much desired privacy for these rooms of the home. Each bedroom has two windows, which gives cross ventilation and an abundance of light. The front bedroom is particularly spacious, and the little nook at the front makes an excellent space for the baby's crib or a fine sewing corner.

The more you study this home, the more you will be won by it. Viewed from every angle, it is sure to give solid comfort, while the unusually attractive price at which it is quoted indicates its economy.

Unless you request otherwise, we will furnish for the "Birchwood," pure gray paint for side walls, and white for trim.

See Page 4 for cost of heating equipment, plumbing, electric wiring, storm sash, screens, and your option of Radio asphalt shingles and oak flooring and finish. Write us for suggestions and estimates on a water supply system and sewage disposal for this home, if your location requires these.

"The Ardmore"—Supplied Either Ready-Cut or Not Ready-Cut

Attractive Shingled Cottage—Five Rooms

IF YOU are looking for a five-room Bungalow of moderate size, attractive in appearance and with an ideal floor plan, you will find it in "The Ardmore." This home has been planned in a 22-foot width which permits its being built on a narrow city lot, as well as the wider suburban lots or in the rural districts. No matter where it is built, it is certain to look well and to be in keeping with its surroundings.

Its exterior appearance will please the most critical. The wide-spreading eaves, the broad, well-designed dormer and the porch with its short columns give this home an appearance of stability. The shingled side walls and porch under the main roof of the home are also in keeping with the true bungalow design. We know the fine appearance of this bungalow will be a constant source of pride and satisfaction to its owner.

The interior arrangement provides the same floor plan used in a number of our best five-room homes. All rooms are of ample size, pleasant and well lighted. The arrangement of bedrooms and bath, all on one connecting hall, is especially desirable. You will note a handy grade entrance at the rear with enclosed stairs to basement.

If you desire a five-room bungalow we recommend most highly "The Ardmore."

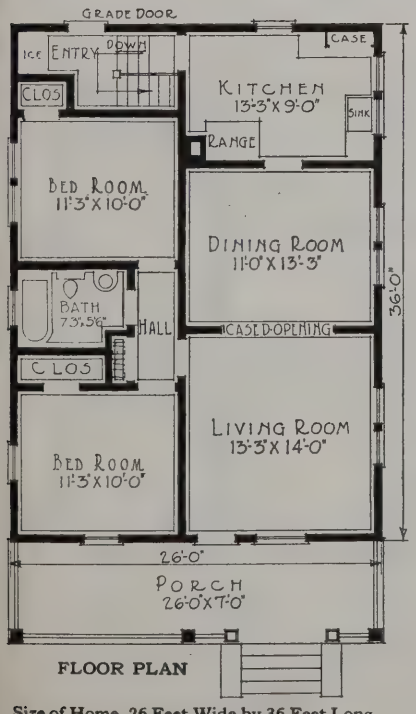
Our Customers Recommend Wardway Homes to Their Friends

"We are very proud of our Aurora home. It certainly is warm and is the only one of its kind in town. I have had a few callers concerning the homes which you put out, and I think that I have influenced them to build one of them in the spring. I did not have any trouble with the construction of the home for it went together just like clockwork. I built all this house in the evenings and only had a helper on it for about 200 hours so I think I did very well. If I can do you a favor in the future concerning a prospective buyer, you can refer them to me." J. E. Henderson, Coshocton, Ohio

Printed with Mr. Henderson's Permission

"The Lorraine"—Material Supplied Either Ready-Cut or Not Ready-Cut

Roomy Bungalow in Distinctive Craft Style



FLOOR PLAN

Size of Home, 26 Feet Wide by 36 Feet Long

THE LORRAINE is a truly distinctive home. No matter what its surroundings, its attractive Craftsman style sets it apart as a charming home. The effective combining of the gable-roof porch and pergola give it an unusually pleasing, welcoming entrance—and a very practical porch. The doorway is well protected from the weather, while the open end of the porch means a bedroom flooded with sunlight. The wide eaves, white trimming and small divided light gable window carry out the Craftsman design.

The interior arrangement is just as pleasing, with its five good size, well-lighted rooms planned for the comfort and convenience of every one in the family.

Three large Colonial windows bring light to the living room from two sides; a wide-cased opening into the dining room practically makes of these one large room, with ample wall space for a pleasing arrangement of the furnishings.

The kitchen is a conveniently planned work room well lighted and ventilated by three windows. Sink and work table are near windows, while ample space for the range is provided beside the main chimney. Our kitchen case No. 861, shown on Page 53, is included with "The Lorraine." A stairway leads from the kitchen to the grade door. Here space is provided for the ice box, so the ice man need not enter the kitchen.

The plan calls for a cellar excavated under the whole house. Four window sash and frames included insure a light, airy basement.

Entirely separate from the living rooms are the two large bedrooms and the bathroom, giving most desirable privacy. Each sleeping room has two windows and a large closet. A linen closet as shown on Page 52, fits snugly into a jog in the hall and provides storage space for linens, blankets, towels and other household necessities. The bathroom is amply large for all needed fixtures, and you will notice that its door is not visible from the living room.

Whether you are building a home to occupy yourself, or as an investment, "The Lorraine" is an excellent choice.

See Prices on Pages 1 to 4
Specifications on Pages 10 and 11

Unless you request otherwise, we will furnish for "The Lorraine," dark brown stain for the sidewall shingles and white paint for trim.

See Page 4 for cost of heating equipment, plumbing, electric wiring, storm sash, screens, and your option of Radio asphalt shingles and oak flooring and finish.

"The Raymond"—Materials Supplied Either Ready-Cut or Not Ready-Cut

Moderate Priced Home of Attractive Design

UNUSUALLY skillful designing has overcome, in "The Raymond," much of the monotony of appearance found in homes of moderate cost. The strikingly handsome exterior, its gracefully balanced proportions, and the exceptionally pleasing way in which each detail has been arranged, give this Wardway Home the charm and dignity of a home costing more than twice as much, if built without the benefit of Ward's experience.

The price makes a distinct appeal to all who must be careful of expenditures. No extravagance, no waste, nothing but sound common sense and good judgment is found in the exterior or interior design. It is a home economical to build, requires but very little ground space, and is easy to keep warm and comfortable during the cold months. These, added to its beautiful appearance, leave little more for the most critical and discriminating buyer to wish.

The interior has been planned with your comfort and utmost convenience constantly in mind. Every inch of floor space has been used to the greatest possible advantage. The large dining and living room which is entered from the roomy porch demonstrates this point admirably. Where some might have made two rooms of this, Wardway architects knew that you would prefer one large, well lighted and thoroughly livable room to two small, dark rooms. You will agree, after studying the accompanying floor plan, that they were right and that this large and comfortable room is one of the features which raise "The Raymond" far above other homes of its price.

A hall opening off the living room allows free access to the conveniently located bathroom, which also is handy to the two bedrooms of generous size which are found, one on each side of it, at opposite ends of the hall. A roomy closet is in each bedroom.

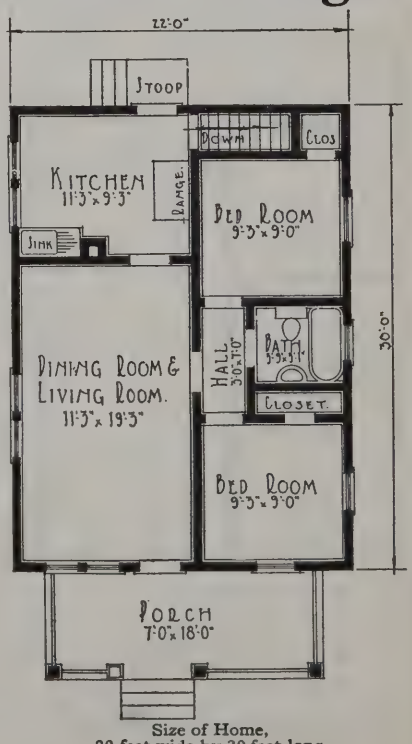
Large twin windows in the kitchen provide ample light and are placed so as to afford light at the sink, where it is generally most needed, without obstructing the light for the rest of the room. Steps lead down to the cellar from the kitchen.

Considering beauty of appearance, convenience of arrangement, economy to build, and low cost of heating, "The Raymond" offers as much, we believe, as any home ever seen. It furnishes an actual example—proof that cannot be contradicted—of how building a Wardway Home saves you money, now and in the years to come, and assures you satisfaction and comfort in the house itself.

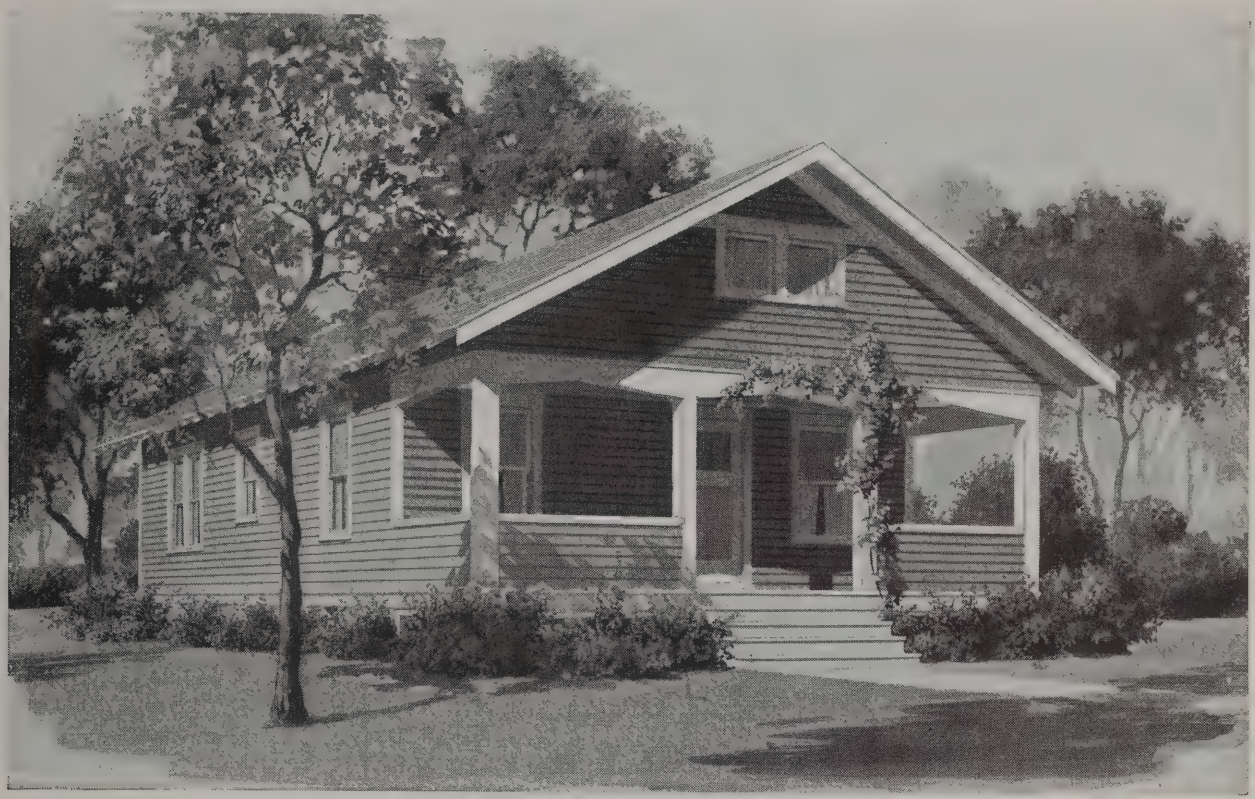
See Prices on Pages 1 to 4—Specifications on Pages 10 and 11

Unless you request otherwise, we furnish for the "Raymond," deep gray paint for the body and white for the trim.

See Page 4 for cost of heating equipment, plumbing, electric wiring, storm sash, screens, and your option of Radio asphalt shingles and oak flooring and finish. Write us for suggestions and estimates on a water supply system and sewage disposal for this home.



Size of Home,
22 feet wide by 30 feet long



"The Glen Ellyn"—Supplied Either Ready-Cut or Not Ready-Cut

Cozy Cottage—Five Pleasant Rooms

FLOOR PLAN

Size of this Home, 24 feet wide by 34 feet long

THE GLEN ELLYN is pleasant, comfortable, homelike. It gives the utmost in space and convenience for the least outlay.

The wide porch sheltered under the main roof gives a charming, inviting entrance and its boxed railing permits easy screening which practically adds another room to your home during the summer months.

The room arrangement is ideal for the small family. The front door opens into a good-size living room, well lighted by windows on two sides, as well as the glazed front door. The wide-cased opening between living room and dining room throws these two rooms together, making them appear like one spacious living room. The kitchen is directly back of the dining room and connected with it by a swinging door. Windows on two sides make this a very pleasant, well-lighted room. Space is provided for the kitchen sink conveniently near the dining room door and work table. Our kitchen case No. 861, shown on Page 53, is included and provides storage space for linens, dishes and kitchen utensils. The rear kitchen door is glazed and opens on to a small stoop.

The bedrooms are entirely separate from the living rooms in this home. A door from the dining room opens into a small hall, connecting the two bedrooms with the bath. Each bedroom has two full-size windows assuring ample light and ventilation. The windows have been carefully placed so as to provide wall spaces for the furniture and each bedroom is provided with a clothes closet. Plan calls for a cellar under the entire home and all necessary cellar frames, sash and stairs are included.

For the money we feel sure you can not find more living space or convenience than this home supplies. It is similar in design to our popular "Florence" home shown on Page 65, but is made a little more spacious and provides slightly larger rooms. This design, either as a home for yourself or as an investment proposition, is ideal from every standpoint.

See Prices on Pages 1 to 4—Specifications on Pages 10 and 11

Unless you request otherwise, we furnish for "The Glen Ellyn," deep gray paint for the body and white for the trim.

See Page 4 for cost of heating equipment, plumbing, electric wiring, storm sash, screens, and your option of Radio Asphalt Shingles and oak flooring and finish. Write us for suggestions and estimates on a water supply system and sewage disposal for this home.

The Troy—Material Supplied Either Ready-Cut or Not Ready-Cut

Six-Room Bungalow—An Exceptional Value

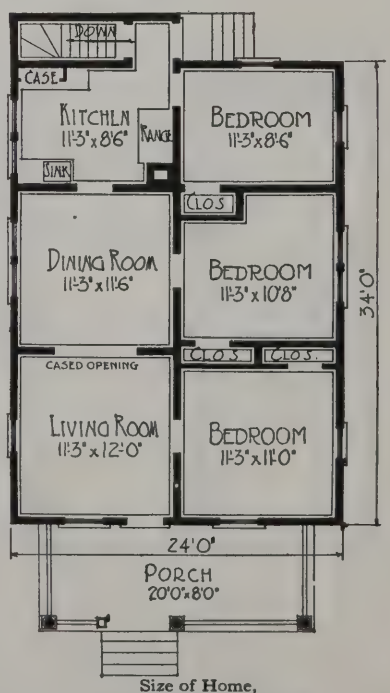
THERE is a surprising amount of living space in this home. The exterior is simple but in excellent taste. The wide porch serves to set off the home and gives an air of hospitable comfort very much desired.

The front door opens directly into the living room. This is connected with the dining room by a wide cased opening which makes these rooms practically one and gives the effect of added space. To the rear of the dining room is the kitchen—very carefully planned to make the work of the housewife easy and pleasant. Our special kitchen case, design No. 861 as shown on Page 53, is built right into the wall. This case, as you will note from the illustration, contains shelves, drawers, bins, mixing board and space for all kitchen utensils and needed supplies. It is a most appreciated feature, as it simplifies and systematizes the work and keeps things out of the way and where they belong. It is furnished at no extra cost. The sink and case are so placed that they are flooded with light from the large twin window.

The cellar steps lead down through an extension at the rear of the kitchen, which also makes room for the ice box. This arrangement permits supplies to be taken into the cellar without passing through the kitchen.

The right side of the home contains three large bedrooms, each having two windows furnishing ample light and ventilation and each provided with a closet. When one has entered this home it is hard to imagine it covers so little ground space; yet it is small enough to go on a small size city lot with plenty of room to spare. The cellar is planned to be excavated under the entire home. We furnish all necessary cellar sash, frames, steps, etc. Our "Troy" home is very easily and economically heated with either a pipeless or pipe furnace. It is a great value for the money.

See Prices on Pages 1 to 4—Specifications on Pages 10 and 11



Size of Home,
24 feet wide by 34 feet long

Unless you request otherwise we furnish for "The Troy," Gray paint for the body and White for the trim.

See Page 4 for cost of heating equipment, plumbing, electric wiring, storm sash, screens, and your option of Radio Asphalt Shingles and oak flooring and finish. Write us for suggestions and estimates on a water supply system and sewage disposal for this home.

"The Detroit"—Material Supplied Ready-Cut or Not Ready-Cut

An Attractive Home at a Bargain Price

Size of Home, 24 feet wide by 30 feet long

THE DETROIT represents a style of architecture and arrangement of interior that is universally popular. Convenience of arrangement, abundance of light and low erection and upkeep cost are its distinguishing characteristics. It looks equally as well whether erected in the country or in the city, as it is a favorite with both our city and farm customers.

The low, broad and comfortable lines of the bungalow give to this conveniently compact little home a most attractive appearance. The simple hip roof well protects the front porch, while the dormer with shingled walls breaks the severe roof line and adds much to the attractiveness of the exterior.

The living room is lighted by two windows and a glazed front door, which affords plenty of light and ventilation. The dining room is of the same size, lighted by a twin window and connected with the living room by a wide, attractive archway. Easy access from kitchen to dining room is obtained through our double-action swinging door. Each of the two bedrooms is provided with a closet and affords well arranged space for bed, dresser and other furniture. The bath off the kitchen is accessible yet in a position which affords the privacy desired. This location also makes it possible to use the space devoted to the bathroom for a pantry, where a bathroom is not desired.

The large porch extending across the entire front of the home affords comfort to the entire family during the warm summer months.

The ceiling height is 8 feet 6 inches.

"The Detroit" combines the maximum of good common sense arrangement with a minimum price. We doubt whether a five-room and bath home offering as great a value is to be obtained anywhere else. It is a cozy, comfortable home you will always enjoy.

See Prices on Pages 1 to 4—Specifications on Pages 10 and 11

Unless you request otherwise we furnish for this home, light slate paint for the sidewalls and ivory for the trim.

See Page 4 for cost of heating equipment, plumbing, electric wiring, storm sash, screens and your option of Radio Asphalt Shingles and oak flooring and finish. Write us for suggestions and estimates on a water supply system and sewage disposal for this home.

"The Avondale"—Materials Furnished Either Ready-Cut or Not Ready-Cut

Five Cozy Rooms at Very Moderate Cost

IT IS surprising how much living space and how many conveniences can be put into a small inexpensive House when it is well planned. This is just the home for a small family who wish to invest in a home rather than pay rent.

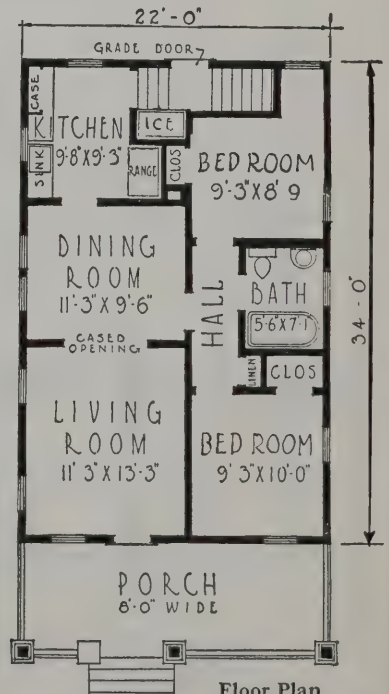
"The Avondale" is so simple in design and construction, especially under our ready-cut system, that it can be put up by even an inexperienced builder. The straight gable roof with its open cornice is the easiest of all to build and you will note that the main roof has been extended out to cover the wide open porch.

Stepping into the pleasant living room so well lighted from two sides one forgets that this house is small, for through the wide cased opening you look into the dining room making these two delightful sunny rooms practically into one. Although it covers very little floor space the "Avondale" kitchen is amply large for the small family and is well planned and very well lighted. The sink and our built-in kitchen case No. 861 shown on Page 53 are side by side, lighted by a half length window. The stove fits in an alcove, a very desirable feature in a small kitchen, and a space off the basement stairway for the ice box just across the entry from the grade door is another feature you will like. The cellar is excavated under the entire house.

A small hall opening from the dining room separates the bath and two bedrooms from living room. Each bedroom has windows on two sides giving fine cross ventilation and each has its own closet.

"The Avondale" is an exceptionally roomy, well-planned home and its low building cost not only recommends it to the family but also to contractor or investor looking for a house which will always find a ready sale.

See Prices on Pages 1 to 4—Specifications on Pages 10 and 11



Floor Plan

Size of Home, 22 feet wide by 34 feet long

Unless you request otherwise we furnish for this home, light tan paint for sidewalls and white for the trim.

See Page 4 for cost of heating equipment, plumbing, electric wiring, storm sash, screens and your option of Radio Asphalt Shingles and oak flooring and finish. Write us for suggestions and estimates on a water supply system and sewage disposal for this home.

"The Pullman"—Materials Supplied Either Ready-Cut or Not Ready-Cut

Cozy Little Cottage at a Bargain Price

Size of Home, 20 feet wide by 26 feet long

IF YOU are interested in a cozy little home at small cost but representing big value, "The Pullman" should have your ready approval. While not large in size, it is as attractive as many larger homes which cost considerably more. The usual objection of plain and unattractive appearance which is made against the small house does not apply to "The Pullman." It would be quite expensive to have such a house specially designed, but the cost of Wardway architectural service is distributed among so many homes it amounts to very little for one. The hip roof instead of the usual gable roof, the pleasant porch with its two columns resting on cement piers, the arrangement of windows and exposed rafter ends on porch and main roof, give to this little home all the attractiveness of a larger one and at much less cost.

The interior is cozy and compact, comprising four fine rooms well planned, so as to utilize every square inch of space. A pantry off the kitchen and two closets, one off each bedroom, are seldom found in a home of this size. The ceiling height is 8 feet 4 inches. Not only is this a very economical home to build, but it is also very easily and economically heated. This home is designed without basement to keep down the cost. A basement may be had if wanted, however, and entrance effected by constructing an outside hatchway at the rear. Cellar sash and hatchway are not included at price quoted. If a house of this size is large enough, you may select "The Pullman" with absolute assurance of getting the most for your money.

Saved $450 and Perfectly Satisfied

"I purchased the 'Pullman' ready-cut home from you last year. Everything was in first class shape, just as you guaranteed it to be, and plenty of materials for everything. I did not have to buy anything extra and had no trouble following the plans.

"I consider that I saved $450 on it, and am perfectly satisfied with it; and if I build another home it will be a Wardway Home."

George G. Smith, Jacksonville, Ill.

Printed with Mr. Smith's Permission

See Prices on Pages 1 to 4—Specifications on Pages 10 and 11

Unless you request otherwise we furnish for the "Pullman," deep gray paint for the body and white for the trim.

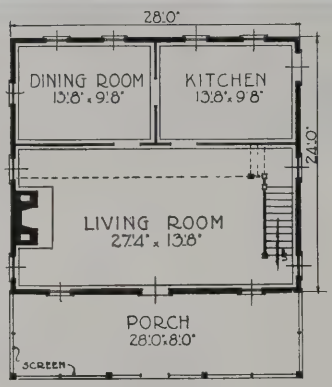
"The Mackinac"

(Shown above)

EVERY detail that can make for summer comfort has been included in this wonderful design. Note the big screened porch and the high-ceilinged living room, fully two stories in extent. What you want in a summer cottage is plenty of light, air and room. "The Mackinac" provides all these in abundance. No matter how hot the days, it is bound to be cool, and if the weather is cool, the fine fireplace guarantees cozy comfort

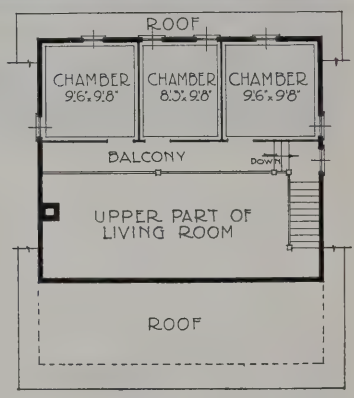
Three bedrooms, a kitchen and dining room provide ample space for the practical needs of vacation life, and leave the living quarters free at all times. Although not a large cottage, there is a surprising amount of room in "The Mackinac."

Remember, you get all material to build this house just as shown in the picture, with the exception of the masonry and fireplace material.



FIRST FLOOR PLAN

"The Mackinac"
Size 28 by 24 feet



SECOND FLOOR PLAN

"The Avondale"

(Shown below)

OF simple, easy construction, yet well arranged and roomy, this makes an ideal "shack" for those desiring comfort in the hot summer months. Big, cozy living room with cheery fireplace—wide porch that affords an unusual amount of outdoor living space—two large bedrooms, one of which may be used as a kitchen or dining room if necessary—all that one could ask for in a comfortable summer home.

FLOOR PLAN—CHARLEVOIX
Size 26 by 30 feet

"The Charlevoix"

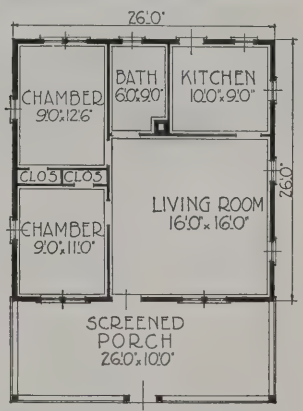
(Shown above)

THIS beautiful little shingled cottage fits right in with any summer resort colony. It has an unusually good floor plan with plenty of room and plenty of conveniences which you do not expect in a summer cottage. Yet it is inexpensive and very easy to build. The porch screens are furnished. Everything with the exception of the masonry is shipped complete to build this cottage.

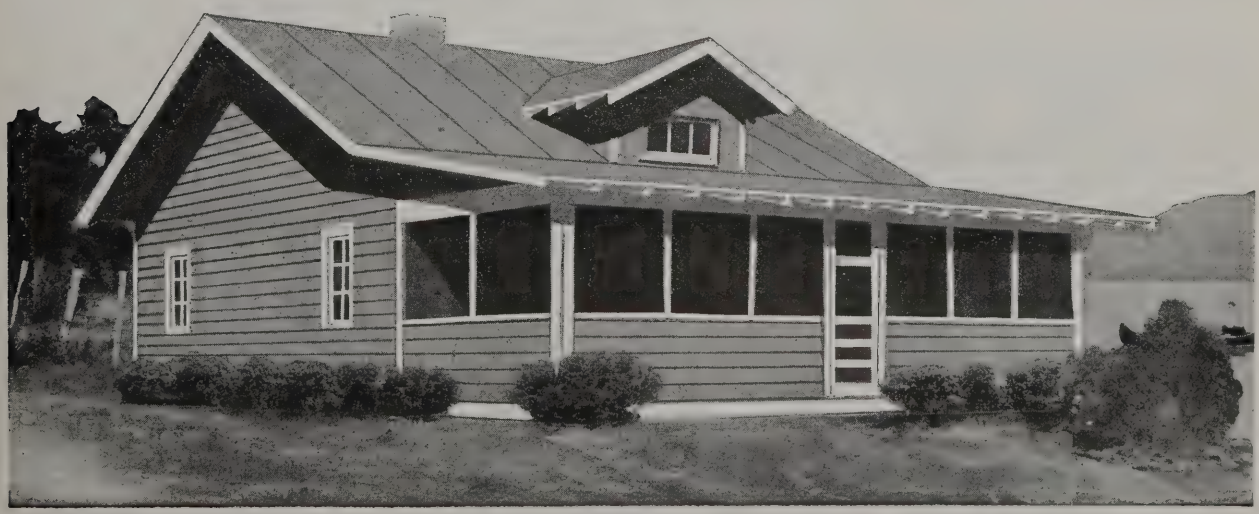
"The Bay View"

(Shown below)

ONE of the most practical and livable summer homes ever designed. Plenty of room—convenient arrangement—a good looking summer home in any community. Note the huge porch, 26 by 10 feet. The chimney is so placed that stoves can be used for heat in spring or fall. Build this summer home yourself. At the price we quote anyone can easily afford this beautiful summer residence.



FLOOR PLAN—BAY VIEW
Size 26 by 26 feet



"The Gary"—Material Supplied Ready-Cut Only

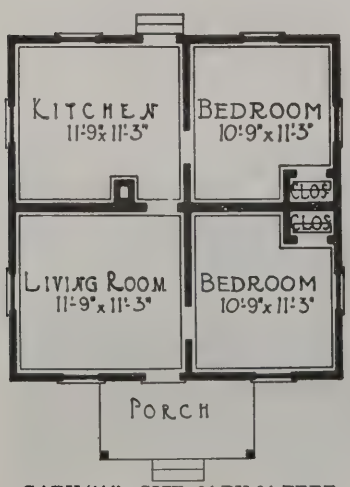
Attractive Four-Room Cottage —Two Sizes

A SIMPLE and logically arranged four-room cottage. This is our "Gary" design, which we can supply in two sizes—"A" and "B"—as shown below. This is a thoroughly comfortable, good looking home.

Cottages shown on Pages 90, 91 and 92 represent the greatest values in the market in livable and substantial dwellings. They are ideal for industrial purposes and for housing workmen.

When considering them, note carefully the high specifications given to the right. They apply only to the homes on these three pages. The frills have been omitted but the material is of good grade, and the structures are thoroughly satisfactory and lasting. The fact that material is cut-to-fit makes possible such large savings in construction that we believe these homes are today by all means lowest in complete final cost of any buildings of their type.

We offer special discounts on these homes when ordered in quantities. Write for our special offer.



GARY "A"—SIZE, 24 BY 24 FEET

GARY "B"—SIZE, 26 BY 26 FEET

Specifications of Material for Ready-Cut Cottages Shown on Pages 90, 91, 92

See Prices on Page 3

All timbers and dimension lumber No. 1 Yellow Pine.

SILLS—4 by 6 sills and girders, *cut-to-fit*.

JOISTS—2 by 8 floor joists, 2 by 4 ceiling joists, *cut-to-fit*.

STUDDING AND RAFTERS—2 by 4 for outside and inside walls and rafters, *cut-to-fit*. (Ceilings are 8 feet 1 inch high.)

NOTE:—Owing to extreme simplicity of construction of these cottages, we have found it unnecessary to notch the wall plates as we do for Wardway Ready-Cut Homes.

SIDING—1 by 6 clear Fir drop siding, *cut-to-fit*.

ROOF BOARDS—Main roof covered with 1 by 6 No. 2 Yellow Pine boards, laid tight. Cornice and porch roofs covered with 1 by 4 No. 1 Yellow Pine drop siding, *cut-to-fit*.

ROOFING—Radio slate surfaced roofing—red or green (State which color is wanted.)

FLOORS—1 by 4 (3 ¼-inch face) No. 1 Yellow Pine, *cut-to-fit*.

WALLS—All inside walls and ceilings are lined with Ward's Superb Fiber Wall Board.

DOORS—Glass front and rear doors. Inside doors five cross panel Fir, 1 ⅜ inches thick. All doors mortised for locks.

WINDOWS—Standard White Pine four-light windows as shown including White Pine frames. *Cut-to-fit* and bundled.

INTERIOR FINISH—All doors and windows are cased with square edge casings. Base square edge, necessary molding, etc., all clear Yellow Pine.

HARDWARE—Nails for the complete building, locks and hinges for doors, spring bolts for windows.

PAINT—Two coats of Coverall paint, any color, for all outside walls and porch ceilings. Two coats Wardway porch floor paint for all porch floors. One coat Penetrating Art Wood stain for all interior woodwork. One coat of boiled linseed oil for interior floors. Ward's kalsomine, any color, with proper sizing, furnished for all inside walls and ceilings.

CEILINGS—Ward's Superb Fiber Wall Board is furnished for ceilings.

Plans and directions free.

All joists, studding and rafters are spaced 2 feet on centers. Size of material is properly figured to provide ample strength for all parts of the building.

We do not furnish piers, as native blocks are often available or masonry is preferred.

We include sufficient scaffold lumber for the easy erection of the building; also tar paper for covering the finish lumber.

"The Akron"—Size 24 by 36 feet

"The Akron"

(Shown above)

FIVE big rooms and a porch of good size are included in this design. It provides plenty of room for a large family and is much in demand even where the family is small, as one or two rooms can be rented, thus increasing the family income materially.

Note the fine specifications for this home on Page 90 and the unusually low prices on Page 3 of the book. Realize too, that the construction cost of this house is very low on account of the amount of work done at the mills. An average workman, even though not skilled in carpentry can construct one of these houses, for practically all the difficult work is done and the plans are very complete.

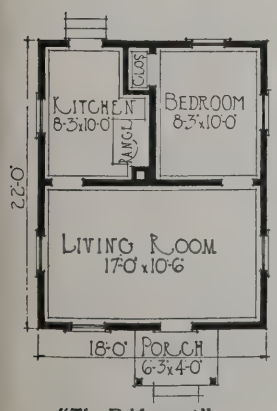
See Prices on Page 3—Specifications on Page 90

"The Bridgeport"

(Shown below)

THREE rooms of comfort and convenience at a price which makes this one of the biggest home bargains of the year, we believe. Complete materials are furnished in accordance with specifications on Page 90.

All materials are cut to fit—all you have to do is to nail them together. Any handy man can erect this cottage without the help of skilled labor.

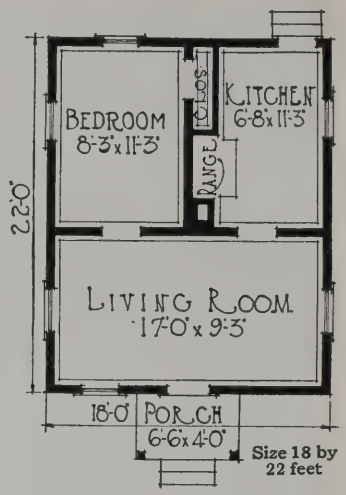


"The Bridgeport"
Size 18 by 22 feet

See Prices of these Cottages on Page 3

Specifications on Page 90

See Prices on Page 3 Specifications on Page 90



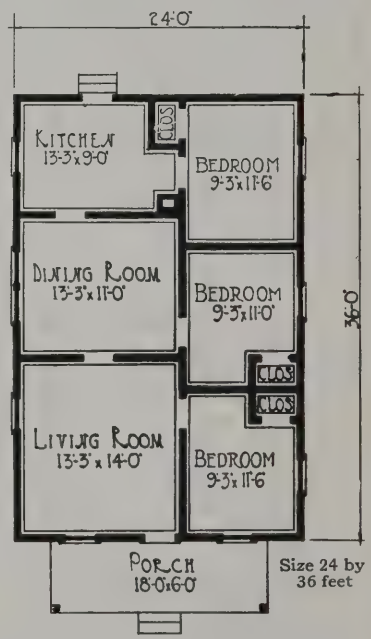
Size 18 by 22 feet

"The McKeesport"—Material Supplied Ready-Cut Only

THIS snug little cottage provides ample living space, at a minimum cost, for the small family. All fancy details have been omitted in order to bring the cost of adequate shelter down to absolute rock bottom.

The construction is so simple and our system of preparing material ready-cut so complete, that two men can erect this house in an astonishingly short space of time, even though they are not carpenters. The cost constructed would be very little more than the cost of the material. See specifications for these "McKeesport" and "Youngstown" cottages on Page 90. Prices on Page 3.

See Prices on Page 3 Specifications on Page 90



Size 24 by 36 feet

"The Youngstown"—Ready-Cut Only

THIS design is the most pretentious of our workmen's cottages. It provides ample living space for a large family. If all the rooms are not needed to house the family, it is always possible to rent one or more of them, a fact which makes "The Youngstown" a popular design in any industrial community.

Read the specifications on Page 90 carefully and note the thoroughly high quality of all materials for this building. Remember, the preparation of everything is astonishingly complete at the ready-cut mill; and when you consider the price, realize too that the cost of materials quoted represents a large part of the construction cost. The cost of this cottage completed is extremely low. See prices on Page 3.

Specifications—Ready-Cut Summer Cottages Shown on Pages 88 and 89

These specifications apply only to those cottages shown on Pages 88 and 89—See prices on Page 3

All timbers and dimension lumber No. 1 Yellow Pine. All surfaced one side and one edge.

SILLS AND GIRDERS—4 by 6, cut-to-fit.

MAIN FLOOR JOIST—2 by 8, cut-to-fit.

PORCH FLOOR JOIST—2 by 6, cut-to-fit.

RAFTERS—2 by 4, cut-to-fit.

STUDDING—2 by 3, 8 feet high, cut-to-fit.

INSIDE DOOR POSTS AND PLATES—2 by 3, cut-to-fit.

PORCH POSTS AND BEAM—Cut-to-fit.

FLOORING—1 by 4 (3¼-inch face) No. 1 Common Yellow Pine, cut-to-fit.

PARTITIONS—1 by 4 No. 1 Yellow Pine beaded and matched (partitions 8 feet high), cut-to-fit.

OUTSIDE WALLS—1 by 6 Clear Fir drop siding, cut-to-fit, with the exception of the Charlevoix cottage which has outside walls of 1 by 6 No. 2 matched sheathing, covered with Star A Star Red Cedar Shingles.

ROOFBOARDS—1 by 6 No. 2 Yellow Pine dressed and matched, cut-to-fit, laid tight.

ROOFING—Radio slate surfaced roofing, red or green. (State which color is wanted.)

OUTSIDE MOLDINGS—Screen molding and quarter round Clear White Pine or Fir.

DOORS—Outside glass doors, 2-6 by 6-6, 1⅜, mortised for locks. Inside doors 5X Panel Fir, mortised for locks.

SASH—8" by 14" glass size, divided 6 lights. Sashes are hinged to swing in.

RUSTLESS SCREEN WIRE—For covering all porches and windows, complete with screen molding. Also strong screen doors for front and back.

HARDWARE—Locks and hinges for all doors. Spring bolts for windows. Coat and hat hooks for closets. Nails complete as required for all parts of every house.

PAINT—Coverall Brand Paint, two coats, for all outside woodwork. Floor paint for porch floors.

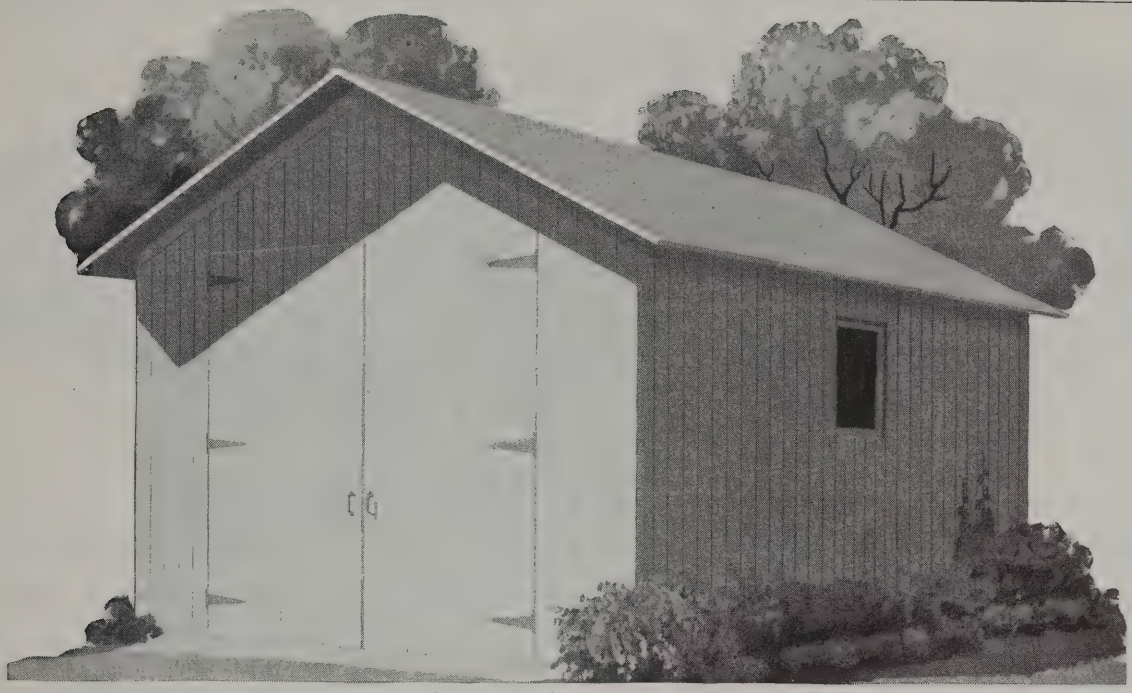
These specifications apply only to houses illustrated on Pages 88 and 89.

All joists, outside studding and rafters are spaced two feet ot centers. Size of material is properly figured to provide ample strength for all parts of the building.

All lumber exposed in the house is smoothed, so that it can be left natural or painted or stained as desired. Summer cottages do not have ceilings. Partitions are 8 feet high.

We include sufficient scaffold lumber for the easy erection of the building; also tar paper for covering the finished lumber.

NOTE:—Owing to extreme simplicity of construction of these summer cottages, many of our customers find it a pleasant experience to erect them themselves.



"The Dearborn" Garage

Inexpensive and Serviceable Garages

See Prices on Page 3

COMPLETE plans are furnished free, and all material is cut to fit—which makes these Garages very simple to build. You can erect them yourself without any trouble. They are by no means flimsy structures, but a permanent, watertight and weatherproof protection for your car, which with ordinary care will last as long as your house.

Both designs are strongly built garages, at a price which makes their complete cost extremely low. They are made of No. 1 lumber, all cut to fit and ready to nail up. The hardware is finest quality. Two coats of paint are included. The roof is covered with durable three-ply slate surfaced Asphalt roofing, and will last indefinitely.

Specifications and materials for the two garages shown on this page are given below.

Specifications of Construction and Materials for "Dearborn" and "Dort" Garages

SILLS, PLATES, RAFTERS AND FRAMING—2 by 4 No. 1 Yellow Pine, with 2 by 6 ridge.

DOOR POSTS—4 by 4 No. 1 Yellow Pine.

HARDWARE—For doors: Strap hinges, foot and head bolts, and rim lock with two keys. For sash: Hinges and fasteners. Nails for entire building.

PAINT—Two coats Coverall House Paint for outside walls and doors. Side walls, 8 feet high.

SIDING—1 by 6 No. 1 Yellow Pine dressed and matched, set vertically.

ROOF—1 by 8 boards laid tight, *cut to fit,* covered with three-ply guaranteed Radio slate surfaced roofing.

DOORS—1 by 6 beaded siding with stiles and rails for back, *cut to fit,* but not nailed together; for opening 8 feet by 8 feet—or completely manufactured glazed doors as shown.

SASH—Two sash for each garage, to open in.
All material cut to fit.

NOTE: These garages are figured to rest on a cement or cinder floor. No wood flooring or other floor material is included.

PLANS and blueprints are furnished free.

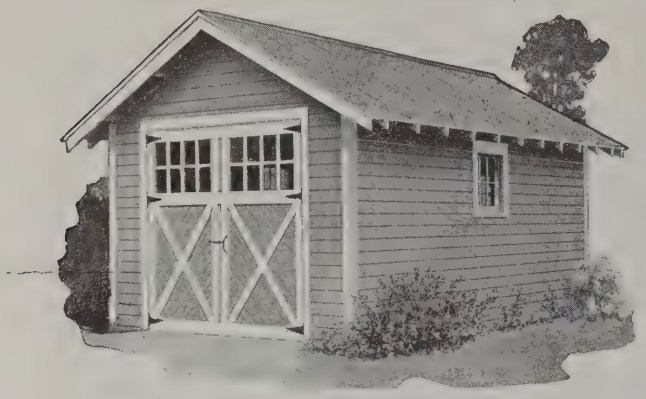
"The Dort" Garage



"The Flint"—1-Car Garage

"The Detroit"—1-Car Garage

Economy in Wardway Garages

ALL the material for these garages is cut to fit at the mill and complete plans are furnished. The construction is so simple that you can erect your garage yourself. Even if you hire the work done, the construction is so easy that the finished cost is but little more than the price quoted on Page 3 of this book.

All window frames are made at the factory and shipped ready to use. Garage doors are built complete and are shipped ready to hang. They are as fine as can be bought, made of clear white pine 1¾ inches thick, with mortise and tenon joints, just like the finest house front door. The hardware is unusually fine—long, heavy hinges which hold the doors true and straight, foot and head bolts, door handle and cylinder locks with small flat keys. Window hardware also is furnished, together with all necessary nails as well as paint enough for two coats. The highest grade slate surfaced shingle roll roofing is included.

Read the specifications of these garages carefully and you will realize that they are not to be compared with the average poorly constructed building with its home made doors of cheap material and generally clumsy appearance. Though well designed of the finest material, trim and staunchly constructed, these garages cost no more when built than the average home made makeshift.

Ward's Superior Lighting Fixtures

More Saving For You

You can save still more on the cost of your home by purchasing your lighting equipment at Ward's. The saving you make on your home will more than pay for your lighting, plumbing and heating equipment. You can purchase the kind of fixtures you have always wanted, fixtures that are thoroughly modern in every respect, fixtures that are correctly designed from an illuminating standpoint, artistic in appearance and in the latest finishes.

We show here only two lighting fixture sets of our complete line of modern lighting equipment listed in our large General Catalogue No. 104.

Another Saving

The prices of the individual pieces are very low—and if you buy the complete set you make an even greater saving. And the saving you make on the purchase of your lighting fixtures at Ward's is not the only one—you save also on the cost of installation. All fixtures are completely wired ready to install when you receive them. They are equipped with solderless connectors and we supply the proper fasteners, screws, tape, and a card of simple instructions. A screw driver is the only tool required.

Our Best Fixture Set—All 8 Pieces at a Great Saving

Think of being able to buy first class, artistically designed Electric Lighting Fixtures for an entire home for about the price of a living room chair. This complete 8-piece set can be bought in individual pieces at surprisingly low prices or as an entire set at a still greater saving. The bathroom and kitchen fixtures are finished in sanitary white enamel. For the bedrooms and halls the finish is an exquisite combination of ivory and blue. The living room and dining room fixtures and the wall bracket are finished in silver and taupe. Taupe is a drab gray or moleskin color. This combination will harmonize with almost any color scheme.

The bodies are made from heavy gauge brass and the finishes are so expertly applied they will last for years. All fixtures can be easily cleaned. Each fixture completely wired and assembled, ready to install. Do it yourself, our instructions tell you how. Fixtures with keyless sockets to be controlled by wall switch. **Bulbs not included.** Shipping weight, per set, 50 pounds.

Consider the Advantages of Plumbing in Your Home

No modern convenience contributes so greatly to the comforts of a home as the bathroom and kitchen with running hot and cold water.

Until a very few years ago plumbing was considered a luxury within the reach of few. Conditions have changed greatly. Our method of selling high grade sanitary plumbing has helped make it possible for every home owner to have a modern kitchen and bathroom.

You can do your own plumbing. Many of our other customers have. Our plans and instructions make the work simple and easy.

A letter received from F. A. Snow, Brookton, N. Y., tells how easy it is. Mr. Snow says: "Herewith enclosed I am returning to you blue print and instructions for installing my outfit, which I received from you some little time since.

"They will be good to loan to some other novice who is installing his own plumbing. The print and instructions helped me out all right. Thanks for your help."

Published with Mr. Snow's permission.

Our modern, sanitary plumbing outfits are furnished with all pipe and fittings necessary to make a complete installation.

All of our cast iron porcelain enameled fixtures represent the very latest designs. There are three outfits to select from. Any one of these sets will give you many years of satisfactory service.

In most cases our plumbing will outlast the buildings in which it is installed.

If the plumbing outfits we have illustrated do not meet with your needs, write us. We shall be more than pleased to give you just what you want.

The tub, lavatory, sink and closet that you will receive are strictly "A" Grade. By "A" grade we mean that there is none better to be had. The cast iron used in all the plumbing fixtures we sell is close grained. The castings are smooth. The pure white porcelain enamel is applied according to the latest method and fully guaranteed not to crack or chip. Each piece is selected to insure fixtures having a perfect finish.

All vitreous chinaware is the product of the best potteries in the United States, where only experienced workmen are employed. Each piece you select will bear your most rigid and critical inspection. You may rest assured of satisfaction and service.

The pipe, fittings and other trimmings included with the installations we recommend are all of standard manufacture. Each item, no matter how small, represents the best material obtainable, also careful workmanship. You can place the order with full confidence that your installation will be complete in every detail.

The plumbing equipment of each home has been recommended by a man competent to judge the plumbing needs. We have endeavored to give you the very best at saving prices. Do not hesitate to send us your order for one of the combinations we illustrate.

If you are in need of a water supply system, write us about your requirements. We shall be pleased to answer questions and specially consider your requirements.

Blackstone

Plumbing Set

If you desire the very best plumbing you can do no better than select this combination. All fixtures are of latest design, massive, beautifully matched and sold at a price that will help you make a considerable saving.

BATH TUB. An exquisitely finished one-piece cast iron white porcelain enameled, full apron bath tub either right or left-hand corner pattern. Five-foot tub furnished complete with brass, nickel plated, concealed trimmings. China water supply and waste handles. Pattern to be selected depends upon your bathroom arrangement. A more beautiful or substantial tub has never been offered our customers before.

LAVATORY. This lavatory has been designed to harmonize with the other bathroom fixtures. It is our heavy cast-iron, full apron, white porcelain enameled "Olympic." Size of top, 20 x 24 inches; bowl, 12 x 15 inches. Equipped with solid brass pop up waste, substantial china indexed compression faucets and heavy brass nickel plated trap and supply pipes to wall. All trimmings are nickel plated, carefully and neatly finished. A lavatory you will be proud to have in your bathroom.

CLOSET COMBINATION. Best quality, plain design, vitreous china tank, glazed inside and out. Fitted with the latest compound noiseless flushing mechanism. Solid brass nickel plated flushing connection between tank and bowl. Brass nickel plated supply pipe. Syphon jet vitreous china bowl, glazed inside and out. Noiseless, quick flushing and economical. Glazing guaranteed not to craze, crack or discolor. White celluloid covered wood seat with brass nickel plated full bar hinge. This is our "Madison" combination.

SINK. This is our "Ellsmere" deep apron, white porcelain enameled, heavy cast-iron sink. Length, 52 inches; width, 20 inches. Height of back, 12 inches. Sink, 28 inches long. Drainboard, 24 inches long. Furnished complete with nickel plated trap and fuller faucets, pair of adjustable legs and cast-iron hanger. A better sink is not manufactured.

RANGE BOILER. A 30-gallon standard, carefully tested, galvanized range boiler complete with stand, cold water tube and couplings.

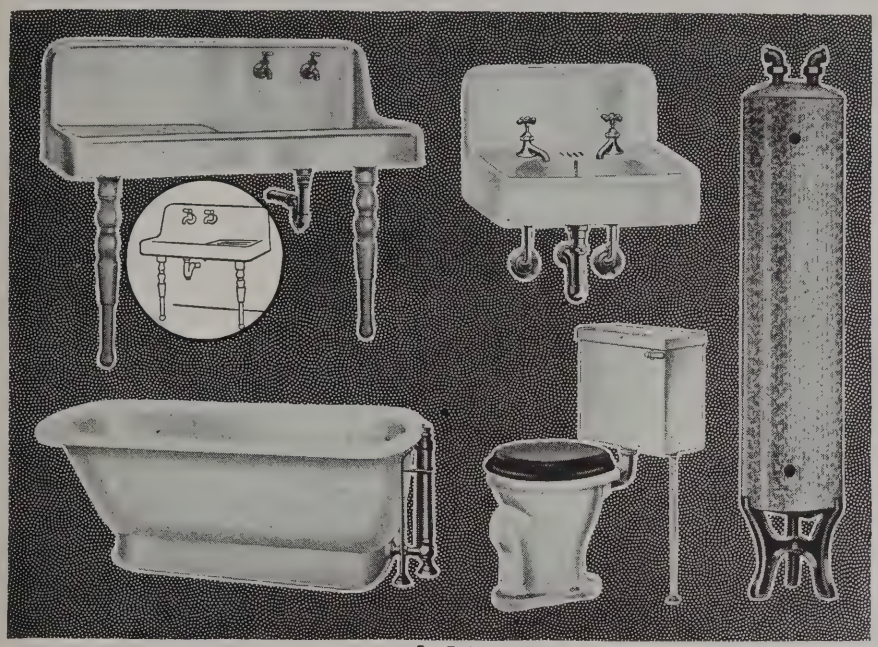
High Grade Plumbing at Big Value Prices



La Salle

La Salle
Plumbing Set

See Prices on Page 4

This is an ideal installation for the home in which it is not desired to use a built-in or recess bathtub, and yet where high-grade plumbing fixtures are wanted.

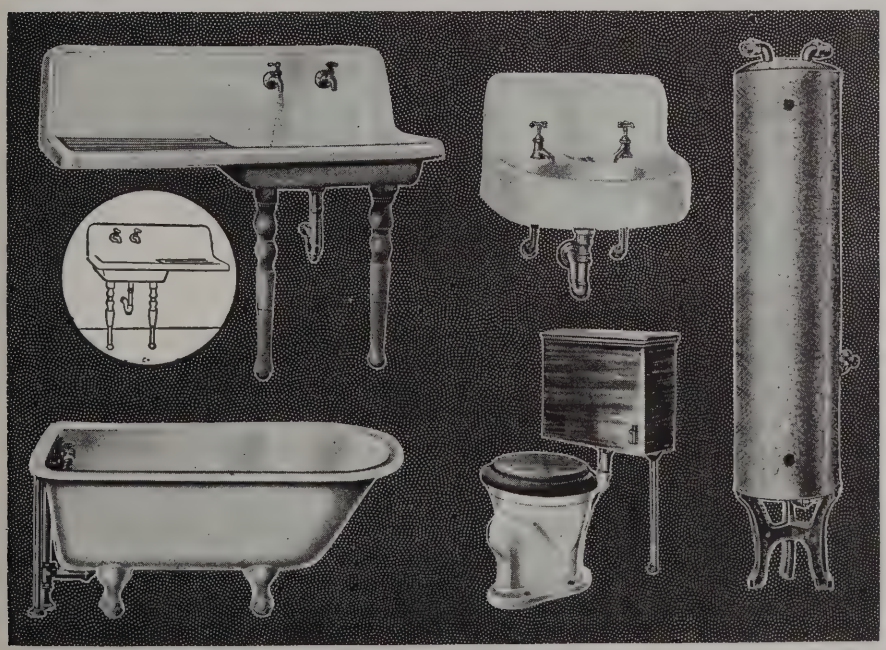
SINK—The "Ellsmere" deep apron sink of heavy cast-iron, white porcelain enameled furnished with our La Salle Plumbing Set is far superior to the ordinary kitchen sink. Sink is 52 inches long. Drain board is 24 inches; back, 12 inches. Complete with nickel plated trap, Fuller faucets and concealed wall hangers and legs.

BATHTUB—This is our well-known 5-foot "Bradford" massive, cast-iron, white porcelain enameled base bathtub, fitted complete with solid brass, china indexed. Ideal waste, brass supply pipes and fuller double bath cock. All fittings are heavily nickel plated and finely finished. Outside of tub painted white to match lavatory and closet combination.

LAVATORY—A graceful and substantial white porcelain enameled, cast-iron lavatory with full apron—our popular "Drexel." Size, 18 x 24 inches with 12 x 15-inch oval bowl. Height of back, 10 inches. Fitted with heavy, nickel plated brass trap and supply pipes to wall. Well constructed china indexed, nickel plated compression faucets.

CLOSET COMBINATION—Best grade vitreous china washdown closet bowl, glazed inside and out. Large waterways insure quick and positive flushing. Tank is also of vitreous china, glazed inside and out. Compound flushing mechanism of the latest design, almost noiseless in action. Nickel plated flush elbow connection, between tank and bowl, also brass nickel plated supply pipe. Glaze on bowl and tank guaranteed not to craze, crack or discolor. Well constructed, mahogany finished seat with heavy brass, nickel-plated full bar hinge. This is our well known "Flavia" combination.

RANGE BOILER—A 30-gallon standard, carefully tested, galvanized range boiler complete with stand, cold water tube and couplings.



Sherman

Sherman
Plumbing Set

See Prices on Page 4

A low-priced but high-grade plumbing installation, where a leg bathtub is wanted.

SINK—The kitchen sink furnished with the SHERMAN is one piece, heavy cast enameled, 42 inches long, with drain board on either end. Complete with nickel plated trap, Fuller faucets and concealed wall hangers. The legs shown are not included.

BATHTUB—Heavy cast-iron, 5-foot white porcelain enameled on legs, 30 inches wide with 3-inch roll rim. Complete with solid brass waste and overflow fitting, brass supply pipes and double fuller bath cock. All fittings are heavily nickel plated and finely finished. Outside of tub covered with one coat of white paint.

LAVATORY—Half circle pattern white porcelain enameled cast-iron lavatory with full apron—our well-known "Dudley." Size, 18 x 21 inches with 11 x 14-inch bowl. Height of back, 8 inches; fitted with heavy nickel plated brass trap and supply pipes to wall. Substantial china indexed, nickel plated compression faucets.

CLOSET COMBINATION—Best grade vitreous china washdown closet bowl, glazed inside and out; large waterways; thus insuring quick and positive flushing. Oak tank copper lined, with flushing mechanism of the latest design. Nickel plated flush elbow connection between tank and bowl; also brass nickel plated supply pipe. Glaze on bowl guaranteed not to craze, crack or discolor. Well constructed golden oak seat with heavy brass nickel plated full bar hinge. This is our "Altona" closet combination.

RANGE BOILER—A 30-gallon standard. carefully tested galvanized range boiler, complete with stand, cold water tube and couplings. All of our boilers are made by one of the oldest concerns engaged in this line of business; therefore you are assured of satisfaction.

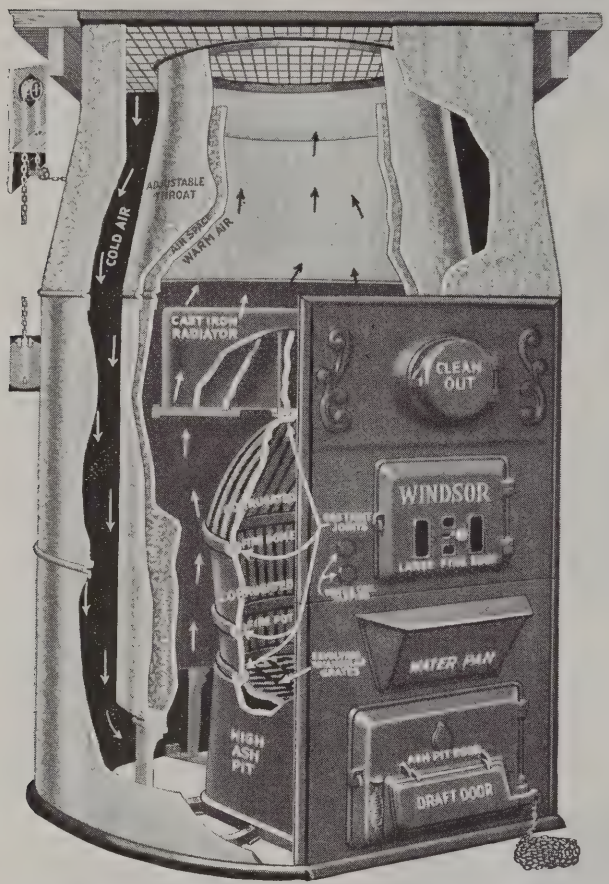
Windsor Pipeless Furnaces



THE Windsor Furnace has given comfort and satisfaction to thousands of our customers in all parts of the United States. In designing and building these furnaces, we considered quality above everything else. We now make the Windsor Furnaces bigger and heavier than ever before.

For many months our furnace experts have studied how to improve the Windsor. They found that to improve upon a furnace as good as the Windsor was a difficult task. After considerable experimenting they added several improvements. As a result, we are now offering a furnace heavier than before, with new features which give it greater heating capacity, greater fuel economy and add extra years of life.

Gives More Heat for Less Fuel

No heating system ever designed will deliver more heat from the fuel than the Windsor Pipeless Furnace. The design of the fire pot, the size and shape of the fire dome, and the extra large horseshoe radiator insure complete combustion of the fuel and gases. Every bit of heat is delivered into the rooms—none escapes into the basement. The Windsor Furnace is so efficient that you can heat every room in your house, both up stairs and down, with but little more fuel than you would use in an ordinary stove to heat only one room.

Ward's Prices Are for Complete Outfits

With each pipeless furnace we furnish necessary smoke pipe, elbows and cast iron damper—there are no **extras** to buy after you receive the furnace.

Why Windsor Furnaces Are Best

Casings. Outer casing is made of heavy galvanized iron. Inner casing consists of two of the same heavy galvanized iron sheets with an air space between. This construction is much superior to the galvanized tin and asbestos-lined casings used in ordinary furnaces. The air space is an excellent insulator and casing will not rust.

Radiator. The radiator is extra heavy and 3 to 5 inches larger in diameter than on the average furnace of the same size. The extra size not only gives greater radiating surface, but provides a large heating trap, over the fire dome. Made of cast iron, will not warp.

Fire Dome. Made high and dome shape so that all gases will burn before entering radiator. Deep corrugations inside and out provide larger surface to take up heat inside of dome; also larger surface to radiate heat on outside of air heating trap. Gas-tight joint between fire dome and fire pot.

Fire Pot. Here again deeper corrugations inside increase the radiating surface and add strength and life to the fire pot. Being deep, the corrugations provide circulation of air to the burning fuel on the outside of the fire pot. Fire burns clean all over.

Grates. Heavy triangular bars. Last longer than flat grates because two sides of each bar are exposed to air and one side to the fire.

Ash Pit. Extra deep and large. Will hold a large amount of ashes without interfering with draft or touching grates. Full width door makes removal of ashes easy.

Draft Door. Extra large to admit plenty of air for heavy firing.

Fire Door. Extra large, easy to feed big chunks of coal or wood.

Water Pan. Insures moist healthful air. Placed in front where furnace is hottest. Easy to reach and made extra large to require less frequent filling.

Leakproof. All joints are cup types and gas tight. It is impossible for gases to reach living quarters. All doors are ground smooth and fit closely insuring positive draft control. Windsor Furnaces hold fire longer and use less fuel because of the construction and improved design. Every furnace is carefully inspected before leaving factory. A complete set of instructions for installing are included.

Read What Windsor Owners Have to Say

Heats All Rooms

"We think the furnace we bought from you cannot be beaten. Our new furnace heats all four big rooms nice and warm. It uses no more fuel than the wood and coal stove we formerly used which did not heat comfortably."

Martha Brooks,
Okemus, Mich.
(Printed by Permission)

Made Quite A Saving

"I have installed the Windsor Hot Air Furnace received from you and am very much pleased with it. I did not have any trouble in installing it. I consider I saved quite a sum in buying my furnace from you."

Jos. J. Huwig,
East Chicago, Ind.
(Printed by Permission)

Easy to Install

"Last fall we purchased a Windsor Pipeless Furnace from you and are well satisfied with it. It is a well-built furnace and we saved over $100 by buying from you."

Leslie E. Marshall,
Hampshire, Ill.
(Printed by Permission)

Comfort in Severe Weather

"We have had our furnace in use for over 8 months and with 6 weeks of severe weather, temperature ranging from 10 to 35 degrees below zero. We have burnt less coal than formerly."

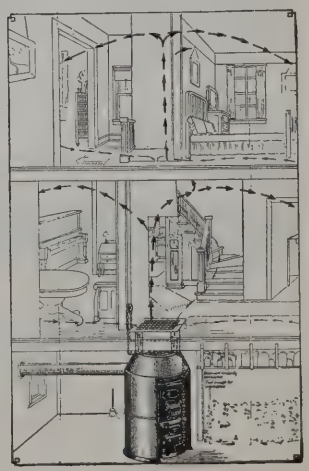
Albert W. Brady,
Mandan, N. Dak.
(Printed by Permission)

Saved Over $100—Well Satisfied

"I am well pleased with my furnace. I had my neighbor help me install it and we had no trouble. I saved between $100 and $125 by buying the Windsor. I know it is a better furnace than I could buy here for $250."

John W. Knox,
Euclid, Pa.
(Printed by Permission)

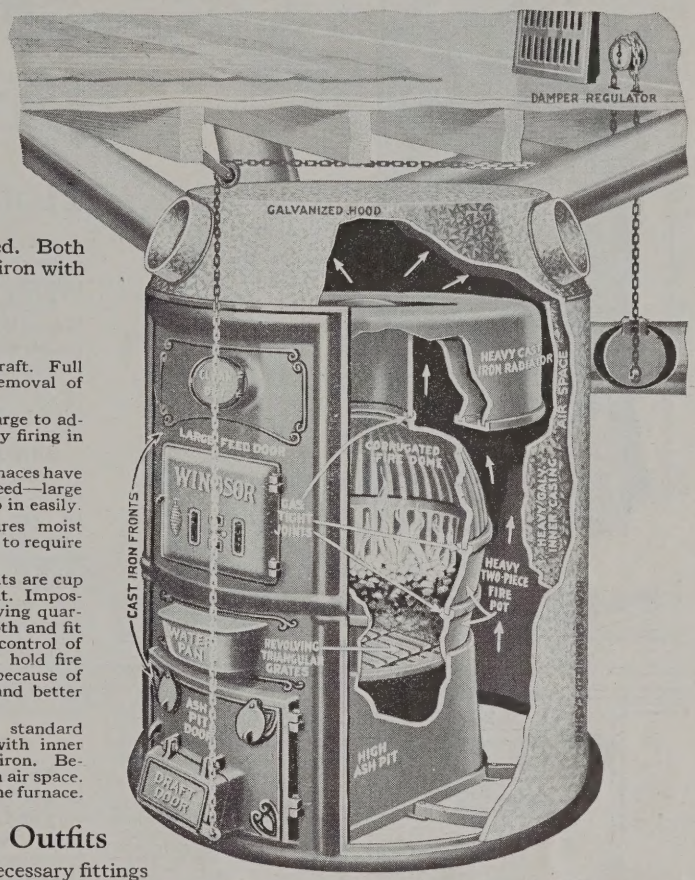
Diagram Shows Circulation of Heat from Pipeless Furnace



Windsor Warm Air Furnaces

A GREAT many of our customers prefer Warm Air Furnaces. Warm air is a moderate priced, quick, satisfactory and economical way of heating. Warm air furnaces have a pipe leading to every room, making your home comfortable in any part of the house.

The Windsor Warm Air Furnace we now offer is a bigger and heavier furnace than we have ever sold before, and at a lower price. The Windsor Furnace forces all the moist warm air into your house, right where it belongs. Your basement will not be overheated. Both outer and inner casings are made of standard galvanized iron with an air space between. Air is the best insulation known.



Read Carefully These Specifications

Radiator. Extra heavy and larger in diameter than on most furnaces of same size. Made of cast iron—will not warp—and is horseshoe shape so all smoke must make complete circuit before entering smoke pipe.

Fire Dome. Made high and dome shape so all gases will burn before entering radiator. Deep corrugations inside and out provide larger surface to take up heat, also larger surface to radiate the heat.

Fire Pot. Deeply corrugated to increase radiating surface and add strength and life. Corrugations provide free circulation of air to fuel around outer edge of fire pot. All joints are gas-tight.

Grates. Heavy triangular bars; last longer than flat bars because two sides of each bar are exposed to air, one side to fire.

Ash Pit. Extra deep and large—will hold a large amount of ashes without interfering with draft. Full width ash door makes removal of ashes easier.

Draft Door. Extra large to admit plenty of air for heavy firing in extremely cold weather.

Fire Door. These furnaces have large fire doors. Easy to feed—large chunks of coal or wood go in easily.

Water Pan. Insures moist healthful air. Made large to require least amount of filling.

Leakproof. All joints are cup type and therefore gas-tight. Impossible for gases to reach living quarters. Doors ground smooth and fit closely insuring positive control of draft. The Windsor will hold fire longer and use less fuel because of this better construction and better design.

Casing. Made of standard weight galvanized iron with inner casing also of galvanized iron. Between the two casings is an air space. This keeps all the heat in the furnace.

Ward's Prices Are for Complete Outfits

Our price for warm air heating outfit includes all necessary fittings and supplies to make a complete installation. We provide japanned registers, oak cold air faces so that you may have perfect circulation, wall stacks, boxes, boots and connections. Double construction material with air space is the highest type. Sufficient asbestos paper is supplied for covering all warm air pipes in the basement. We also furnish pipe (nested) for the cold air duct which is easily put in place. Our outfit insures each room being properly heated. Special plans and instructions are sent free with your order so any handy man can set up the outfit.

Simple Instructions

Whether you are installing a complete steam heating plant, a pipeless furnace, or putting in a new plumbing outfit, we make it easy for you to do the work yourself and save money. We send you plainly written, illustrated instructions telling exactly what to do, where to begin, and just how to proceed. The plans furnished by our Engineering Department show you just where to place the boiler, furnace or tub and just where to cut holes and how to connect pipes.

Easy, Interesting Work

If you do not want to do the work yourself, you can have any handy man do it for you. You do not have to be an expert to do the job. We have thousands of letters from satisfied customers telling us how easy it is to follow our instructions and how satisfactory the jobs were when completed. And it was easy to do—just a few hours of interesting work and the job is done.

Our low prices make it possible for every home builder or owner to have a good heating plant and modern plumbing at a small investment. You always get quality, service and value when buying from Ward's.

Every Room in Home Comfortable

"I want to tell you just what I think of your furnace. In the first place I cannot see where it burns any more fuel than an ordinary stove. I have a nine room house and every room during the coldest weather was 70 or 80 degrees and I did not seem to fire the furnace hardly at all. Usually it takes only a small amount of fuel to run it two or three hours. They want $225 for one here and I can't see where it comes up to your Windsor."

H. D. McClure, Allegany, N. Y.

(Printed by Permission)

Range Boiler and Heater

In Connection with Furnace

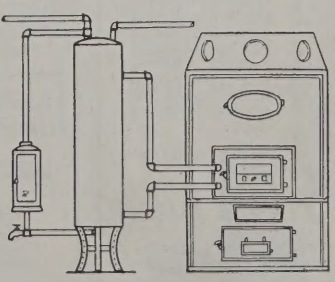
All our Furnaces and Boilers are tapped for hot water coil, which is used for heating water during the winter months while heating plant is used for heating purposes.

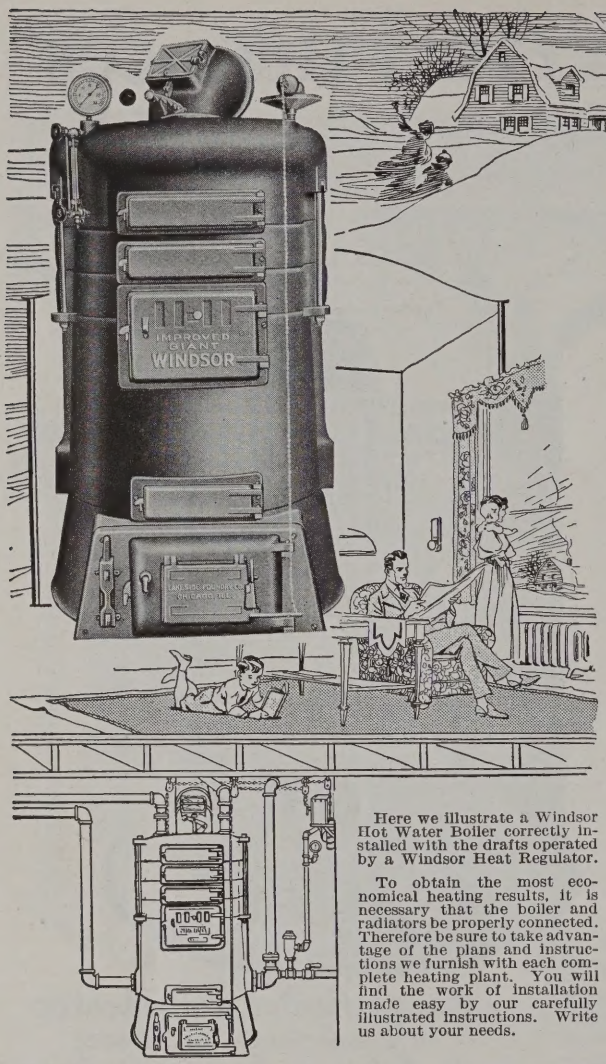
The illustration below shows range boiler connected to water coils in furnace and also connected to a gas heater. This heater is used during the summer months when furnace is not in operation, and thus gives you warm water the year around, as you need it.

Range boiler can also be used in connection with kitchen range where gas is not available. For those that have no heating plant, but have gas, we recommend a combination of range boiler and gas heater for summer use.

See Page 4 for Prices on Range Boilers

For gas heaters and other information, see our General Catalogue No. 104.





Here we illustrate a Windsor Hot Water Boiler correctly installed with the drafts operated by a Windsor Heat Regulator.

To obtain the most economical heating results, it is necessary that the boiler and radiators be properly connected. Therefore be sure to take advantage of the plans and instructions we furnish with each complete heating plant. You will find the work of installation made easy by our carefully illustrated instructions. Write us about your needs.

Ward's Giant Windsor
Hot Water and Steam Boilers

A Boiler is the very heart of a successful heating plant, and must be correctly proportioned to insure satisfactory heating results with a minimum amount of fuel.

Our boilers are the result of years of successful experience in house heating. A Windsor installation will solve your heating problem for many years.

Besides the great comfort a heating plant provides, it is a mighty good investment in any home. Should you at some future time make up your mind to sell, a Windsor Heating Plant will add materially to the value of your property.

All Windsor Boilers are made of heavy cast iron. The improved rocking grates are full size and easily operated by a lever. The fire pot is large, which means a slow burning fire with a great deal of heat. The smoke travel is long, consequently a maximum amount of heat is absorbed from the smoke and gases before they pass into the flue. The feed and ash doors are large, making firing and cleaning an easy task. All boilers are cored so that coils may be installed to heat water for domestic use. They will burn hard or soft coal, also wood.

You are sure of heating satisfaction with a Windsor Heating Plant. Should you wish additional information about heating apparatus, ask for our General Catalogue, or send us the enclosed information blank properly filled out.

Ward's Prices Are for Complete Outfits

For each hot water or steam outfit, a complete boiler of the proper size will be furnished, together with necessary pipe, radiators and fittings, valves and bronze or aluminum for finishing the radiators. With the hot water boiler you receive expansion tank, hot water thermometer, altitude gauge and draft regulator. With the steam boiler, damper, regulator, steam gauge and safety valve are furnished. Poker, flue brush, and firing tools are furnished with each outfit. A guarantee that the system will work properly if set up according to plans furnished by us is given with each order.

See Page 4 for Prices of Complete Steam and Hot Water Heating Plants

Windsor Heat Regulator

For use in connection with Pipeless Furnaces, Warm Air, Steam and Hot Water installations. Keeps your home at any desired temperature during the day or night.

The clock, which is mounted on an attractive lemon finish brass base, insures a warm home when you are ready to get up each morning.

Outfit consists of thermostat, thermometer, clock, motor and crank, ball bearing pulleys, damper chains, wire and dry cells.

Can also be furnished without clock.

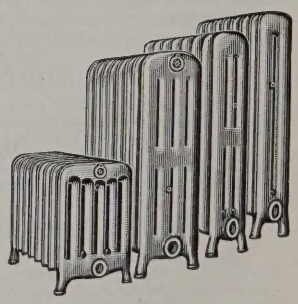
Cast Iron Radiators
For Hot Water or Steam

Windsor Radiators are made in a wide variety of sizes and styles to suit every requirement in all types of homes. The most modern method and equipment are used in their manufacture, and nothing has been spared in design, material and workmanship to make them the highest quality.

All Windsor Radiators are completely assembled before shipping. Every radiator is tested twice—once before, and once after assembling. All surfaces are smoothly ground and finished, free from rough edges permitting them to be finished evenly in either aluminum or gold bronze to harmonize with your home furnishings.



2, 3, 4 and 6 Column

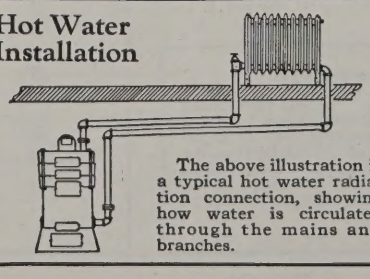
The large air spaces between the sections create a high degree of efficiency. All feet of radiators are ground evenly, and leveled before shipping.

Size Radiators Recommended

Where the space in which the radiator is to fit is short, the four column type is recommended. Where the space is narrow, such as hallways, vestibules and bathrooms, the two-column is usually best. The six-column low radiator is for installations under windows and similar places.

See Prices on Page 4

Hot Water Installation



The above illustration is a typical hot water radiation connection, showing how water is circulated through the mains and branches.

Send for Free Wall Paper Sample Book

A NEW house is not finished—and can never be homelike, until its rooms have been decorated. And the most pleasing, popular and economical wall treatment is, of course, wall paper.

If you want to make the same substantial saving on your decorating that you do on the building of your Wardway home, order your wall paper from Ward's, too. We buy direct from the mills, millions of rolls of many patterns, which enables us to sell at just about half what most dealers are charging.

You can pay as little as 3 cents a single roll, and paper an entire room for less than a dollar; and our finest, handsomest patterns are only 35 to 50 cents a single roll, yet they can be compared to papers selling elsewhere for a dollar or more a roll.
